Clinical Neuropsychology Study Guide and Board Review Kirk Stucky, Michael Kirkwood, Jacobus Donders, Christine Liff, 2020-09-01 Clinical Neuropsychology Study Guide and Board Review Second Edition provides an easy to study volume with sample questions and recommended readings that are specifically designed to help individuals prepare for the ABCN written examination. In addition, this book can be used as a teaching tool for graduate students and trainees at various levels. The book is divided into three sections: Section I Foundations of Clinical Neuropsychology, Section II Fundamentals of Assessment, and Section III Disorders and Conditions. The format is geared toward exam preparation and is much less dense than a typical textbook. Information is provided in a concise, outlined manner with liberal use of bullets, boxes, illustrations, and tables that allow readers to easily review and integrate information into their already established knowledge base. To augment the study guide, a recommended readings list at the end of each chapter provides references to more comprehensive materials considered important or seminal in each topic area. Additionally, the book contains four 125-question mock exams designed to help readers study and prepare for the written exam. The answers to all questions are explained along with appropriate and supportive references. Features include detailed charts and summary tables that facilitate conceptual learning, concise coverage of pediatric, adult, and geriatric issues and conditions, emphasis on critical teaching points relevant to current neuropsychological practice, mock exam questions with answers and references at the end of every chapter relevant to the content, and four separate 125-question full-length mock exams with answers and references.

Mayo Clinic Neurology Board Review Kelly D. Flemming, 2021-10-22 The leading board review and recertification study guide, now thoroughly updated, Mayo Clinic Neurology Board Review Second Edition is designed to assist both physicians in training who are preparing for the initial American Board of Psychiatry and Neurology (ABPN) certification examination and neurologists who are preparing for recertification. Trainees and other physicians in related specialties such as psychiatry, neurosurgery, or physiatry may also find this book useful for review or in preparation for their own certification examinations. This essential guide continues to provide core knowledge of both basic and clinical aspects of neurology. It is divided into 16 subspecialty sections, each with Questions and Answers written in the style of the ABPN exam. All chapters have been extensively reviewed to ensure that they reflect the current standard of care, maintain a focus on exam preparation, and identify and highlight key pieces of information without being verbose. The emphasis is placed on clinical knowledge related to diagnostic and therapeutic approaches to patient management. The new edition is up to date and comprehensive, eliminating the need for multiple resources. Key features include streamlined content to facilitate board preparation, extensive illustrations, radiologic images, and pathologic images, high-yield facts in each chapter for quick review, a question bank of 466 questions with answer pairs to assess knowledge, focused boxes and tables for quick review.
