Democratic Governance and Non-State Actors A. Governments, Non-State Actors and Trade Policy-Making Ann Capling, Patrick Low, 2010-09-09 One of the most pressing issues confronting the multilateral trade system is the challenge posed by the rapid proliferation of preferential trade agreements Plenty has been written about why governments might choose to negotiate preferentially or multilaterally but until now it has been written almost exclusively from the perspective of governments We know very little about how non state actors view this issue of forum choice nor how they position themselves to influence choices by governments about whether to emphasize PTAs or the WTO This book addresses that issue squarely through case studies of trade policy making and forum choice in eight developing countries Chile Colombia Mexico South Africa Kenya Jordan Indonesia and Thailand The case studies are based on original research by the authors including interviews with state and non state actors involved in the trade policy making process in the eight countries of this study

and the public sphere I see it as a useful and enriching contribution to the debate on lobbying its necessary transparency and its role in the democratization process This book has the potential to reach an international audience of experts and interested lay persons and both complement and compete with publications on similar issues Karel B M ller University of Economics in Prague Czech Republic This book deals with the current as yet unsolved problem of transparency of lobbying In the current theories and prevalent models that deal with lobbying activities there is no reflection of the degree of transparency of lobbying mainly due to the unclear distinction between corruption lobbying in general and transparent lobbying This book provides a perspective on transparency in lobbying in a comprehensive and structured manner It delivers an interdisciplinary approach to the topic and creates a methodology for assessing the transparency of lobbying its role in the democratization process and a methodology for evaluating the main consequences of transparency The new approach is applied to assess lobbying regulations in the countries of Central Eastern Europe and shows a method for how lobbying in other regions of the world may also be assessed

organization and global governance *Effective Governance Under Anarchy* Tanja A. Börzel, Thomas Risse, 2021-04-08
 Policy makers and academics alike have mistakenly promoted an agenda which takes well governed democratic and consolidated Weberian states as the model for the world and the goal of development programs Whilst Western industrial democracies are the exception areas of limited statehood where state institutions are weak and ineffective are everywhere and this books argues can still be well governed Three factors explain effective governance in areas of limited statehood Fair and transparent institutions fit for purpose legitimate governors accepted by the people and social trust among the citizens Effective and legitimate governance in the absence of a functioning state is not only provided by international organizations foreign aid agencies and non governmental organizations but also by multi national companies rebel groups and other violent non state actors traditional as well as religious leaders and community based organizations B rzel and Risse base their argument on empirical findings from over a decade of research covering Latin America the Middle East Sub Saharan Africa and Asia **Rethinking Global Democracy in Brazil** Markus Fraundorfer, 2017-11-01 In recent years a growing literature has focused on how to create more effective and democratic global governance mechanisms to better tackle global challenges such as health epidemics global hunger Internet surveillance or the consequences of climate change Yet there is a gap in accessible published material to reflect contributions of democratic states from the global South Among these democracies from the global South Brazil is a popular case for teachers and researchers looking to study global governance mechanisms This book provides students with a framework that challenges the Western centred views on questions of how to democratise global governance processes arguing that developing democracies from the global South have developed serious and sustainable approaches to a more democratic global system With chapters on Brazil s responses to global food security the purchase of drugs open government initiatives and internet governance this book opens up contemporary and novel practices of democracy for examination **The Peace Process between Turkey and the Kurds** Burak Özpek, 2017-11-20 In January 2013 the Justice and Development Party AKP government initiated a peace process in order to settle the Kurdish question through peaceful means However this sanguine atmosphere gradually disappeared before finally collapsing after the general elections of 7 June 2015 This book addresses the question of why the peace building attempts that culminated between 2013 and 2015 failed It deals with the historical background of the Kurdish question and contemporary complexities of the Turkish politics to explain how they eventually jeopardized the peace process This is an important and relevant research question because the Kurdish question has been viewed as a variable shaping Turkey s domestic politics and its foreign relations The Kurdish question s influence on Turkish foreign policy is not confined to its neighbors Turkey s relations with the United States and the European Union was also shaped by the issues stemmed from the Kurdish question As this was the first serious peace attempt in a conflict that lasted over three decades examination of why it failed will inform any future attempts at peace and will help pinpoint the potential path that Turkey might face in both the domestic and

international realm This book will appeal to students and scholars with an interest in Turkey and the Kurdish issue peacekeeping security studies and Middle East Politics

