Dependence Modeling Vine Copula Handbook:

Dependence Modeling Harry Joe, Dorota Kurowicka, 2011 1 Introduction Dependence modeling D Kurowicka 2 Multivariate copulae M Fischer 3 Vines arise R M Cooke H Joe and K Aas 4 Sampling count variables with specified Pearson correlation A comparison between a naive and a C vine sampling approach V Erhardt and C Czado 5 Micro correlations and tail dependence R M Cooke C Kousky and H Joe 6 The Copula information criterion and Its implications for the maximum pseudo likelihood estimator S Gronneberg 7 Dependence comparisons of vine copulae with four or more variables H Joe 8 Tail dependence in vine copulae H Joe 9 Counting vines O Morales Napoles 10 Regular vines Generation algorithm and number of equivalence classes H Joe R M Cooke and D Kurowicka 11 Optimal truncation of vines D Kurowicka 12 Bayesian inference for D vines Estimation and model selection C Czado and A Min 13 Analysis of Australian electricity loads using joint Bayesian inference of D vines with autoregressive margins C Czado F Gartner and A Min 14 Non parametric Bayesian belief nets versus vines A Hanea 15 Modeling dependence between financial returns using pair copula constructions K Aas and D Berg 16 Dynamic D vine model A Heinen and A Valdesogo 17 Summary and future directions D Kurowicka

Dependence Modeling with Copulas Harry Joe, 2014-06-26 Dependence Modeling with Copulas covers the substantial advances that have taken place in the field during the last 15 years including vine copula modeling of high dimensional data Vine copula models are constructed from a sequence of bivariate copulas The book develops generalizations of vine copula models including common and structured factor models that extend from the Gaussian assumption to copulas It also discusses other multivariate constructions and parametric copula families that have different tail properties and presents extensive material on dependence and tail properties to assist in copula model selection The author shows how numerical methods and algorithms for inference and simulation are important in high dimensional copula applications He presents the algorithms as pseudocode illustrating their implementation for high dimensional copula models He also incorporates results to determine dependence and tail properties of multivariate distributions for future constructions of copula models

Copula Theory and Its Applications Piotr Jaworski, Fabrizio Durante, Wolfgang Karl Härdle, Tomasz Rychlik, 2010-07-16 Copulas are mathematical objects that fully capture the dependence structure among random variables and hence offer great flexibility in building multivariate stochastic models Since their introduction in the early 50 s copulas have gained considerable popularity in several fields of applied mathematics such as finance insurance and reliability theory Today they represent a well recognized tool for market and credit models aggregation of risks portfolio selection etc This book is divided into two main parts Part I Surveys contains 11 chapters that provide an up to date account of essential aspects of copula models Part II Contributions collects the extended versions of 6 talks selected from papers presented at the workshop in Warsaw

R In Finance And Economics: A Beginner's Guide Abhay Kumar Singh, David Edmund Allen, 2016-12-14 This book provides an introduction to the statistical software R and its application with an empirical approach in finance and economics It is specifically targeted

towards undergraduate and graduate students It provides beginner level introduction to R using RStudio and reproducible research examples It will enable students to use R for data cleaning data visualization and quantitative model building using statistical methods like linear regression econometrics GARCH etc Copulas etc Moreover the book demonstrates latest research methods with applications featuring linear regression quantile regression panel regression econometrics dependence modelling etc using a range of data sets and examples

2014 International Conference on Economics and Management (ICEM2014). ,2014-02-04 ICEM2014 is to offer scholars professionals academics and graduate students to present share and discuss their studies from various perspectives in the aspects of social science The ICEM2014 is hosted by Advance Information Science Research Center and is sponsored by DEStech Publication Inc South China University of Technology Guangdong University of Foreign Studies This proceedings tends to collect the up to date comprehensive and worldwide state of art knowledge on economics and management All of accepted papers were subjected to strict peer reviewing by 24 expert referees The papers have been selected for this proceedings based on originality significance and clarity for the purpose of the conference The selected papers and additional late breaking contributions to be presented will make an exciting technical program on conference The conference program is extremely rich featuring high impact presentation We hope this conference will not only provide the participants a broad overview of the latest research results on economics and management but also provide the participants a significant platform to build academic connections ICEM2014 would like to express our sincere appreciations to all authors for their contributions to this conference We would like to extend our thanks to all the referees for their constructive comments on all papers especially we would like to thank to organizing committee for their hard working

