Netherlands Annual Review of Military Studies 2020 Frans Osinga, Tim Sweijds, 2020-12-03 This open access volume surveys the state of the field to examine whether a fifth wave of deterrence theory is emerging Bringing together insights from world leading experts from three continents the volume identifies the most pressing strategic challenges frames theoretical concepts and describes new strategies The use and utility of deterrence in today s strategic environment is a topic of paramount concern to scholars strategists and policymakers Ours is a period of considerable strategic turbulence which in recent years has featured a renewed emphasis on nuclear weapons used in defence postures across different theatres a dramatic growth in the scale of military cyber capabilities and the frequency with which these are used and rapid technological progress including the proliferation of long range strike and unmanned systems These military strategic developments occur in a polarized international system where cooperation between leading powers on arms control regimes is breaking down states widely make use of hybrid conflict strategies and the number of internationalized intrastate proxy conflicts has quintupled over the past two decades Contemporary conflict actors exploit a wider gamut of coercive instruments which they apply across a wider range of domains The prevalence of multi domain coercion across but also beyond traditional dimensions of armed conflict raises an important question what does effective deterrence look like in the 21st century Answering that question requires a re appraisal of key theoretical concepts and dominant strategies of Western

and non Western actors in order to assess how they hold up in today s world Air Commodore Professor Dr Frans Osinga is the Chair of the War Studies Department of the Netherlands Defence Academy and the Special Chair in War Studies at the University Leiden Dr Tim Sweijts is the Director of Research at The Hague Centre for Strategic Studies and a Research Fellow at the Faculty of Military Sciences of the Netherlands Defence Academy in Breda

Capitalism and Freedom in African Political Philosophy Grivas Muchineripi Kayange,2020-05-05 This book investigates capitalism and freedom the guiding forces of many political systems in African philosophy It builds on classical and neoliberal capitalism rooted in private property and freedom and argues for the presence of these elements in the traditional and modern African political systems The author argues that while these elements are partly imported from Western capitalists they are equally traceable in African traditional political systems Kayange argues that African politics is marred by a conflict between embracing capitalism and freedom individualism on the one hand and socialism founded on African communitarianism and communist ideas on the other This conflict has affected policy development and implementation and has significantly contributed towards the socio economic and ethical crises that are recurrent in most of the African countries

The Politics and Law of Democratic Transition Sonia Zaman Khan,2017-10-25 Peaceful legal and political changing of the guards is taken for granted in developed democracies but is not evident everywhere As a relatively new democracy marred by long periods of military rule Bangladesh has been encountering serious problems because of a prevailing culture of mistrust weak governance institutions constant election manipulation and a peculiar socio political history which between 1990 and 2011 led to a unique form of transitional remedy in the form of an unelected neutral caretaker government CTG during electoral transitions This book provides a contextual analysis of the CTG mechanism including its inception operation manipulation by the government of the day and abrupt demise It queries whether this constitutional provision even if presently abolished after overseeing four acceptable general elections actually remains a crucial tool to safeguard free and fair elections in Bangladesh Given the backdrop of the culture of mistrust the author examines whether holding national elections without a CTG or an umpire of some kind can settle the issue of credibility of a given government The book portrays that even the management of elections is a matter of applying pluralist approaches Considering the historical legacy and contemporary political trajectory of Bangladesh the cause of deep rooted mistrust is examined to better understand the rationale for the requirement emergence and workings of the CTG structure The book unveils that it is not only the lack of nation building measures and governments wish to remain in power at any cost which lay behind the problems that Bangladesh faces today Part of the problem is also the flawed logic of nation building on the foundation of Western democratic norms which may be unsuitable in a South Asian cultural environment Although democratic transitions on the crutch of the CTG have been useful in moments of crisis its abolition creates the need for a new or revised transitional modality perhaps akin to the CTG ethos to oversee electoral governance which will have to be renegotiated by the polity based on the people s will The book provides a

