informative and constructive **Conditional Democracy** Émilie Frenkiel, 2015-03-01 Little is known about the political views of non dissident Chinese intellectuals For this book milie Frenkiel has been granted unprecedented access to the discussions of politically committed Chinese who have been part of the intellectual debate on post Tiananmen reform Her in depth research elicits lively views that reflect the yearnings and fears of the country s political elite and reveal the diversity of approaches to China s democratisation Judicial Politics and International Cooperation Arlo Poletti, Dirk De Bièvre, 2024-08-22 Judicial politics has emerged as a central feature of the multilateral trading system alongside a steep decline in the World Trade Organization s ability to deliver negotiated trade liberalization This book advances innovative arguments and presents original evidence to shed light on the important and surprisingly under researched question of whether and how judicial politics has affected the prospects for cooperation in the WTO through multilateral trade rounds

A Responsive Technocracy? Christian Rauh, 2016-10-21 This book challenges the common image of the European Commission as an insulated technocracy immune to political pressures Based on an innovative combination of public opinion protest and media data it first demonstrates that European integration has become increasingly politicised since the 1990s Against this background the Commission is now much more concerned about the public appeal of its policies That however challenges and contradicts the well worn patterns of supranational regulation in Europe Rauh systematically compares 17 legislative drafting processes in consumer policy between 1999 and 2009 Based on first hand insider accounts of involved officials his analysis indicates that the Commission s policy choices indeed become more consumer friendly under higher levels of public awareness While this improves the democratic quality of European decision making the book also reveals an enhanced conflict potential within the Commission and beyond which threatens to undermine the efficiency of legislative decision making in the EU Policy Making in an Independent Judiciary Gunnar Grendstad, William R Shaffer, Eric Waltenburg, 2024-08-22 How do the justices of a nation s highest court arrive at their decisions In the context of the US Supreme Court the answer to this question is well established justices seek to enshrine policy preferences in their decisions but they do so in a manner consistent with the law and in recognition that they are members of an institution with defined expectations and constraints In other words a justice s behaviour is a function of motives means and opportunities Using Norway as a case study this book shows that these forces are not peculiar to the decisional behaviour of American justices Employing a modified attitudinal model Grendstad Shaffer and Waltenburg establish that the preferences of Norway s justices are related to their decisions Consequently the authors show how an understanding of judicial behaviour developed and most fully tested in the American judicial system is transportable to the courts of other countries Middle Powers in Global Governance Emel Parlar Dal, 2018-05-01 This volume summarizes synthesizes updates and contextualizes Turkey s multiple roles in global governance As a result of various political economic cultural and technological changes occurring in the international system the need for an effective and appropriate global governance is unfolding In such an environment

Turkey's and other rising middle powers initiatives appear to be indispensable for rendering the existing global governance mechanisms more functional and effective. The authors contribute to the assessment of changing global governance practices of secondary and or middle power states with a special focus on Turkey's multiple roles and issue based global governance policies.

Coping with Complexity Dani Marinova, 2016-07-31 When parties undergo abrupt organisational changes between elections such as when they fuse split join or abandon party lists they alter profoundly the organisation and supply of electoral information to voters. The alternatives on the ballot are no longer fixed but need to be actively sought out instead. This book examines how voters cope with the complexity triggered by party instability. Breaking with previous literature it suggests that voters are versatile and ingenious decision makers. They adapt to informational complexity with a set of cognitively less costly heuristics uniquely suited to the challenges they face. A closer look at the impact of party instability on the vote advances and qualifies quintessential theories of vote choice including proximity voting direction intensity appeals economic voting and the use of cognitive heuristics. The rich and nuanced findings illustrate that political parties hold a key to understanding voter behaviour and representation in modern democracy.