Introduction to Bayesian Estimation and Copula Models of Dependence
Arkady Shemyakin,Alexander Kniazev,2017-03-20 Presents an introduction to Bayesian statistics presents an emphasis on Bayesian methods prior and posterior Bayes estimation prediction MCMC Bayesian regression and Bayesian analysis of statistical modelsof dependence and features a focus on copulas for risk management Introduction to Bayesian Estimation and Copula Models of Dependence emphasizes the applications of Bayesian analysis to copula modeling and equips readers with the tools needed to implement the procedures of Bayesian estimation in copula models of dependence This book is structured in two parts the first four chapters serve as a general introduction to Bayesian statistics with a clear emphasis on parametric estimation and the following four chapters stress statistical models of dependence with a focus of copulas A review of the main concepts is discussed along with the basics of Bayesian statistics including prior information and experimental data prior and posterior distributions with an emphasis on Bayesian parametric estimation The basic mathematical background of both Markov chains and Monte Carlo integration and simulation is also provided The authors discuss statistical models of dependence with a focus on copulas and present a brief survey of pre copula dependence models The main definitions and notations of copula models are summarized followed by discussions of real world cases that address

particular risk management problems In addition this book includes Practical examples of copulas in use including within the Basel Accord II documents that regulate the world banking system as well as examples of Bayesian methods within current FDA recommendations Step by step procedures of multivariate data analysis and copula modeling allowing readers to gain insight for their own applied research and studies Separate reference lists within each chapter and end of the chapter exercises within Chapters 2 through 8 A companion website containing appendices data files and demo files in Microsoft Office Excel basic code in R and selected exercise solutions Introduction to Bayesian Estimation and Copula Models of Dependence is a reference and resource for statisticians who need to learn formal Bayesian analysis as well as professionals within analytical and risk management departments of banks and insurance companies who are involved in quantitative analysis and forecasting This book can also be used as a textbook for upper undergraduate and graduate level courses in Bayesian statistics and analysis

ARKADY SHEMYAKIN PhD is Professor in the Department of Mathematics and Director of the Statistics Program at the University of St Thomas A member of the American Statistical Association and the International Society for Bayesian Analysis Dr Shemyakin s research interests include information theory Bayesian methods of parametric estimation and copula models in actuarial mathematics finance and engineering

ALEXANDER KNIAZEV PhD is Associate Professor and Head of the Department of Mathematics at Astrakhan State University in Russia Dr Kniazev s research interests include representation theory of Lie algebras and finite groups mathematical statistics econometrics and financial mathematics

Analyzing Dependent Data with Vine Copulas Claudia Czado, 2019-05-14 This textbook provides a step by step introduction to the class of vine copulas their statistical inference and applications It focuses on statistical estimation and selection methods for vine copulas in data applications These flexible copula models can successfully accommodate any form of tail dependence and are vital to many applications in finance insurance hydrology marketing engineering chemistry aviation climatology and health The book explains the pair copula construction principles underlying these statistical models and discusses how to perform model selection and inference It also derives simulation algorithms and presents real world examples to illustrate the methodological concepts The book includes numerous exercises that facilitate and deepen readers understanding and demonstrates how the R package VineCopula can be used to explore and build statistical dependence models from scratch In closing the book provides insights into recent developments and open research questions in vine copula based modeling The book is intended for students as well as statisticians data analysts and any other quantitatively oriented researchers who are new to the field of vine copulas Accordingly it provides the necessary background in multivariate statistics and copula theory for exploratory data tools so that readers only need a basic grasp of statistics and probability

Copulae in Mathematical and Quantitative Finance Piotr Jaworski, Fabrizio Durante, Wolfgang Karl Härdle, 2013-06-18 Copulas are mathematical objects that fully capture the dependence structure among random variables and hence offer great flexibility in building multivariate stochastic models Since their introduction in the early 1950s copulas

have gained considerable popularity in several fields of applied mathematics especially finance and insurance Today copulas represent a well recognized tool for market and credit models aggregation of risks and portfolio selection Historically the Gaussian copula model has been one of the most common models in credit risk However the recent financial crisis has underlined its limitations and drawbacks In fact despite their simplicity Gaussian copula models severely underestimate the risk of the occurrence of joint extreme events Recent theoretical investigations have put new tools for detecting and estimating dependence and risk like tail dependence time varying models etc in the spotlight All such investigations need to be further developed and promoted a goal this book pursues The book includes surveys that provide an up to date account of essential aspects of copula models in quantitative finance as well as the extended versions of talks selected from papers presented at the workshop in Cracow

