Complexity Avalanche J. B. Wood, 2009 Most customers struggle to keep up and usually settle for far less value than they could and should get from their purchases A new business model for the tech industry is needed one that requires radically different thinking about the future of services sales R D priorities and how companies create shareholder value This new way of doing business views the use of the product as the beginning of a journey with a customer not the end The growing consumption gap caused by the avalanche of complexity that these companies have unleashed on their customers is undermining feature based differentiation as a competitive advantage Results based differentiation actually measured by customers may be the next Big Thing in tech Complexity Avalanche offers technology companies a roadmap for moving to this next level of services This is not a book strictly for service executives but for every executive whose company builds sells or supports technology *California Management Review* ,2014

Wood, Todd Hewlin, Thomas E. Lah, 2014-05-14 Industry after industry is becoming technology driven as software rapidly eats the world As it spreads so do complexity and opportunity There are clear signs that the traditional B2B business model designed 125 years ago as a simple make sell ship approach for early manufacturing companies is no longer capable of delivering the full potential of high tech and near tech solutions B4B seeks to frame what is possible in an age where suppliers are connected to their customers in real time The traditional world of B2B was designed to sell things to customers whereas the new B4B model will be about delivering outcomes for customers It s a whole new ballgame Using powerful models and specific examples B4B envisions a next generation tech industry where suppliers play an active ongoing role in helping business customers achieve unparalleled value from their technology investments *The Innovator's Imperative* Stephen J. Andriole, Thomas Cox, Kaung M. Khin, 2023-01-09 Based on research conducted at Villanova University s School of Business the book describes technology adoption in the 21st century It presents a technology adoption process driven by competitive fear speed and digital transformation It is a process that is inexpensive indiscriminate and disconnected from adoption categories or bell curve