Civil Protection and Domestic Security in Contemporary Hybrid Warfare Wojciech Wróblewski, Michał Wiśniewski, Jędrzej Bieniasz, 2025-05-22 Civil Protection and Domestic Security in Contemporary Hybrid Warfare presents a comprehensive approach to civil protection and domestic security in contemporary hybrid armed conflict Hybrid warfare encompasses a number of dimensions such as military political psychological cognitive space social economic informational or technological Current conflicts show that hybrid warfare despite regional differences is based on a common operational framework that combines conventional and unconventional tactics targeting not only military structures but also largely targeting civilians societies All this makes threats more diffuse subtle and difficult to predict They also often take the form of networked actions and have cascading effects in which they can produce complex secondary effects affecting a range of spheres of society and key infrastructure In response to this spectrum of threats individual states need to adapt their security and civil protection systems to the type of threat involved However most existing solutions are fragmented resulting in a reduced ability to coordinate and adequately prepare civilians for hybrid threat conditions Given these challenges the book establishes a common language that helps shape coherent risk management and protective mechanisms in dealing with hybrid attacks It also points in a new direction in ensuring the reliability of information provided to civilians which is crucial in a hybrid war environment where disinformation is used as one of the main tools of destabilisation Drawing on theoretical knowledge and practical experiences from around the world the book provides tools to effectively respond to existing and future conflicts and hybrid wars Above and beyond this bridging the gap between concrete knowledge of hybrid warfare and operational needs this book explores how public administrations public services NGOs local communities and other actors play a key role in protecting the population during such non traditional armed conflicts Civil Protection and Domestic Security in Contemporary Hybrid Warfare is a vital resource to government and civilian specialists responsible for population security and protection helping them and their civilian populations to strategise and oftentimes to individually mitigate the risk of loss of life or health as has been demonstrated in the Russia Ukraine conflict

The Relationship between Human Security Discourse and International Law Shireen Daft, 2017-12-01 The concept of human security has emerged in international relations and policy as an idea which not only seeks to relocate the focus of international society on the individual but also challenges the current priorities of the international community In particular it places emphasis on promoting and facilitating a nexus between security development and human rights It is potentially a paradigm in the making gaining considerable momentum within the UN international relations scholarship and regional bodies And yet by and large it continues to be unexplored by the international legal community despite the success of a number of international treaties being attributed to the discourse This book seeks to address this gap and establish the nature of the relationship between human security discourse and international law

determining whether human security can meaningfully contribute to the international legal framework To determine this the book analyses the core principles of human security discourse and examines the degree to which they find parallels in the existing normative structure of international law The book examines the how the broad narrow debate that dominates human security discourse has played out in international law making It goes on to consider the processes for the creation of so called human security treaties in order to determine a blueprint for future development of international human security treaty law In concluding Shireen Daft sets out a structured principled approach through which international legal scholarship can engage with human security highlighting the ways in which engagement between the two fields can be sustained

fragmented and diffuse. It comprises diverse theoretical and methodological perspectives discussing democracy's role in and potential for coping with environmental issues at the local and global scales. This handbook provides a comprehensive overview of arguments, claims, questions, and insights that are put forward regarding the relationship between democracy and sustainability. In the process, it not only consolidates and condenses but also broadens and captures the many nuances of the debate. By showing how theoretical, empirical, and practical accounts are interrelated, focusing on diverse problem areas and spheres of action, it serves as a knowledge source for professionals who seek to develop action strategies that do justice to both sustainability and democracy, as well as providing a valuable reference for academic researchers, lecturers, and students.

Global Environmental Politics Jean-Frédéric Morin, Amandine Orsini, Sikina Jinnah, 2020. *Global Environmental Politics* provides a fully up-to-date and comprehensive introduction to the most important issues dominating this fast-moving field. Going beyond the issue of climate change, the textbook also introduces students to the pressing issues of desertification, trade in hazardous waste, biodiversity protection, whaling, acid rain, ozone depletion, water consumption, and overfishing. Importantly, the authors pay particular attention to the interactions between environmental politics and other governance issues such as gender, trade, development, health, agriculture, and security.

The Constitutionalization of International Law Jan Klabbers, Anne Peters, Geir Ulfstein, 2009-10-01. The book examines one of the most debated issues in current international law: to what extent the international legal system has constitutional features comparable to what we find in national law. This question has become increasingly relevant in a time of globalization where new international institutions and courts are established to address international issues. Constitutionalization beyond the nation-state has for many years been discussed in relation to the European Union. This book asks whether we now see constitutionalization taking place also at the global level. The book investigates what should be characterized as constitutional features of the current international order in what way the challenges differ from those at the national level and what could be a proper interaction between different international arrangements as well as between the international and national constitutional level. Finally, it sketches the outlines of what a constitutionalized world order could and should imply. The book is a critical appraisal of constitutionalist ideas and of their critique. It argues that the reconstruction of the current evolution of international law as a process of constitutionalization against a background of and partly in competition with the verticalization of substantive law and the deformalization and fragmentation of international law has some explanatory power, permits new insights, and allows for new arguments. The book thus identifies constitutional trends and challenges in establishing international organisational structures and designs procedures for standard setting, implementation, and judicial functions. This paperback edition features the authors' discussion of this book on the EJIL Talks blog.