Handbook of Probabilistic Models Pijush Samui, Dieu Tien Bui, Subrata Chakraborty, Ravinesh Deo, 2019-10-05 Handbook of Probabilistic Models carefully examines the application of advanced probabilistic models in conventional engineering fields In this comprehensive handbook practitioners researchers and scientists will find detailed explanations of technical concepts applications of the proposed methods and the respective scientific approaches needed to solve the problem This book provides an interdisciplinary approach that creates advanced probabilistic models for engineering fields ranging from conventional fields of mechanical engineering and civil engineering to electronics electrical earth sciences climate agriculture water resource mathematical sciences and computer sciences Specific topics covered include minimax probability machine regression stochastic finite element method relevance vector machine logistic regression Monte Carlo simulations random matrix Gaussian process regression Kalman filter stochastic optimization maximum likelihood Bayesian inference Bayesian update kriging copula statistical models and more Explains the application of advanced probabilistic models encompassing multidisciplinary research Applies probabilistic modeling to emerging areas in engineering Provides an interdisciplinary approach to probabilistic models and their applications thus solving a wide range of practical problems

Quantitative Methods for Economics and Finance J.E. Trinidad-Segovia, Miguel Ángel Sánchez-Granero, 2021-02-12 This book is a collection of papers for the Special Issue Quantitative Methods for Economics and Finance of the journal Mathematics This Special Issue reflects on the latest developments in different fields of economics and finance where mathematics plays a significant role The book gathers 19 papers on topics such as volatility clusters and volatility dynamic forecasting stocks indexes cryptocurrencies and commodities trade agreements the relationship between volume and price trading strategies efficiency regression utility models fraud prediction or intertemporal choice

[Simulating Copulas: Stochastic Models, Sampling Algorithms, And Applications \(Second Edition\)](#) Jan-frederik Mai, Matthias Scherer, 2017-06-07 The book remains a valuable tool both for statisticians who are already familiar with the theory of copulas and just need to develop sampling algorithms and for practitioners who want to learn copulas and implement the simulation techniques needed to exploit the potential of copulas

in applications Mathematical Reviews The book provides the background on simulating copulas and multivariate distributions in general It unifies the scattered literature on the simulation of various families of copulas elliptical Archimedean Marshall Olkin type etc as well as on different construction principles factor models pair copula construction etc The book is self contained and unified in presentation and can be used as a textbook for graduate and advanced undergraduate students with a firm background in stochastics Besides the theoretical foundation ready to implement algorithms and many examples make the book a valuable tool for anyone who is applying the methodology *Simulating Copulas* Jan-Frederik Mai, Matthias Scherer, 2012 This book provides the reader with a background on simulating copulas and multivariate distributions in general It unifies the scattered literature on the simulation of various families of copulas elliptical Archimedean Marshall Olkin type etc as well as on different construction principles factor models pair copula construction etc The book is self contained and unified in presentation and can be used as a textbook for advanced undergraduate or graduate students with a firm background in stochastics Alongside the theoretical foundation ready to implement algorithms and many examples make this book a valuable tool for anyone who is applying the methodology Errata s Errata 128 KB

Risk - A Multidisciplinary Introduction Claudia Klüppelberg, Daniel Straub, Isabell M. Welp, 2014-06-10 This is a unique book addressing the integration of risk methodology from various fields It will stimulate intellectual debate and communication across disciplines promote better risk management practices and contribute to the development of risk management methodologies Individual chapters explain fundamental risk models and measurement and address risk and security issues from diverse areas such as finance and insurance the health sciences life sciences engineering and information science Integrated Risk Sciences is an emerging discipline that considers risks in different fields aiming at a common language and at sharing and improving methods developed in different fields Readers should have a Bachelor degree and have taken at least one basic university course in statistics and probability The main goal of the book is to provide basic knowledge on risk and security in a common language the authors have taken particular care to ensure that all content can readily be understood by doctoral students and researchers across disciplines Each chapter provides simple case studies and examples open research questions and discussion points and a selected bibliography inviting readers to further study

