**Epidermal Langerhans Cells** Gerold Schuler,2024-12-20 Epidermal Langerhans Cells focuses on epidermal Langerhans cells LCs and the important role they play in the induction of contact hypersensitivity and graft rejection This in depth work discusses how these antigen presenting cells are modulated by various physicochemical agents such as UV light and how they can be infected by the AIDS virus It also reveals that cytokines mediate their development into potent T cell stimulatory dendritic cells This comprehensive review covers important experimental details and methods and fascinating information on LCs It also provides an overview of the immune system as it relates to the skin in health and disease This up to date publication is an indispensable resource for all investigative and clinical dermatologists as well as immunologists interested in antigen presenting cells

**Skin Langerhans (Dendritic) Cells in Virus Infections and AIDS** Yechiel Becker,2012-12-06 Over the generations the skin has been the site for immunization against smallpox This method of immunization was described in a letter written by Lady Mary Montagu on April 1 1717 in Adrianopole Turkey The small pox so fatal and so general amongst us is here entirely harmless by the invention of ingrafting which is the term they give it The old woman comes with a nut shell full of the matter of the best sort of small pox She immediately rips open the skin with a large needle and puts into the vein as much venom as can lie upon the head of her needle and after binds up the wound There is no example of anyone that died of it and

you may believe that I am satisfied of the safety of this experiment since I intend to try it on my dear little son Letters from the right Honourable Lady Mary Montagu 1709 1762 Published by J M Dent and Co London 2nd edition September 1906 p 124 The variolation method was 80 years later markedly improved by the use of cowpox virus as reported by Edward Jenner in 1796 The successful method of intradermal immunization against smallpox and later against other virus diseases is in fact based on the presence of antigen presenting dendritic cells in the skin

### **Biochemical Modulation of Skin Reactions**

Agis F. Kydonieus, John J. Wille, 1999-12-15 Like almost every major scientific or medical breakthrough in history the transdermal delivery of drugs started as only an idea slowly moving its way from the drawing board to actual testing and eventually approval Today there are more than 20 companies involved in transdermal drug delivery In addition almost every large pharmaceutical firm has ongoing transdermal delivery programs But in spite of this effort and after 15 years from the introduction of the Nitroglycerin patch only six transdermal drugs exist in the marketplace The practice has been hampered by the fact that most drugs as well as many excipients used in the manufacture of transdermal patches cause skin irritation or skin sensitization Similar problems exist with the application of dermatologicals and cosmetics to skin which in many cases are equally as severe as those encountered in transdermal delivery Biochemical Modulation of Skin Reactions Transdermals Topicals Cosmetics presents a series of chapters describing technologies and the practical application of biochemicals which might lead to the reduction or abrogation of these skin reaction In addition it addresses those areas of skin immunology and skin sciences that account for the processes that control irritant and allergic contact dermatitis and outlines the numerous cellular and molecular factors involved in the development of irritation and sensitization Indeed Biochemical Modulation of Skin Reactions helps serve as a catalyst for further research in the field allowing for more drugs and cosmetics to be applied to the skin without adverse effects Features
