Envisioning Sustainability:

Imagining Sustainability Julie Cidell, 2017-03-16 Cities rather than nations have become the key sites for enacting environmental policies. This is due to the combination of growing urban populations and increased action on the part of local governments generally attributed to national governments' failure to act on climate change. *Imagining Sustainability* seeks to understand how actors in local government conceptualize sustainability and their role in producing it and what difference that understanding makes to their physical, political, and social environments now and in the future. International comparisons can uncover new ideas and possibilities. Chicago and Melbourne are prime candidates for such a comparison; they are cities of the same age, they have similar historical trajectories as interior gateways followed by industrial growth and then deindustrialization, and they have demonstrated the same recent desire to be global champions of sustainability. Based on qualitative fieldwork in these two cities, this book uses Karen Barad's methodology of diffraction to read these case studies through each other. This methodology helps to understand not only what differences exist between these two places but what effects those differences have on the urban environment. This book will be of great interest to students and scholars of urban studies, urban planning, and environmental policy and governance.

Envisioning Sustainability Peter Berg, 2009 Planet Drum Foundation founder Berg provides a collection of the important essays that helped define the bioregional movement and established him as an icon in the environmental community.

Envisioning futures for environmental and sustainability education Peter Blaze Corcoran, Joseph P. Weakland, Arjen E.J. Wals, 2023-08-07 This edited collection invites educational practitioners and theorists to speculate on and craft visions for the future of environmental and sustainability education. It explores what educational methods and practices might exist on the horizon waiting for discovery and implementation. A global array of authors imagines alternative futures for the field and attempts to rethink environmental and sustainability education institutionally, intellectually, and pedagogically. These thought leaders chart how emerging modes of critical speculation might function as a means to remap and redesign the future of environmental and sustainability education today. Previous volumes within this United Nations Decade of Education for Sustainable Development series have responded to the complexity of environmental education in our contemporary moment with concepts such as social learning, intergenerational learning, and transformative leadership for sustainable futures. *Envisioning Futures for Environmental and Sustainability Education* builds on this earlier work as well as the work of others. It seeks to foster modes of intellectual engagement with ecological futures in the Anthropocene to develop resilient, adaptable pedagogies as a hedge against future ecological uncertainties and to spark discussion concerning how futures thinking can generate theoretical and applied innovations within the field.

Envisioning Sustainable Futures Pierre McDonagh, Fiona Murphy, 2016-09-23 This volume is a collection of essays considering the relationship between the social sciences and sustainability studies. Contributions are drawn from a range of disciplines such as sociology, anthropology, both scholarly and applied political science, and media.

studies It has been carefully edited to provide the reader with a range of commentaries to interrogate the evolution of sustainability imaginaries in contexts as varied as urban planning community gardens bread making sustainable food movements in Italy applied projects such as water projects in Bangladesh and disaster studies As such this is a book which ultimately argues for the value of the social sciences in considering one of the more urgent and complex topics of our time that of sustainability

Fractal Sustainability Isabel Canto de Loura, Robin Dickinson, 2016-08-12 Even though the fractal approach to sustainability and organizational change management is not new no authors so far seem to have truly attempted to use fractals as a mathematical means to map and measure organizational sustainability Several sustainability maturity models and change management models and frameworks concepts and computer generated systems came to the fore during the past two decades They provided a set of useful tools for managers academics and students to refer to or on which to base their own actions and plans However one issue remains most of those models and frameworks share a rather similar linear skeleton the main difference between them is the quantitative variety of steps within each phase stage and parameter and how in depth each of these is presented The authors work addresses a clear gap in the literature and in applied research as it emphasizes the relevance of using a complex mathematically based but user friendly fractal approach Readers are able to better understand implement map and measure change management processes leading to a sustainability focused mindset Subsequent chapters guide you through the steps towards creating committed sustainability based strategies attitudes actions and practices across all levels in the broad organizational context This text is essential reading for students researching business and management and who are interested in the Fractal Sustainability concept

