Complexity Science Peter Belohlavek:

Complexity Science Peter Belohlavek, 2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems Complexity Sciences deal with the research of adaptive systems and environments The unicist approach to complexity sciences implies the discovery of the ontological structure of a reality and the objects that integrate it defining the ontological algorithm and then the actions that can be done to influence such reality

RobotThinking: The Nature of Automation Peter Belohlavek, 2011-09-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems This book is about robotics perhaps the hardest aspect of automation processes But it also includes its softest side the human being It describes conceptual structures using unicist technologies These technologies are homologous to the conceptual engineering solutions developed at the University of Osaka

Unicist R&D of Adaptive Systems in Business Peter Belohlavek, 2012-03-19 This book is focused on the R D of the adaptive systems of businesses in order to develop and design solutions for them It provides the technology to research and develop solutions for growth innovation and improvement of business processes It integrates applied research and architectural design It starts with a research process where the solutions need to be confirmed and ends with a design process developing the architecture of a business business process or business unit The research process is homologous to the clinical trials that are developed in medicine What needs to be confirmed is the efficacy the solution provides the security and safety of the process and the side effects the solution produces The solution needs to be considered as a unified field with the system in order to confirm the validity of the remedy The first step of an R D process is being able to apprehend the unified field of a business After this has been achieved a diagnosing process can begin This work shows that the solution has to be designed and built considering its utility aesthetics and solidity That is why an extreme design process is used Unicist XD that includes several pilot tests to ensure the functionality of the solution

Introduction to Unicist Business Architecture Peter Belohlavek, 2011-09-07 Introduction to Unicist Business Architecture is a fundamental book for individuals who are responsible for designing modeling or organizing businesses It provides an introduction to a structural functionalist approach to architecture that allows managing the integration of the ontological structures of a business to deal with it as an adaptive system with the functional operational processes that makes a business happen It is part of the Unicist Architecture Collection of Peter Belohlavek which synthesized the structural functionalist approach to business architecture It covers among other subjects analogy between functional architecture IT architecture and Business architecture Unicist Business Architecture the unified field businesses managed as unified fields transforming unified fields into operational actions unicist ontology of the apprehension of a unified field in business the nature of adaptive

systems for work taxonomy for the design of an adaptive system s work process unicist business process modeling unicist business objects design Unicist Back2Back methodology unicist design taxonomy the unicist ontology of figurative communication at work hyperrealism in business business platforms an application of Unicist Business Architecture 5 click strategy an example of the use of a unified field in business

The Ontogenesis of Knowledge Acquisition Peter Belohlavek, 2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems When we talk about the ontogenesis of knowledge acquisition we mean the natural steps that need to be considered when learning or when a learning process for other is being designed Knowledge can only be acquired when individuals have made a conscious decision to learn something

Design of Complex Systems Research Peter Belohlavek, 2008-01-02 If you need to deal with complex problems this book will open a door and widen your possibilities to influence them Complex systems research methodologies used until today include both intuitive and mathematical approaches to approximate solutions The unicist approach to complexity using ontology based logical inferences made the solution of complex problems understandable reasonable and provable This R D e book will give you an introduction to the unicist approach to complexity research The final goal of a diagnosis is to influence reality To do so the researcher needs to explain it but the explanation is only a comprehension framework to exert influence on the environment under study The research that merely tries to explain a situation becomes an end in itself and therefore tends to be fallacious All reality that operates as a complex system needs to be approached as a unified field The unified field is not susceptible to division into variables Division is only possible when dealing with a non complex system A complex system can only be studied as a unit A very strict methodology forecast and validation falsification are required to avoid falling into fallacies that will lead into erroneous diagnoses This work provides a list of actions to design the research that would permit to diagnose complex problems It includes the unicist ontology of complex systems research

The Power of Nations: The Unicist Standard for Country Future Research Peter Belohlavek, These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems The Power of Nations integrates the Economic Social Diplomatic and Dissuasion Powers to sustain the power of the culture that is within its archetype All cultures need to integrate all the aspects economic social diplomatic and dissuasion powers But each culture needs to do it based on its values in a way that is natural for the culture

Development of Consciousness Through Action Peter Belohlavek, 2012-03-19 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems The discovery of the unicist ontology of consciousness and the development of its ontogenetic map opened the