Tropical Ecosystems in the 21st Century, 2020-03-18 Advances in Ecological Research Volume 62 the latest release in this ongoing series covers a long list of topics including Monitoring tropical insects in the 21st Century The distribution and structure of long term and large scale fire manipulation experiments The Agua Salud Project Basic and applied research informing management of tropical landscapes for the 21st century Conservation strategies and principles for tropical forests Assessing forest quality using satellite remote sensing data A test case using the Sabah Biodiversity Experiment eDNA approaches to understand the current state and future of biodiversity of the Amazonian biome pitfalls improvements and challenges and much more Provides information that relates to a thorough understanding of the field of ecology Deals with topical and important

reviews on the physiologies populations and communities of plants and animals Random Fields for Spatial Data Modeling
Dionissios T. Hristopulos, 2020-02-17 This book provides an inter disciplinary introduction to the theory of random fields and its applications Spatial models and spatial data analysis are integral parts of many scientific and engineering disciplines Random fields provide a general theoretical framework for the development of spatial models and their applications in data analysis The contents of the book include topics from classical statistics and random field theory regression models Gaussian random fields stationarity correlation functions spatial statistics variogram estimation model inference kriging based prediction and statistical physics fractals Ising model simulated annealing maximum entropy functional integral representations perturbation and variational methods The book also explores links between random fields Gaussian processes and neural networks used in machine learning Connections with applied mathematics are highlighted by means of models based on stochastic partial differential equations An interlude on autoregressive time series provides useful lower dimensional analogies and a connection with the classical linear harmonic oscillator Other chapters focus on non Gaussian random fields and stochastic simulation methods The book also presents results based on the author s research on Spartan random fields that were inspired by statistical field theories originating in physics The equivalence of the one dimensional Spartan random field model with the classical linear damped harmonic oscillator driven by white noise is highlighted Ideas with potentially significant computational gains for the processing of big spatial data are presented and discussed The final chapter concludes with a description of the Karhunen Lo ve expansion of the Spartan model The book will appeal to engineers physicists and geoscientists whose research involves spatial models or spatial data analysis Anyone with background in probability and statistics can read at least parts of the book Some chapters will be easier to understand by readers familiar with differential equations and Fourier transforms Financial Engineering with Copulas Explained J. Mai, M. Scherer, 2014-10-02 This is a succinct guide to the application and modelling of dependence models or copulas in the financial markets First applied to credit risk modelling copulas are now widely used across a range of derivatives transactions asset pricing techniques and risk models and are a core part of the financial engineer s toolkit *Digital Human Modeling and Medicine* Gunther Paul, Mohamed H. Doweidar, 2022-12-04 Digital Human Modeling and Medicine The Digital Twin explores the body of knowledge and state of the art in Digital Human Modeling DHM and its applications in medicine DHM is the science of representing humans with their physical properties characteristics and behaviors in computerized virtual models These models can be used standalone or integrated with other computerized object design systems to both design or study designs of medical devices or medical device products and their relationship with humans They serve as fast and cost efficient computer based tools for the assessment of human functional systems and human system interaction This book provides an industry first introductory and practitioner focused overview of human simulation tools with detailed chapters describing body functional elements and organs organ interactions and fields of application Thus DHM

tools and a specific scientific practical problem functional study of the human body are linked in a coherent framework Eventually the book shows how DHM interfaces with common physical devices in medical practice answering to a gap in literature and a common practitioner question Case studies provide the applied knowledge for practitioners to make informed decisions A non specialist level up to date overview and introduction to all medically relevant DHM systems to inform trialing procurement decisions and initial application Includes user level examples and case studies of DHM applications in various medical fields Clearly structured and focused compendium that is easy to access read and understand

Dependence Modeling with Copulas Harry Joe, 2014-06-26 Dependence Modeling with Copulas covers the substantial advances that have taken place in the field during the last 15 years including vine copula modeling of high dimensional data Vine copula models are constructed from a sequence of bivariate copulas The book develops generalizations of vine copula models including common and structured factors

