Robb, Anita Rogers, 2004-03-01 Communication and relationships have become an increasing focus of attention in debates about the future of health and social care. People working in care services are being encouraged to improve communication processes to develop more participatory relationships with service users and to work more closely in partnership with other professionals. This Reader provides a comprehensive collection of literature that aims to enable those involved in care services as workers, carers or service users to reflect on their everyday interactions and to situate them in wider contexts. Including new material from the frontline of research and practice as well as some classic readings, this wide-ranging volume emphasises the need to see interpersonal communication as embedded in relationships and to take account of issues of power and diversity as well as the emotional dimension of care work. Covering both health and social care, the Reader is divided into four sections focusing on concepts and contexts, analysing aspects of communication, the person in the process, communication and relationships in organisations. Communication, Relationships and Care will be an essential resource for students of social work, nursing, health and social policy and for all involved in health and social care services, whether as professionals, carers or service users. It is a set book for the Open University's second-level undergraduate course, Communication and Relationships in Health and Social Care K205. Health and Social Care (Adults) Yvonne Nolan, 2005

This handbook provides comprehensive coverage of everything candidates need for success in this new qualification in health and social care. **Effective Practice Learning in Social Work** Jonathan Parker, 2010-06-01 The Department of Health

requires students on the social work degree to undertake at least 200 days in direct practice learning during their course. Practice learning often raises great anxieties for students, agencies and those who supervise and assess it. This book tackles those anxieties, explaining the ways the experience can deliver a unique learning opportunity for the student. It is ideal for students undertaking or about to undertake practice learning, student supervisors and practice assessors as well as trainers and policymakers within social care agencies and healthcare professions where practice learning is also undertaken.

Communication and Mental Illness Jenny France, Sarah Kramer, 2001-01-15 This book is for improving understanding of individuals with mental illness. It offers theoretical knowledge of the methods of communication commonly adopted by individuals with a variety of diagnoses of mental illness and how information about communication can influence service provision, ending with suggestions for future policy and practice. *S/NVQ Level 2 Health and Social Care* Yvonne