Sustainable Manufacturing Kapil Gupta, Konstantinos Salonitis, 2021-03-30 Sustainable Manufacturing examines the overall sustainability of a wide range of manufacturing processes and industrial systems With chapters addressing machining casting additive and gear manufacturing processes and hot topics such as remanufacturing life cycle engineering and recycling this book is the most complete guide to this topic available Drawing on experts in both academia and industry coverage addresses theoretical developments and practical improvements from research and innovations This unique book will advise readers on how to achieve sustainable manufacturing processes and systems and further the clean and safe environment This handbook is a part of the four volume set entitled Handbooks in Advanced Manufacturing The other three address Advanced Machining and Finishing Advanced Welding and Deforming and Additive Manufacturing Provides basic to advanced level information on various aspects of sustainable manufacturing Presents the strategies and techniques to achieve sustainability in numerous areas of manufacturing and industrial engineering such as environmentally benign machining sustainable additive manufacturing remanufacturing and recycling sustainable supply chain and life cycle engineering Combines contributions from experts in academia and industry with the latest research and case studies Explains how to attain a clean green and safe environment via sustainable manufacturing Presents recent developments and suggests future research directions

Governance of Urban Sustainability Transitions Derk Loorbach, Julia M. Wittmayer, Hideaki Shiroyama, Junichi

Fujino, Satoru Mizuguchi, 2016-02-26 Reading this book will lead to new insights compelling to an international audience into how cities address the sustainability challenges they face They do this by not repeating old patterns but by searching for new and innovative methods and instruments based on shared principles of a transitions approach The book describes the quest of cities on two continents to accelerate and stimulate such a transition to sustainability The aim of the book is twofold to provide insights into how cities are addressing this challenge conceptually and practically and to learn from a comparison of governance strategies in Europe and Asia The book is informed by transition thinking as it was developed in the last decade in Europe and as it is increasingly being applied in Asia The analytical framework is based on principles of transition management which draws on insights from complexity science sociology and governance theories Only recently this approach has been adapted to the urban context and this book is an opportunity to share these experiences with a wider audience For scholars this work offers a presentation of recent state of the art theoretical developments in transition governance applied to the context of cities For urban planners professionals and practitioners it offers a framework for understanding ongoing developments as well as methods and instruments for dealing with them The content is potentially appealing to post graduate and graduate students of environmental management policy studies and urban studies programs

sustainability economic environmental social and time The second chapter focusses on what organisations are their system elements e g operations and production management and strategy and governance stakeholders relationships within and between organisations ranging from competition to collaboration and a framework for organisations to understand and map how they can contribute to sustainability The third chapter discusses the twenty four main tools initiatives and approaches TIAs that have been developed for organisations to contribute to sustainability such as Circular Economy Corporate Social Responsibility Environmental Management Systems and Sustainability Reporting The fourth chapter focusses on organisational change management for sustainability including types of change drivers for change resistance to change incorporation and institutionalisation The fifth chapter presents empirical evidence on what civil society organisations have contributed to sustainability from priorities and impacts TIAs external stimuli and internal factors drivers for change starts of change and development of change The sixth chapter presents empirical evidence on what corporations have contributed to sustainability from priorities and impacts TIAs external stimuli and internal factors drivers for change starts of change and development of change The seventh chapter presents empirical evidence on what public sector organisations have contributed to sustainability from priorities and impacts TIAs external stimuli and internal factors drivers for change starts of change and development of change The last chapter provides the conclusions of the book The book is aimed at providing a multi level dynamic and holistic perspective on the contributions of organisations to sustainability The book s uniqueness lies in analysing organisations efforts to become more sustainability oriented and contribute to making societies more sustainable through systems thinking TIAs and change processes

Sustainable Ecological Engineering Design Christopher Gorse,Beth Jones,Darryl Newport,Colin Booth,Lloyd Scott,Mohammad Dastbaz,Saheed Ajayi,Bianca Drotleff,2025-05-03 The International Conference of Sustainable Ecological Engineering Design for Society SEEDS brings together global experts to focus on a sustainability agenda and the positive and detrimental changes that are taking place Papers presented at the conference come from across a broad spectrum of the Sustainable Development Goals SDGs and bring forward practices to tackle the climate emergency and evaluate their impact It addresses technical issues measuring monitoring and assessing change emphasizing the environment infrastructure and buildings how they exist in relative isolation and the possibilities for sustainable integration The SEEDS Conference addresses the interdependence of people and the built and natural environments and recognizes the interdisciplinary and international themes necessary to assemble the knowledge required for positive change