Statistical Postprocessing of Ensemble Forecasts Stéphane Vannitsem, Daniel S. Wilks, Jakob Messner, 2018-05-17 Statistical Postprocessing of Ensemble Forecasts brings together chapters contributed by international subject matter experts describing the current state of the art in the statistical postprocessing of ensemble forecasts The book illustrates the use of these methods in several important applications including weather hydrological and climate forecasts and renewable energy forecasting After an introductory section on ensemble forecasts and prediction systems the second section of the book is devoted to exposition of the methods available for statistical postprocessing of ensemble forecasts univariate and multivariate ensemble postprocessing are first reviewed by Wilks Chapters 3 then Schefzik and Müller Chapter 4 and the more specialized perspective necessary for postprocessing forecasts for extremes is presented by Friederichs Wahl and Buschow Chapter 5 The second section concludes with a discussion of forecast verification methods devised specifically for evaluation of ensemble forecasts Chapter 6 by Thorarinsdottir and Schuhen The third section of this book is devoted to applications of ensemble postprocessing Practical aspects of ensemble postprocessing are first detailed in Chapter 7 Hamill including an extended and illustrative case study Chapters 8 Hemri 9 Pinson and Messner and 10 Van Schaeybroeck and Vannitsem discuss ensemble postprocessing specifically for hydrological applications postprocessing in support of renewable energy applications and postprocessing of long range forecasts from months to decades Finally Chapter 11 Messner provides a guide to the ensemble postprocessing software available in the R programming language which should greatly help readers implement many of the ideas presented in this book Edited by three experts with strong and complementary expertise in statistical postprocessing of ensemble forecasts this book assesses the new and rapidly developing field of ensemble forecast postprocessing as an extension of the use of statistical corrections to traditional deterministic forecasts Statistical Postprocessing of Ensemble Forecasts is an essential resource for researchers operational practitioners and students in weather seasonal and climate forecasting as well as users of such forecasts in fields involving renewable energy conventional energy hydrology environmental engineering and

agriculture Consolidates for the first time the methodologies and applications of ensemble forecasts in one succinct place
Provides real world examples of methods used to formulate forecasts Presents the tools needed to make the best use of
multiple model forecasts in a timely and efficient manner

Structural Changes and their Econometric Modeling

Vladik Kreinovich, Songsak Sriboonchitta, 2018-11-24 This book focuses on structural changes and economic modeling It
presents papers describing how to model structural changes as well as those introducing improvements to the existing before
structural changes models making it easier to later on combine these models with techniques describing structural changes
The book also includes related theoretical developments and practical applications of the resulting techniques to economic
problems Most traditional mathematical models of economic processes describe how the corresponding quantities change
with time However in addition to such relatively smooth numerical changes economical phenomena often undergo more
drastic structural change Describing such structural changes is not easy but it is vital if we want to have a more adequate
description of economic phenomena and thus more accurate and more reliable predictions and a better understanding on
how best to influence the economic situation

Enjoying the Tune of Term: An Mental Symphony within **Dependence Modeling Vine Copula Handbook**

In a world taken by displays and the ceaseless chatter of quick interaction, the melodic splendor and emotional symphony created by the prepared term usually diminish into the background, eclipsed by the persistent sound and disturbances that permeate our lives. However, nestled within the pages of **Dependence Modeling Vine Copula Handbook** an enchanting fictional value brimming with fresh feelings, lies an immersive symphony waiting to be embraced. Crafted by a wonderful musician of language, this fascinating masterpiece conducts readers on a psychological trip, skillfully unraveling the hidden tunes and profound impact resonating within each cautiously constructed phrase. Within the depths with this poignant analysis, we shall examine the book is main harmonies, analyze its enthralling writing design, and submit ourselves to the profound resonance that echoes in the depths of readers souls.