valuable resource for researchers and academics working in the area of constitutional law democratic transition legal pluralism and election law *The Triumph of Democracy and the Eclipse of the West* Ewan Harrison, S. Mitchell, Sara McLaughlin Mitchell, 2013-12-17 This book explores the paradox of the worldwide spread of democracy and capitalism in an era of Western decline The rest is overtaking the West as Samuel Huntington predicted but because it is adopting Western institutions The emerging global order offers unprecedented opportunities for the expansion of peace prosperity and freedom Yet this is not the end of history but the beginning of a post Western future for the democratic project The major conflicts of the future will occur between the established democracies of the West and emerging democracies in the developing world as they seek the benefits and recognition associated with membership of the democratic community This clash of democratizations will define world politics *European Dream and Reluctant Integration in the 21st Century* Hungdah Su (苏恒达), 2020-10-01 To avoid a repeat of those nationalist nightmares a common European Dream emerged after WWII which has since developed into some essential doctrines of European integration This dream inspired institutionalist context has framed intergovernmental bargaining sectoral spillovers and transnational cooperation in European integration The powerful European Dream has even encouraged Europeans toward closer integration though they were quite often very reluctant to go further This dream driven approach and reluctant runner s model have highlighted some fundamental realities of European integration extremely inspiring for the future of the EU and the ongoing Asian regionalism This book consists of three parts and thirteen chapters It aims to explain European integration the EU s role in global governance and the EU s impact upon Asian regionalism with the help of the European Dream approach and reluctant runners model Trump s unilateralism the rising tensions between the US and PRC and the COVID 19 pandemic may be a turning point for world politics Both globalization and global governance have consequently slowed down giving place to regionalism and inter regionalism This book hopes to contribute to the rising debate over European integration Asian regionalism and EU Asian inter regionalism **CONTEMPORARY POLITICAL THEORY** VINOD, M. J., DESHPANDE, MEENA, 2013-01-11 Intended as a text for the postgraduate students of political science this well researched book attempts to track the evolution of political ideas in the recent past and their background It brings out the contemporary epistemological and methodological debates within the discipline and social sciences as a whole and incorporates the latest developments in the field Divided into forty chapters under eleven parts the book deals with the core concepts and debates in political theory and focuses on the state society interactions It tries to explain how the states societies and cultures have responded to the emerging challenges thrown up by the social economic and political factors and the direction of the response It also dwells on the impact of globalisation on current trends Finally the book analyses the ideas of modern Indian thinkers such as V D Savarkar Jawaharlal Nehru Ram Manohar Lohia B R Ambedkar and Jayaprakash Narayan Besides the postgraduate students of political science the book would also be useful to the aspirants of civil services examinations and the initiated readers

Exiting the Fragility Trap David Carment, Yiagadeesen Samy, 2019-10-15 State fragility is a much debated yet underinvestigated concept in the development and international security worlds Based on years of research as part of the Country Indicators for Foreign Policy project at Carleton University *Exiting the Fragility Trap* marks a major step toward remedying the lack of research into the so called fragility trap In examining the nature and dynamics of state transitions in fragile contexts with a special emphasis on states that are trapped in fragility David Carment and Yiagadeesen Samy ask three questions Why do some states remain stuck in a fragility trap What lessons can we learn from those states that have successfully transitioned from fragility to stability and resilience And how can third party interventions support fragile state transitions toward resilience Carment and Samy consider fragility's evolution in three state types countries that are trapped countries that move in and out of fragility and countries that have exited fragility Large sample empirical analysis and six comparative case studies Pakistan and Yemen trapped countries Mali and Laos in and out countries and Bangladesh and Mozambique exited countries drive their investigation which breaks ground toward a new understanding of why some countries fail to see sustained progress over time

Afghanistan, Iraq, and Post-conflict Governance: Damoclean Democracy? Imtiaz Hussain, 2010-01-11 Much has been written about democratizing Afghanistan and Iraq yet a clear cut theoretically enriching and empirically thick comparative analysis remains overdue for societies as divided as these two To partly fill in the vacuum this book utilizes various theories and stages of international negotiations which catalyzed democratization in both cases in interpreting both cases while also distinguishing between endogenous and exogenous democratization forces How electoral democracy came about in both cases is traced from the negotiating table through at least 4 stages and 6 chapters The study finds democratization being more stable when left on its own momentum as in Afghanistan than when conflict driven as in Iraq Though full fledged democracy does not appear inevitable in either case the study's insightful exploration of its interface in Islamic communities and as a Bush Doctrine component alerts us to fasten our seat belts before elections beckon again
