Molecular Microbial Ecology Manual A.D. Akkermans, Jan Dirk van Elsas, F.J. de Bruijn, 2012-12-06 For a long time microbial ecology has been developed as a distinct field with in Ecology In spite of the important role of microorganisms in the environment this group of invisible organisms remained unaccessible to other ecologists Detection and identification of microorganisms remain largely dependent on isolation techniques and characterisation of pure cultures We now realise that only a minor fraction of the microbial community can be cultivated As a result of the introduction of molecular methods microbes can now be detected and identified at the DNA RNA level in their natural environment This has opened a new field in ecology Molecular Microbial Ecology In the present manual we aim to introduce the microbial ecologist to a selected number of current molecular techniques that are relevant in microbial ecology The first edition of the manual contains 33 chapters and an equal number of additional chapters will be added this year Since the field of molecular ecology is in a continuous progress we aim to update and extend the Manual regularly and will invite anyone to deposit their new protocols in full detail in the next edition of this Manual

Food Microbiology Protocols John F. T. Spencer, Alicia L. Ragout de Spencer, 2008-02-05 Two of the recent books in the Methods in Molecular Biology series Yeast Protocols and Pichia Protocols have been narrowly focused on yeasts and in the latter case particular species of yeasts Food Microbiology Protocols of necessity covers a very wide range of microorganisms Our book treats four categories of microorganisms affecting foods 1 Spoilage organisms 2 pathogens 3 microorganisms in fermented foods and 4 microorganisms producing metabolites that affect the flavor or nutritive value of foods Detailed information is given on each of these categories There are several chapters devoted to the microorganisms associated with fermented foods these are of increasing importance in food microbiology and include one bacteriophage that kills the lactic acid bacteria involved in the manufacture of different foods cottage cheese yogurt sauerkraut and many others The other nine chapters give procedures for the maintenance of lactic acid bacteria the isolation of plasmid and genomic DNA from species of Lactobacillus determination of the proteolytic activity of lactic acid bacteria determination of bacteriocins and other important topics

William C. Copeland,2008-02-04 **Supercritical Fluid Methods and Protocols** John R. Williams,Anthony A.

Clifford,2008-02-05 Over the last 15 years there has been renewed interest in supercritical fluids owing to their unique properties and relatively low environmental impact Greatest attention has been given to the extraction and separation of organic compounds Supercritical fluids have also been successfully used for particle production as reaction media and for the destruction of toxic waste Supercritical carbon dioxide has been the most widely used supercritical fluid mainly because it is cheap relatively nontoxic and has convenient critical values Supercritical fluids have also been used on analytical and preparative scales for many biological and other applications Many papers have been published on the use of supercritical fluids However few have acted as a detailed instruction manual for those wanting to use the techniques for the first time We anticipate that this Methods in Biotechnology volume Supercritical Fluid Methods and Protocols will satisfy the need for such a book Every chapter has been written by experienced workers and should if closely followed enable workers with some or no previous experience of supercritical fluids to conduct experiments successfully at the first attempt The Journal of NIH Research ,1994

Interaction of Mycophenolic Acid and Pantoprazole Olesja Rissling, 2017-11-01 Olesja Rissling analyzes the potential interaction of mycophenolic acid MPA and pantoprazole MPA is used as an immunosuppressive drug to prevent acute organ rejections after organ transplantation Pantoprazole known to interact with the bioavailability of drugs is used to prevent upper gastrointestinal disorders The author performed a clinical pharmacokinetic study in renal transplant patients to evaluate a potential interaction of MPA and pantoprazole The bioavailability and the maximum concentration of MPA were determined with or without pantoprazole intake An influence on the immunosuppressive effect was evaluated by measuring the target enzyme activity Overall no significant change in the bioavailability or the maximum concentration was found Similar results were obtained for the target enzyme activity after pantoprazole intake with MPA The results suggest that the interaction of pantoprazole with MPA does not compromise the immunosuppressive effect to a clinically meaningful extent