Dependence Modeling Vine Copula Handbook Introduction

In the digital age, access to information has become easier than ever before. The ability to download Dependence Modeling Vine Copula Handbook has revolutionized the way we consume written content. Whether you are a student looking for course material, an avid reader searching for your next favorite book, or a professional seeking research papers, the option to download Dependence Modeling Vine Copula Handbook has opened up a world of possibilities. Downloading Dependence Modeling Vine Copula Handbook provides numerous advantages over physical copies of books and documents. Firstly, it is incredibly convenient. Gone are the days of carrying around heavy textbooks or bulky folders filled with papers. With the click of a button, you can gain immediate access to valuable resources on any device. This convenience allows for efficient studying, researching, and reading on the go. Moreover, the cost-effective nature of downloading Dependence Modeling Vine Copula Handbook has democratized knowledge. Traditional books and academic journals can be expensive, making it difficult for individuals with limited financial resources to access information. By offering free PDF downloads, publishers and authors are enabling a wider audience to benefit from their work. This inclusivity promotes equal opportunities for learning and personal growth. There are numerous websites and platforms where individuals can download Dependence Modeling Vine Copula Handbook. These websites range from academic databases offering research papers and journals to online libraries with an expansive collection of books from various genres. Many authors and publishers also upload their work to specific websites, granting readers access to their content without any charge. These platforms not only provide access to existing literature but also serve as an excellent platform for undiscovered authors to share their work with the world. However, it is essential to be cautious while downloading Dependence Modeling Vine Copula Handbook. Some websites may offer pirated or illegally obtained copies of copyrighted material. Engaging in such activities not only violates copyright laws but also undermines the efforts of authors, publishers, and researchers. To ensure ethical downloading, it is advisable to utilize reputable websites that prioritize the legal distribution of content. When downloading Dependence Modeling Vine Copula Handbook, users should also consider the potential security risks associated with online platforms. Malicious actors may

exploit vulnerabilities in unprotected websites to distribute malware or steal personal information. To protect themselves, individuals should ensure their devices have reliable antivirus software installed and validate the legitimacy of the websites they are downloading from. In conclusion, the ability to download Dependence Modeling Vine Copula Handbook has transformed the way we access information. With the convenience, cost-effectiveness, and accessibility it offers, free PDF downloads have become a popular choice for students, researchers, and book lovers worldwide. However, it is crucial to engage in ethical downloading practices and prioritize personal security when utilizing online platforms. By doing so, individuals can make the most of the vast array of free PDF resources available and embark on a journey of continuous learning and intellectual growth.

FAQs About Dependence Modeling Vine Copula Handbook Books

1. Where can I buy Dependence Modeling Vine Copula Handbook books? Bookstores: Physical bookstores like Barnes & Noble, Waterstones, and independent local stores. Online Retailers: Amazon, Book Depository, and various online bookstores offer a wide range of books in physical and digital formats.
2. What are the different book formats available? Hardcover: Sturdy and durable, usually more expensive. Paperback: Cheaper, lighter, and more portable than hardcovers. E-books: Digital books available for e-readers like Kindle or software like Apple Books, Kindle, and Google Play Books.
3. How do I choose a Dependence Modeling Vine Copula Handbook book to read? Genres: Consider the genre you enjoy (fiction, non-fiction, mystery, sci-fi, etc.). Recommendations: Ask friends, join book clubs, or explore online reviews and recommendations. Author: If you like a particular author, you might enjoy more of their work.
4. How do I take care of Dependence Modeling Vine Copula Handbook books? Storage: Keep them away from direct sunlight and in a dry environment. Handling: Avoid folding pages, use bookmarks, and handle them with clean hands. Cleaning: Gently dust the covers and pages occasionally.
5. Can I borrow books without buying them? Public Libraries: Local libraries offer a wide range of books for borrowing. Book Swaps: Community book exchanges or online platforms where people exchange books.
6. How can I track my reading progress or manage my book collection? Book Tracking Apps: Goodreads, LibraryThing, and Book Catalogue are popular apps for tracking your reading progress and managing book collections. Spreadsheets: You can create your own spreadsheet to track books read, ratings, and other details.
7. What are Dependence Modeling Vine Copula Handbook audiobooks, and where can I find them? Audiobooks: Audio

recordings of books, perfect for listening while commuting or multitasking. Platforms: Audible, LibriVox, and Google Play Books offer a wide selection of audiobooks.

8. How do I support authors or the book industry? Buy Books: Purchase books from authors or independent bookstores. Reviews: Leave reviews on platforms like Goodreads or Amazon. Promotion: Share your favorite books on social media or recommend them to friends.
9. Are there book clubs or reading communities I can join? Local Clubs: Check for local book clubs in libraries or community centers. Online Communities: Platforms like Goodreads have virtual book clubs and discussion groups.
10. Can I read Dependence Modeling Vine Copula Handbook books for free? Public Domain Books: Many classic books are available for free as they're in the public domain. Free E-books: Some websites offer free e-books legally, like Project Gutenberg or Open Library.
