Democracy Against Capitalism Renewing Historical Materialism:

Democracy Against Capitalism Ellen Meiksins Wood, 2016-03-01 Historian and political thinker Ellen Meiksins Wood argues that theories of postmodern fragmentation difference and contingency can barely accommodate the idea of capitalism let alone subject it to critique In this book she sets out to renew the critical program of historical materialism by redefining its basic concepts and its theory of history in original and imaginative ways using them to identify the specificity of capitalism as a system of social relations and political power She goes on to explore the concept of democracy in both the ancient and modern world examining its relation to capitalism and raising questions about how democracy might go beyond the limits imposed on it

The Myth of 1648 Benno Teschke, 2020-05-05 Winner of the 2003 Isaac and Tamara Deutscher Memorial Prize This book rejects a commonplace of European history that the treaties of Westphalia not only closed the Thirty Years War but also inaugurated a new international order driven by the interaction of territorial sovereign states Benno Teschke through this thorough and incisive critique argues that this is not the case Domestic social property relations shaped international relations in continental Europe down to 1789 and even beyond The dynastic monarchies that ruled during this time differed from their medieval predecessors in degree and form of personalization but not in underlying dynamic 1648 therefore is a false caesura in the history of international relations For real change we must wait until relatively recent times and the development of modern states and true capitalism In effect it is not until governments are run impersonally with no function other than the exercise of its monopoly on violence that modern international relations are born

Critical Marxist Theory Lukas Meisner, 2025-06-08 This book argues why Critical Theory as first developed in the Zeitschrift für Sozialforschung must be updated to help us tackling today's capitalist polycrisis from economic via political to ecological crises Yet following the dissolution of the Institute for Social Research in New York and the latest with the death of Adorno in 1969 and the death of Marcuse almost exactly ten years later there has been a domestication of the main strands of the Frankfurt School To understand and overcome this domestication the book traces with the means of philosophy and sociology its two affirmative steps in a liberal and in a postmodern turn As an alternative to both it defends Habermas project of modernity yet only by disentangling it in Marxian fashion from the capitalist process of modernisation This disentanglement is at the same time a political radicalisation It is necessary because the cultural political ideals of the project of modernity from human autonomy via rational society to qualitative individuality can only be realised beyond the framework of capitalism As their conceptual concentrate the book proposes political autonomy as a key concept confined neither by Kantian or liberal approaches nor by autonomist or operaist traditions Rather it draws on thinkers like Herbert Marcuse Ellen Meiksins Wood and Martin Hoggelund to rephrase Marxist concepts such as social freedom democratic socialism and the end of prehistory In this way political autonomy is developed both as a legit criterion for justified critique and as the philosophical foundation and emancipatory goal of a pluralist yet transcapitalist Critical Marxist Theory

Contemporary Security Studies Alan Collins, 2025 *A Global Political Economy of Democratisation* Alison J.

Ayers, 2018-02-13 The late twentieth century is often portrayed as an Age of Democratisation with democracy heralded as the best of all political systems Yet democracy has multiple meanings values and significances The start of the twenty first century has witnessed a massive revival of interest in the meaning and role of democracy not least as democracy understood in one highly particular sense has been increasingly recognised to be in crisis This book presents these deliberations in a new light by moving beyond the concept of the sovereign state as the dominant framework of enquiry and by rejecting the primacy of the state and the categorical separation of the domestic and the international Instead Ayers elaborates an account of democratisation through the global political economy encompassing a trenchant critique of mainstream democracy promotion in theory and practice and opening up possibilities for different histories of democratisation autonomous of the Western liberal and neoliberal project This innovative work will prove useful to scholars and students in the fields of Politics Political Economy International Relations Development African Studies History Geography and Sociology **Class Struggle**

and Identity Politics Marc James Léger, 2024-06-03 Contemporary bipartisan politics undermines socialist solidarity by ignoring class issues and pitting advocates of social justice against ethno national chauvinists This guide to the recent wave of woke culture wars provides a radical class analysis and critique of the most popular academic trends around diversity and inclusion radical democracy intersectionality privilege theory critical race theory and decoloniality The book further explains the complexity of today's cultural conflicts by examining how these issues are viewed across the political spectrum including populist and postmodern perspectives Exploring historical cultural political and economic developments since the postwar era this follow up to Identity Trumps Socialism provides the reader with everything you wanted to know but were afraid to ask about the campus wars that have gone mainstream **The End of Politicians** Brett Hennig, 2017-03-02 Our politics is

broken but it can be fixed A real democracy is not only possible it is an urgent necessity Provocative succinct and inspiring The End of Politicians combines insights from the history of democracy with a critical understanding of the information revolution to explain how we can fix democracy by eliminating politicians and replacing them with a representative network of everyday citizens A wealth of recent evidence has shown that groups of randomly selected ordinary people can and do make balanced informed and trusted decisions These citizens assemblies are legitimate accountable competent and above all convincing demonstrations that we can govern ourselves The future of democracy has arrived It is time for the end of politicians **The American Road to Capitalism** Charles Post, 2011-03-21 Most US historians assume that capitalism

either came in the first ships or was the inevitable result of the expansion of the market Unable to analyze the dynamics of specific forms of social labour in the antebellum US most historians of the US Civil War have privileged autonomous political and ideological factors ignoring the deep social roots of the conflict This book applies theoretical insights derived from the debates on the transition to capitalism in Europe to the historical literature on the US to produce a new analysis of the

origins of capitalism in the US and the social roots of the Civil War Winner of the Paul Sweezy Marxist Sociology Book Award 2013 Short listed for the 2011 Isaac and Tamara Deutscher Memorial Prize **State Capitalism and International**

