The Virtual Community, revised edition Howard Rheingold, 2000-10-23 Howard Rheingold tours the virtual community of online networking Howard Rheingold has been called the First Citizen of the Internet In this book he tours the virtual community of online networking He describes a community that is as real and as much a mixed bag as any physical community one where people talk argue seek information organize politically fall in love and dupe others At the same time that he tells moving stories about people who have received

online emotional support during devastating illnesses he acknowledges a darker side to people's behavior in cyberspace. Indeed, contends Rheingold, people relate to each other online much the same as they do in physical communities. Originally published in 1993, *The Virtual Community* is more timely than ever. This edition contains a new chapter in which the author revisits his ideas about online social communication now that so much more of the world's population is wired. It also contains an extended bibliography.

The Civic Web David M. Anderson, Michael Cornfield, 2003. Political web sites and e-mail lists were novelties in 1996. By 2000 they were a news trend. By 2004 they will be a part of every electoral and policy campaign. News seekers, activists, and decision makers increasingly turn to the Net as a matter of course. *The Civic Web* delineates the basic issues, opportunities, and dilemmas posed by the introduction of computer networked communications into U.S. national politics. Leading scholars from several academic disciplines join pioneer practitioners of online advocacy, discussion, and law in considering how the Internet can host and even advance enlightened self-government by a free people in a constitutional republic. Online Panel Research Mario Callegaro, Reginald P. Baker, Jelke Bethlehem, Anja S. Göritz, Jon A. Krosnick, Paul J. Lavrakas, 2014-04-14. Provides new insights into the accuracy and value of online panels for completing surveys. Over the last decade there has been a major global shift in survey and market research towards data collection using samples selected from online panels. Yet despite their widespread use, remarkably little is known about the quality of the resulting data. This edited volume is one of the first attempts to carefully examine the quality of the survey data being generated by online samples. It describes some of the best empirically based research on what has become a very important yet controversial method of collecting data. *Online Panel Research* presents 19 chapters of previously unpublished work addressing a wide range of topics including coverage bias, nonresponse, measurement error, adjustment techniques, the relationship between nonresponse and measurement error, impact of smartphone adoption on data collection, Internet rating panels, and operational issues. The datasets used to prepare the analyses reported in the chapters are available on the accompanying website www.wiley.com/go/online_panel. Covers controversial topics such as professional respondents, speeders, and respondent validation. Addresses cutting edge topics such as the challenge of smartphone survey completion, software to manage online panels, and Internet and mobile ratings panels. Discusses and provides examples of comparison studies between online panels and other surveys or benchmarks. Describes adjustment techniques to improve sample representativeness. Addresses coverage, nonresponse, attrition, and the relationship between nonresponse and measurement error with examples using data from the United States and Europe. Addresses practical questions such as motivations for joining an online panel and best practices for managing communications with panelists. Presents a meta-analysis of determinants of response quantity. Features contributions from 50 international authors with a wide variety of backgrounds and expertise. This book will be an invaluable resource for opinion and market researchers, academic

researchers relying on web based data collection governmental researchers statisticians psychologists sociologists and other research practitioners *The Handbook of Global Online Journalism* Eugenia Siapera, Andreas Veglis, 2012-07-03 The Handbook to Global Online Journalism features a collection of readings from international practitioners and scholars that represent a comprehensive and state of the art overview of the relationship between the internet and journalism around the world Provides a state of the art overview of current research and future directions of online journalism Traces the evolution of journalistic practices business models and shifting patterns of journalistic cultures that have emerged around the world with the migration of news online Written and edited by top international researchers and practitioners in the area of online journalism Features an extensive breadth of coverage including economics organizational practices contents and experiences Discusses developments in online news in a wide range of countries from the USA to Brazil and from Germany to China Contains original theory new research data and reviews of existing studies in the field **Preventing Online**

Democracy Stephen Coleman, Peter M. Shane, 2011-12-16 An investigation of the effect of government online forums on democratic practices in the United States and Europe The global explosion of online activity is steadily transforming the relationship between government and the public The first wave of change e government enlisted the Internet to improve management and the delivery of services More recently e democracy has aimed to enhance democracy itself using digital information and communication technology One notable example of e democratic practice is the government sponsored or government authorized online forum for public input on policymaking This book investigates these online consultations and their effect on democratic practice in the United States and Europe examining the potential of Internet enabled policy forums to enrich democratic citizenship The book first situates the online consultation phenomenon in a conceptual framework that takes into account the contemporary media environment and the flow of political communication then offers a multifaceted look at the experience of online consultation participants in the United States the United Kingdom and France and finally explores the legal architecture of U S and E U online consultation As the contributors make clear online consultations are not simply dialogues between citizens and government but constitute networked communications involving citizens government

technicians civil society organizations and the media The topics examined are especially relevant today in light of the Obama administration's innovations in online citizen involvement

