**Art Cloth** Jane Dunnewold, 2010-07-27 When Jane Dunnewold's book *Complex Cloth* was published in 1996 it quickly became the bible of surface design for fiber artists. In the years since the world of surface design has significantly expanded now fiber artists, art to wear designers and art quilters have a much broader range of surface design products to choose from and there are a wealth of technique combinations that can be used to create art cloth. *Art Cloth* picks up where *Complex Cloth* left off showing how to layer processes with the latest products to create stunning cloth for use in a variety of fiber art. Following Jane's techniques with step by step photography you will learn to create art cloth using dyes, color removing agents, paints and foils combined through processes that include silk screen printing, stamping, stenciling and handpainting. In addition to detailed step by step wet media surface design techniques Jane demonstrates how the use of color and design contribute to successful layering. She guides and inspires artists to take their art cloth to the next level through sidebars with design tips and exercises that support the technical information. Finally, each technique chapter concludes with project ideas for the skills learned so anyone working through the book can literally build layers on cloth as each chapter is completed.

Step by step photographs illustrate every technique and Rezendes includes innovative suggestions on how to combine and layer techniques for stunningly original results.

An overview of dyeing starts with fibers and fabrics and discusses all aspects of the dyes favored by textile studios: fiber reactive, acid vat and disperse. Before explaining discharging, screen printing, monoprinting, stamping, stenciling, resist, dyeing, devore and painting. Would be fabric artists are advised along the way to identify a personal approach to dyeing. Free spirit rule follower and color photographs of work by today's top fiber artists elucidate prevailing styles. Ten appendices include a worksheet for recording chemicals, procedures and costs for all projects, a guide to washing fabric, descriptions of stock solutions, thickeners and steaming, a metric conversion table and a guide to water temperatures.