Paul, 2020-01-24 This book is a study of the key components and contradictions of the escalating global crisis and their impact on modern Australia It elaborates the damage being done to democracy human rights and the fabric of society Racism is structured in the universality of the nation state and capitalism in the 21st century Racism is a process that discriminates and segregates the human species creating major conflicts and antagonisms It generates a global struggle for equality and social justice The global crisis is energised by the contradiction between a global capitalism that is in effect totalitarian and the imperatives of economic growth driving every nation state of the world Racism is embodied in the emergence of a new imperialism to maintain Western global hegemony a growing source of instability and violence in the world system endangering the survival of humanity The book advocates the promotion of full democratic participation in the struggle for social political and economic equality **Marx on Emancipation and Socialist Goals** Robert X. Ware, 2018-10-14 This

book responds to the need for a retrieval and renewal of the work of Karl Marx through close philosophical analysis of his publications manuscripts and letters especially those relevant to politics morality and the future This philosophical study stands out because of its two principal features First it reviews and develops ideas about the future though often only briefly discussed by Marx and his commentators drawn from Marx's work Second it focuses on collective matters that are critical for Marx's ideas but rarely investigated and still problematic Part One introduces Marx with a discussion of emancipation and freedom in community It then discusses the importance of retrieval and the methodology for promoting it Part Two is about misunderstandings of Marx's ideas about productive development division of labour and organisations Part Three discusses nations morality and democracy all of which Marx supported Part Four takes up Marx's significant but misunderstood ideas about the future and his relation to the anarchists **Postcolonial Theory and the Specter of Capital** Vivek

Chibber, 2013-03-12 Postcolonial theory has become enormously influential as a framework for understanding the Global

South It is also a school of thought popular because of its rejection of the supposedly universalizing categories of the Enlightenment In this devastating critique mounted on behalf of the radical Enlightenment tradition Vivek Chibber offers the most comprehensive response yet to postcolonial theory Focusing on the hugely popular Subaltern Studies project Chibber shows that its foundational arguments are based on a series of analytical and historical misapprehensions He demonstrates that it is possible to affirm a universalizing theory without succumbing to Eurocentrism or reductionism Postcolonial Theory and the Specter of Capital promises to be a historical milestone in contemporary social theory **The Dialectics of Global Justice**

Bryant William Sculos,2022-07-01 The Dialectics of Global Justice uses a novel application of negative dialectical interpretation to offer an immanent and ethical critique of prominent theories of global justice i e cosmopolitanism including how these theories manifest in political movements and policy agendas Drawing on the work of Theodor Adorno and Erich Fromm especially author Bryant William Sculos exposes the contradictory relationship between cosmopolitanism and core elements of capitalism particularly the domineering capitalistic mentality re produced by and through capitalism leading to the conclusion that cosmopolitanism on its own terms demands an alternative postcapitalistic political basis in order to make robust progress toward global justice While offering this critique Sculos also implicitly challenges the increasingly common view that cosmopolitanism today is inherently imperialistic and out of touch with the global resurgence of nationalism and anti cosmopolitan sentiment **The Global Politics of Artificial Intelligence** Maurizio Tinnirello,2022-04-24

Gendered States of Punishment and Welfare Adrienne Roberts, 2016-09-13 This book presents a feminist historical materialist analysis of the ways in which the law policing and penal regimes have overlapped with social policies to coercively discipline the poor and marginalized sectors of the population throughout the history of capitalism Roberts argues that capitalism has always been underpinned by the use of state power to discursively construct and materially manage those sectors of the population who are most resistant to and marginalized by the instantiation and deepening of capitalism The book reveals that the law along with social welfare regimes have operated in ways that are highly gendered as gender along with race has been a key axis along which difference has been constructed and regulated It offers an important theoretical and empirical contribution that disrupts the tendency for mainstream and critical work within IPE to view capitalism primarily as an economic relation Roberts also provides a feminist critique of the failure of mainstream and critical scholars to analyse the gendered nature of capitalist social relations of production and social reproduction Exploring a range of issues related to the nature of the capitalist state the creation and protection of private property the governance of poverty the structural compulsions underpinning waged work and the place of women in paid and unpaid labour this book is of great use to students and scholars of IPE gender studies social work law sociology criminology global development studies political science and history
