Forgasz, Joanne Rossi Becker, Kyeonghwa Lee, 2010-06-01 Why a book on gender issues in mathematics in the 21st century Several factors have influenced the undertaking of this project by the editors First an international volume focusing on gender and mathematics has not appeared since publication of papers emerging from the 1996 International Congress on Mathematical Education Keitel 1998 Surely it was time for an updated look at this critical area of mathematics education Second we have had lively discussion and working groups on gender issues at conferences of the International Group for the Psychology of Mathematics Education PME for the past four years sessions at which stimulating and ground breaking research has been discussed by participants from many different countries Some publication seemed essential to share this new knowledge emerging from a wider variety of countries and from different cultural perspectives Third some western countries such as Australia and the USA have experienced in recent years a focus on the boy problem with an underlying assumption that issues of females and mathematics have been solved and are no longer worthy of interest Thus it seemed timely to look more closely at the issue of gender and mathematics internationally When the idea for this volume first emerged invitations were issued to those regularly attending the working and discussion groups at PME Potential authors were charged to focus on gender issues in mathematics and were given wide scope to hone in on the issues that were central to their own research efforts or were in receipt or in need of close attention in their own national or regional contexts Making Teaching and Learning Matter Judith Summerfield, Cheryl C. Smith, 2010-12-09 This volume captures the spirit of collaboration and innovation that its authors bring into the classroom as well as to groundbreaking undergraduate programs and initiatives Coming from diverse points of view and twenty different disciplines the contributors illuminate the often perplexing debates about what matters most in higher education today Each chapter tells a unique story about creating vital

pedagogical arenas that have the potential to transform teaching and learning for both faculty and students These exploratory spaces include courses under construction cross college and interdisciplinary collaborations general education reform initiatives and fresh perspectives on student support services faculty development freshman learning communities writing across the curriculum on line degree initiatives and teaching and learning centers All these spaces lend shape to an over arching system wide project bringing together the often disconnected silos of undergraduate education at The City University of New York CUNY America s largest urban public university system Since 2003 the University s Office of Undergraduate Education has sponsored coordinated efforts to study and improve teaching and learning for the system s 260 000 undergraduates enrolled at 18 distinct colleges The contributors to this volume present a broad spectrum of administrative and faculty perspectives that have informed the process of transforming the undergraduate experience Combined the voices in these chapters create a much needed exploratory space for the interplay of ideas about how teaching and learning need to matter in evolving notions of higher education in the twenty first century In addition the text has wider social relevance as an in depth exploration of change and reform in a large public institution Storytelling to Accelerate Climate Solutions Emily Coren,Hua Wang,2024-05-27 The climate is changing faster than our cultural practices are adapting to it This Open Access volume co edited by Emily Coren a science communicator and Hua Wang a communication scientist presents a survey of the latest in agency focused climate storytelling Together practitioners and scholars across different fields shared their knowledge experience and insight about how stories can be designed and told to engage enable and empower individuals and communities in climate communication and action You will learn a wide range of narrative strategies and exemplary applications of climate storytelling in terms of professional practices e g education literature journalism popular media genres and formats e g drama comedy fiction media platforms e g television radio mobile and communication modalities e g text visual audio multisensory Entertainment education has been proven over decades to be an effective tool for social and behavior change in the public health sphere and has not yet been applied at scale to the massive ongoing climate related disasters that we need to solve now fast There is an urgent need to rapidly apply and adapt public engagement tools for climate communication to speed up our response times for climate change mitigation and adaptation This book takes a snapshot of where climate storytelling is currently at describes where it fits within a climate communication landscape and supports the next steps of its development It facilitates the of creation climate storytelling efficiently by sharing and amplifying what is working well and building collaborations between practitioners and researchers This is an open access book America's Competitiveness [sic] Through High School Reform United States.
