The Unschooled

Mind Howard Gardner, 2011-03-29 I like to invoke the image of figure and ground. In any scene, certain elements stand out as figures as dominant foci against a less prominent background which ideally supports the central figure. At present, test scores and rankings have become figures so dominant that they virtually occlude everything else. In my preferred portrait of education, a well-schooled mind becomes the central figure: a mind that truly understands disciplinary ways of thinking and one that also encourages respectful and ethical behavior. All the rest, including the instruments of accountability, should be in the background, providing support for that central, powerful image. Why the current ideal of school focuses so much on a certain view of knowledge transmitted in a certain way and documented in a certain way is a question for historians and policy makers. That it has taken this turn is a source of regret to those of us who harbor a different view of knowledge and education. From the introduction by the author, p. xxviii.