Euroscepticism as a Transnational and Pan-European Phenomenon John FitzGibbon, Benjamin Leruth, Nick Startin, 2016-08-19 As the EU enters an increasingly uncertain phase after the 2016 Brexit referendum Euroscepticism continues to become an increasingly embedded phenomenon within party systems non party groups and within the media Yet academic literature has paid little attention to the emergence of and increased development of transnational and pan European networks of EU opposition As the gap between Europe's mainstream political elites and an increasingly sceptical public has widened pan European spheres of opposition towards the EU have developed and evolved The volume sets out to explain how such an innately contradictory phenomenon as transnational Euroscepticism has emerged It draws on a variety of perspectives and case studies in a number of spheres the European Parliament political parties the media civil society and public opinion Examining to what extent the pan European dimension of Euroscepticism is becoming increasingly influential it argues that opposition to European integration has for too long been viewed somewhat narrowly through the paradigm of national party politics This text will be of key interest to scholars students and professionals in EU politics European studies political parties and more broadly to comparative politics and international relations

Congress Online Dennis W. Johnson, 2013-04-15 While more than a million e mails clog the inboxes of Congress each day some legislators can't even find their own websites without the help of their staffers In fact laptops aren't even allowed on the floor of the House or Senate But as Dennis W Johnson demonstrates in *Congress Online* there are some savvy legislators who are taking advantage of new media to expand their power and influence and the Congressional communications revolution is just beginning Born out of a Pew Charitable Trusts research project of the same name *Congress Online* is the definitive guide to electronic politics pointing the way to a system that could forge a new and more immediate connection between legislators and the American people

Online Incivility and Public Debate Gina Masullo Chen, 2017-06-25 This book investigates what influence online incivility through user generated comments on news websites has on public debate Built on the premise that public discussions about important topics are vital to a healthy democracy the book analyzes 3 508 online comments in order to understand what factors in comments make them more susceptible to incivility defined as nasty remarks rife with profanity It also examines comments for attributes of deliberation which are discussions across difference supported by evidence and rational arguments Using an experiment the book shows that uncivil comments jumpstart a chain reaction leading first to negative emotion and then to greater intention to get politically involved Overall *Online Incivility and Public Debate* Nasty Talk argues that while incivility mars online debate it may also spark interest in important topics and allow for positive deliberative moments of quality discussion

Online Communities and Crowds in the Rise of the Five Star Movement Francesco Bailo, 2020-08-06 This book reflects on the political capacity of citizen users to impact politics explaining the danger in assuming that mass online participation has

unconditionally democratising effects Focusing on the case of Italy's Five Star Movement the book argues that Internet participation is naturally unequal and without normative and strong design efforts Internet platforms can generate noisy undemocratic crowds instead of self reflexive norm bounded communities The depiction of a democratising Internet can be easily exploited by those who manage these platforms to sell crowds as deliberating publics As the Internet almost everywhere turns into the primary medium for political engagement it also becomes the symbol of what is wrong with politics Internet users experience unprecedented instantaneous and personalised access to information and communication and by comparison they feel a much stronger level of irrelevance in the existing political system **A Digital Janus: Looking**

State Terrorism and Neoliberalism Ruth Blakeley, 2009-04-03 This book explores the complicity of democratic states from the global North in state terrorism in the global South It evaluates the relationship between the use of state terrorism by Northern liberal democracies and efforts by those states to further incorporate the South into the global political economy and to entrench neoliberalism Most scholarship on terrorism tends to ignore state terrorism by Northern democracies focusing instead on terrorist threats to Northern interests from illiberal actors The book accounts for the absence of Northern state terrorism from terrorism studies and provides a detailed conceptualisation of state terrorism in relation to other forms of state violence The book explores state terrorism as used by European and early American imperialists to secure territory to coerce slave and forced wage labour and to defeat national liberation movements during the process of decolonisation It examines the use of state terrorism by the US throughout the Cold War to defeat political movements that would threaten US elite interests Finally it assesses the practices of Northern liberal democratic states in the War on Terror and shows that many Northern liberal democracies have been active in state terrorism including through extraordinary rendition This book will be of much interest to students of critical terrorism studies security studies South American politics US foreign policy and IR in general Ruth Blakeley is a lecturer in International Relations at the University of Kent She holds a PhD in International Relations from the University of Bristol

Public Law in a Multi-Layered Constitution Nicholas Bamforth, Peter Leyland, 2003-10-30 How is the distribution of power between the different levels of the contemporary constitution to be policed What is the emerging contribution of the courts in regard to EC law the Human Rights Act 1998 and devolution What roles should be played by the legislative and judicial bodies at each level Who should have access to the courts in public law disputes and on what grounds should the courts regulate the exercise of public power Can a coherent distinction be maintained between public and private law These essays by leading public law scholars explore the allocation and regulation of public power in the United Kingdom At the beginning of the twenty first century it appears that the traditional Diceyan model of a unitary constitution has been superseded as power has come to be distributed particularly in the post 1997 period between institutions at European national devolved and local level Furthermore the courts have come to play a powerful role at all levels through judicial review while forms of regulation and contracting together with other informal techniques of governance have emerged The contemporary constitution can be characterised as involving a multi layered distribution of power a situation which raises many key questions about the role of public law The essays in this important collection tackle such questions from a variety

of perspectives aiming between them to provide a dynamic picture of the role of public law in the contemporary multi layered constitution