possibilities to manage adaptive systems for everyone It allows individuals to develop their level of consciousness expanding their possibilities to diagnose build strategies and develop structural solutions in the real world The Path of the Architect Peter Belohlavek,2011-09-07 This book is about the learning process of architects whatever the field they work in It provides the path for the evolution of architectural skills in the field of the architect s vocation It includes fifteen stations that need to be passed in order to manage a structural functionalist approach The unicist approach to architecture includes the need to know the ontological structure of what is being built in order to ensure its utility aesthetics and solidity It covers among other subjects the ontology of doers segments of doers maximal and minimum strategy of doers the role of the architect the art of architects the unicist ontology of art the unicist ontology of the art of architects segments of architects see to believe or believe to see perception and credibility the unicist ontology of inner freedom expanding your personal boundaries confirming the necessary knowledge focusing on solutions hyperreality building discovering the aesthetics designing the aesthetics timing and time management adaptive system design pilot test design communication building and the unicist ontology of leadership **Unicist Ontology of History** Peter Belohlavek,2008-05 The unicist ontology of history set a breakthrough in historical research Nowadays there are two models to structure the logic of historical information the dialectic and the unicist double dialectic The unicist approach to history seeks for the natural roots of cultural evolution and avoids ideological contamination in history This book provides the Unicist Methodology for Historical Research It includes the unicist ontology of history that has been researched to understand the nature of evolution History is supposed to deliver secure knowledge to be aware of the reality one is living in in order to be able to live in an adapted way The unicist approach to history besides delivering the ontology for historical research demonstrates the fallacy of the dialectic model The unicist historical research model is based on the unicist ontology of evolution considering that the structure thesis antithesis synthesis is inexistent and that the simple dialectic is an over simplification to foster voluntarism The unicist ontology of evolution considers that natural evolution is ruled by a double dialectic behavior 1 Thesis antithesis and 2 Thesis homeostasis The integration of both dialectics defines the ontological structure of a given reality The unicist methodology of historical research is based on the analysis of events and their inclusion in an ontological structure This explains history integrating the descriptive interpretative anthropological and ontological approaches This methodology considers ideologies as a part of the structure but avoids ideological contamination in history Unicist Marketing Mix Peter Belohlavek,2008-05 This book will help you define the minimum steps to produce the critical mass in the purchasing process Unicist models will help you define your marketing mix in order to define a successful strategy at a minimum cost This means understanding the nature of the buying process by knowing which actions influence the consumer s mind The objective of a marketing mix is to establish the successive and simultaneous actions to influence the consumer s or user s purchasing decision But about 50% of marketing campaigns do not achieve their goals This was the input for developing step by step a unicist ontology based model that

could make marketing more accurate The unicist marketing mix models the natural structures of the marketing mix within the taxonomy of selling processes This integrates marketing from product service design to customer s satisfaction It manages cross cultural invariables as well as local characteristics The unicist marketing mix model provides the fundamentals to design commercial processes and strategies This book includes the unicist ontology of the marketing mix that has been researched to influence its nature **Unicist Standard Language** ,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems The Unicist Standard Language is a bridge builder to understand communicate and influence the management of human adaptive systems through the logical reading of their ontology There are two possible languages in consultation books one for patients and one for doctors This is a book for doctors **Globalization, the New Tower of Babel?** Peter Belohlavek,2008-05 The reach of one s globalization is defined by the limits of the pronoun we This is a sort of a black box This book opens the black box of globalization unveiling its roots and making a personal decision on participating in the process possible After the purpose of globalization is understood the world will not be the same anymore The core of globalization is the satisfaction of the national interests of participants Discovering globalization will give you a functional view of the world instead of a hierarchical conflictive and dualistic perception Good and bad value judgments will be replaced by functional evaluations This book is a summary on the research carried out on the possibilities that a Sustainable Globalization has and the effects it bears on the development of peoples It is the result of a future research study grounded on the unicist theory of evolution and the unicist methodology for scenario building This book also provides Scenarios of sustainable globalization 2025 with an amazing conceptual approach to the main drivers of sustainable globalization including the concepts of national interest diplomacy dissuasion cooperation capability competitive capability technological supremacy vital space assurance and time management Unicist archetypes of countries are developed through the Australian Brazilian French German and Swedish archetypes This is an amazing work that opened new frontiers in the understanding of the concept of sustainable globalization *Unicist Business Objects Building* Peter Belohlavek,Diego Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems Unicist Business Objects are adaptive systems that are designed to produce a predefined result in a process By definition they deal with the adaptive aspects of businesses There are five types of business objects which are the drivers the entropy inhibitors the inhibitors the catalysts and the gravitational objects Unicist Logic to approach complexity , **El Abordaje Unicista de los Negocios** , **Unicist Reflection: to focus on solutions** Peter Belohlavek,2011-09-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided

to manage the concepts and fundamentals of things in order to manage the root causes of problems Unicist Reflection has been developed to deal with complex human adaptive systems such as businesses to develop scenarios diagnoses and strategies to achieve possible results Unicist Reflection requires having a final picture in mind It requires positive thinkers individuals who see the bottle half full not half empty **Unicist Business Strategy** Peter Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems The purpose of a business strategy is to influence the market and the environment to achieve business goals The unicist approach defines that a strategic approach includes both a maximal strategy and a minimum strategy to adapt to the market and the environment **Unicist Marketing** Peter Belohlavek,2011-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems Unicist Marketing is based on the use of unicist segmentation that allows on the one hand an accurate definition of the what what for why and how a segment buys and on the other hand the transformation of this abstract knowledge into marketing objects to influence the client and expand the markets Peopleware Peter Belohlavek,2011-09-07 These books were written as consultation books to be used to solve problems They are essentially analogous to medical books for individuals who decided to manage the concepts and fundamentals of things in order to manage the root causes of problems This book provides the necessary information to transform business architectures into operational business models Peopleware is defined by the structure of objects that individuals have in their minds which define the models they use when dealing with hardware and software at work