Engineering for Sustainability Gerald Jonker,Jan Harmsen,2012-05-01 This book provides engineers with the necessary information to design sustainable processes products and value chains It describes the current consensus on sustainable development for four context levels Planet Society Business and Engineers It also presents all required design steps from problem definition via synthesis of potential solutions analysis of solutions improvements to the final solution evaluation For each design step methods and guidelines are provided in relation to the goal of obtaining a sustainable

solution a solution that meets both the needs of people and all specific context constraints with regard to the planet and prosperity Provides information on the current consensus on sustainable development for four context levels Planet Society Business and Engineers Offers guidelines for analyzing problems and identifying the best solution for each problem as applicable to a specific situation Provides clear design procedures for implementation of a particular solution Helps engineers to come up with profitable designs which meet environmental constraints Presents the information that engineers need to meet energy water food health and other basic human needs Environmental Anthropology Engaging Ecotopia Joshua Lockyer,James R. Veteto,2013-04-01 In order to move global society towards a sustainable ecotopia solutions must be engaged in specific places and communities and the authors here argue for re orienting environmental anthropology from a problem oriented towards a solutions focused endeavor Using case studies from around the world the contributors scholar activists and activist practitioners examine the interrelationships between three prominent environmental social movements bioregionalism a worldview and political ecology that grounds environmental action and experience permaculture a design science for putting the bioregional vision into action and ecovillages the ever dynamic settings for creating sustainable local cultures *Multi-Objective and Multi-Attribute Optimisation for Sustainable Development Decision Aiding* Samarjit Kar,Edmundas Kazimieras Zavadskas,Jurgita Antuchevienė,2019-09-20 Optimization is considered as a decision making process for getting the most out of available resources for the best attainable results Many real world problems are multi objective or multi attribute problems that naturally involve several competing objectives that need to be optimized simultaneously while respecting some constraints or involving selection among feasible discrete alternatives In this Reprint of the Special Issue 19 research papers co authored by 88 researchers from 14 different countries explore aspects of multi objective or multi attribute modeling and optimization in crisp or uncertain environments by suggesting multiple attribute decision making MADM and multi objective decision making MODM approaches The papers elaborate upon the approaches of state of the art case studies in selected areas of applications related to sustainable development decision aiding in engineering and management including construction transportation infrastructure development production and organization management **Accounting and Statistical Analyses for Sustainable Development** Claudia Lemke,2021-03-30 In this Open Access publication Claudia Lemke develops a comprehensive Multi Level Sustainable Development Index MLSDI that is applicable to micro meso and macro objects by conducting methodological and empirical research Multi level comparability is crucial because the Sustainable Development Goals SDGs at macro level can only be achieved if micro and meso objects contribute The author shows that a novel information theoretic algorithm outperforms established multivariate statistical weighting methods such as the principal component analysis PCA Overcoming further methodological shortcomings of previous sustainable development indices the MLSDI avoids misled managerial and political decision making

Universities as Living Labs for Sustainable Development Walter Leal Filho,Amanda Lange Salvia,Rudi W.

Pretorius, Luciana Londero Brandli, Evangelos Manolas, Fatima Alves, Ulisses Azeiteiro, Judy Rogers, Chris Shiel, Armin da Do Paco, 2019-04-30 This book fills an important gap in the literature and presents contributions from scientists and researchers working in the field of sustainable development who have engaged in dynamic approaches to implementing sustainability in higher education. It is widely known that universities are key players in terms of the implementation and further development of sustainability, with some having the potential of acting as living labs in this rapidly growing field. Yet there are virtually no publications that explore the living labs concept as it relates to sustainability and in an integrated manner. The aims of this book, which is an outcome of the 4th World Symposium on Sustainable Development at Universities WSSD U 2018 held in Malaysia in 2018, are as follows: i) to document the experiences of universities from all around the world in curriculum innovation, research activities and practical projects as they relate to sustainable development at the university level; ii) to disseminate information, ideas and experiences acquired in the execution of projects, including successful initiatives and good practice; iii) to introduce and discuss methodological approaches and projects that seek to integrate the topic of sustainable development in the curricula of universities; and iv) to promote the scalability of existing and future models from universities as living labs for sustainable development. The papers are innovative, cross-cutting and many reflect practice-based experiences, some of which may be replicable elsewhere. Also, this book, prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSDRTC, reinforces the role played by universities as living labs for sustainable development.

Reviewing **Envisioning Sustainability**: Unlocking the Spellbinding Force of Linguistics

In a fast-paced world fueled by information and interconnectivity, the spellbinding force of linguistics has acquired newfound prominence.
