Environmental Literacy in Science and Society Roland W. Scholz, 2011-07-21 In an era where humans affect virtually all of the earth s processes questions arise about whether we have sufficient knowledge of human environment interactions How can we sustain the Earth s ecosystems to prevent collapses and what roles should

practitioners and scientists play in this process These are the issues central to the concept of environmental literacy This unique book provides a comprehensive review and analysis of environmental literacy within the context of environmental science and sustainable development Approaching the topic from multiple perspectives it explores the development of human understanding of the environment and human environment interactions in the fields of biology psychology sociology economics and industrial ecology The discussion emphasises the importance of knowledge integration and transdisciplinary processes as key strategies for understanding complex human environment systems HES In addition the author defines the HES framework as a template for investigating sustainably coupled human environment systems in the 21st century

Foundations of Socio-Environmental Research William R. Burnside, Simone Pulver, Kathryn J. Fiorella, Meghan L. Avolio, Steven M. Alexander, 2022-12-08 This anthology convenes 53 foundational readings that showcase the rich history of socio environmental research from the late 1700s onwards The introduction orients readers to the topic and how it has evolved and describes how to best use the book The original readings are organised into six sections documenting the emergence of socio environmental research first as a shared concern and then as a topic of specific interest to anthropology and geography economics sociology and political science ecology ethics religious studies and history and technology energy and materials A noted scholar introduces each section putting the readings into historical and intellectual context The conclusion links the legacy readings to contemporary approaches to socio environmental research and discusses how these links can enrich the reader's understanding and work Invaluable to students instructors and researchers alike this canonical reference illuminates underappreciated linkages across research domains and creates a shared basis for dialogue and collaboration

The Oxford Handbook of Historical Ecology and Applied Archaeology Christian Isendahl, Daryl Stump, 2019-01-10 The Oxford Handbook of Historical Ecology and Applied Archaeology presents theoretical discussions methodological outlines and case studies describing the field of overlap between historical ecology and the emerging sub discipline of applied archaeology to highlight how modern environments and landscapes have been shaped by humans Historical ecology is based on the recognition that humans are not only capable of modifying their environments but that all environments on earth have already been directly or indirectly modified This includes anthropogenic climate change widespread deforestations and species extinctions but also very local alterations the effects of which may last a few years or may have legacies lasting centuries or more With contributions from anthropologists archaeologists human geographers and historians this volume focuses not just on defining human impacts in the past but on the ways that understanding these changes can help inform contemporary practices and development policies Some chapters present examples of how ancient or current societies have modified their environments in sustainable ways while others highlight practices that had unintended long term consequences The possibilities of learning from these practices are discussed as is the potential of using the long history of human resource exploitation as a method for building or testing models of future change The volume

offers overviews for students researchers and professionals with an interest in conservation or development projects who want to understand what practical insights can be drawn from history and who seek to apply their work to contemporary issues

Rural Sustainability Qing Tian, 2017-05-22 This volume applies the science of complexity to study coupled human environment systems CHES and integrates ideas from the social sciences of climate change into a study of rural development amid flooding and urbanization in the Poyang Lake Region PLR of China Author Qing Tian operationalizes the concept of sustainability and provides useful scientific analyses for sustainable development in less developed rural areas that are vulnerable to climatic hazards The book uses a new sustainability framework that is centered on the concept of well being to study rural development in PLR The PLR study includes three major analyses 1 a regional assessment of human well being 2 an empirical analysis of rural livelihoods and 3 an agent based computer model used to explore future rural development These analyses provide a meaningful view of human development in the Poyang Lake Region and illustrate some of the complex local and macro level processes that shape the livelihoods of rural households in the dynamic process of urbanization They generate useful insights about how government policy might effectively improve the well being of rural households and promote sustainable development amid social economic and environmental changes This case study has broader implications Rural populations in the developing world are disproportionately affected by extreme climate events and climate change Furthermore the livelihoods of rural households in the developing world are increasingly under the influences of macro level forces amid urbanization and globalization This case study demonstrates that rural development policies must consider broader development dynamics at the national and even global level as well as specific local social and environmental contexts By treating climate as one of many factors that affect development in such places we can provide policy recommendations that synergistically promote development and reduce climatic impacts and therefore facilitate mainstreaming climate adaptation into development

Great Lakes Velma I. Grover, Gail Krantzberg, 2012-10-02 This edited volume while focusing on participatory governance in the Great Lakes basin of North America also gives a comparative perspective of the African Great Lakes The book describes the actions taken at degraded locations along the Great Lakes in North America through Remedial Action Plans RAP and other mechanisms with an aim to highlight the successes and failures encountered in ecosystembased regenerative approaches The book documents these experiences including the lead taken by industry in improving environmental quality of the Great Lakes The book concludes with lessons learnt about revitalizing the ecosystem integrity of the lakes which can be replicated in other watersheds of the world
