**R Barnett**

## **Denis Wood Everything Sings 2nd Revised Edition Maps For A Narrative Atlas:**

**Deep Mapping** Les Roberts, 2018-10-01 This book is a printed edition of the Special Issue Deep Mapping that was published in Humanities **The Center of the World** June Howard, 2018-10-25 Regional Writing and the Puzzles of Place Time is a study of literary regionalism It focuses on the fiction of the United States and considers the place of the genre in world literature Regionalism is usually understood to be a literature bound to the local but this study explores how regional writing shapes ways of imagining not only the neighborhood or the province but also the nation and ultimately the world Its key premise is that thinking about place always entails imagining time It analyzes how concepts crystallize across disciplines and in everyday discourse and proposes ways of revising American literary history and close readings of particular authors work It demonstrates for example the importance of the figure of the school teacher and the one room schoolhouse in local color and subsequent place focused writing Such representations embody the contested relation in modernity between localities and the knowledge they produce and books that carry metropolitan and cosmopolitan learning The volume discusses fiction from the nineteenth twentieth and twenty first centuries including works by Sui Sin Far Edith Eaton Sarah Orne Jewett Ernest Gaines Wendell Berry and Ursula LeGuin as well as romance novels and regional mysteries **Mirror of the World** Meg Roland, 2021-07-28 In the late fifteenth century the production of print editions of Claudius Ptolemy s second century Geography sparked one of the most significant intellectual developments of the era the production of mathematically based north oriented maps The production of world maps in England however was notably absent during this Ptolemaic revival As a result the impact of Ptolemy s text on English geographical thought has been obscured and minimized with scholars speculating a possible English indifference to or isolation from European geographic developments Tracing English geographical thought through the material culture of literary and popular texts this study provides evidence for the reception and transmission of Ptolemaic based geography in England during a critical period of geographic innovation and synthesis one that laid the foundation for modern geographical representation With evidence from prose romance book illustration theatrical performance cosmological ceilings and almanacs Mirror of the World proposes a new interdisciplinary literary and cartographic history of the influence of Ptolemaic geography in England one that reveals the lively integration of geographic concepts through narrative and non cartographic visual forms **Operative Mapping** Roger Paez, 2024-01-22 Operative Mapping investigates the use of maps as a design tool providing insight with the potential to benefit education and practice in the design disciplines The book s fundamental aim is to offer a methodological contribution to the design disciplines both in conceptual and instrumental terms When added to the resources of contemporary design operative mapping overcomes the analytical and strictly instrumental approaches of maps opening up the possibility of working both pragmatically and critically by acknowledging the need for an effective transformation of the milieu based on an understanding of pre existing conditions The approach is pragmatic not only discussing the present but above all generating a toolbox to help expand on

the objectives methodologies and formats of design in the immediate future The book joins together a review of the theoretical body of work on mapping from the social sciences with case studies from the past 30 years in architecture planning and landscape design in the interest of linking past practices with future ones **Inefficient Mapping** Linda Knight, 2021 Working from a speculative more than human ontological position *Inefficient Mapping A Protocol for Attuning to Phenomena* presents a new experimental cartographic practice and non representational methodological protocol that attunes to the subaltern genealogies of sites and places proposing a wayfaring practice for traversing the land founded on an ethics of care As a methodological protocol inefficient mapping inscribes the histories and politics of a place by gesturally marking affective and relational imprints of colonisation industrialisation appropriation histories futures exclusions privileges neglect survival and persistence *Inefficient Mapping* details a research experiment and is designed to be taken out on mapping expeditions to be referred to consulted with and experimented with by those who are familiar or new to mapping The inefficient mapping protocol described in this book is informed by feminist speculative and immanent theories including posthuman theories critical cultural theories Indigenous and critical place inquiry as well as the works of Karen Barad Erin Manning Jane Bennett Maria Puig de la Bellacassa Elizabeth Povinelli and Eve Tuck and Marcia McKenzie which frame how inefficient mapping attunes to the matter tenses and ontologies of phenomena and how the interweaving agglomerations of theory critique and practice can remain embedded in experimental methodologies Publisher's website **The North Carolina Historical Review**, 2014
