Using Cards

NXG-1832-EUR and NXG-1833-EUR keypads are equipped with a Mifare card reader that allows you to use cards to log into the system and perform particular operations (NXG-180x-5 series of cards).

The cards/tobs must be presented close to the keypad display, preferably in the middle of the screen area (item 1 in Figure 1).

- Once the card is recognized, the reader generates a single beep sound.
- If the card is being held by the reader for a second, the reader will generate double beep sound.
- If the card is still being held by the reader for another second, the reader will generate triple beep sound.

By removing the card after single/double/triple beep, user can select which functions are to be triggered.

Every beep level can be independently configured to any combination of the following actions:

- logging into the system
- arming/disarming
- triggering system scenes or actions
- unlocking the door

See *xGenConnect Installation and Programming Guide* for more details.

Note: Card functions are triggered only if the keypad shows the screensaver or the main screen.

Cards are inactive when the user already entered keypad menus, or is in the process of arming/disarming. The exception is the User Cards menu. See "Programming Cards" on page 6 for details.

System status

The xGenConnect security system displays system status messages on the screen (Figure 1, item 1). For example, the main screen below shows the Fault system status category.
