## **Dependent Development The Alliance Of Multinational State And Local Capital In Brazil:**

**Dependent Development** Peter B. Evans, 2018-06-05 In order to analyze Brazil's recent accumulation of capital in the light of its continued dependence Peter Evans focuses on the relationships among multinational corporations, local private entrepreneurs, and state-owned enterprises that have developed in Brazil over the last decade. He argues that while relations among the three kinds of capital continue to be contradictory, a triple alliance has been formed that provides the social structural basis for the pattern of local industrialization that has emerged. The author begins with a review of the theories of imperialism and dependency in the third world. Placing the Brazilian experience of the last twenty years in its historical context, he traces the country's evolution from the period of classic dependence at the turn of the century to the current stage of dependent development. In conclusion, Professor Evans discusses the implications of the Brazilian model for other third world countries. Examining the nature of the triple alliance as it is manifested in such industries as pharmaceuticals, textiles, and petrochemicals, the author reveals the complex differentiation of the groups' roles in industrialization and lays bare the grounds for their collaboration and their conflict. He consequently shows how the differing interests, power, and capabilities of the three groups have combined to produce a system promoting industrialization that benefits the elite partnership but excludes the larger population from the rewards of growth.

### **Dependency and Socialism in the Modern Caribbean**

Euclid A. Rose, 2002-01-01 Was the Anglophone Caribbean condemned by its colonial history to permanent conditions of dependency and by Cold War geopolitical realities to international interventionism? In *Dependency and Socialism in the Modern Caribbean*, Euclid Rose focuses upon the efforts made by the English-speaking Caribbean through case studies that compare and contrast the political economies of Guyana, Jamaica, and Grenada to break out of the legacy of colonial dependency and underdevelopment through the implementation of a Caribbean brand of socialism. The work considers the Caribbean's adoption of Fabian-style socialism as an alternative to capitalist development and how these socialist policies were impacted by differences in infrastructure, capacity, economic and social resources, and political agendas. It highlights the pivotal role of race and class and the hitherto little-studied impact of religion on the region's political economy. Moreover, the study calculates the impact of the global economy upon Caribbean socio-economic conditions and the ideological, geopolitical, and strategic implications of the Cold War and the Caribbean's socialist alignment on the nature, character, and intensity of British and American interventionism in the region. A must-read for political economists in search of a greater understanding of the postcolonial political economy of the Caribbean and Latin America.
