American Experimental Music 1890-1940 David Nicholls, 1990 From the end of the nineteenth century a national musical consciousness gradually developed in the USA as composers began to turn away from the European conventions on which their music had hitherto been modelled It was in this period of change that experimentation was born In this book the composer and scholar David Nicholls considers the most influential figures in the development of American experimental music including Charles Ives Charles Seeger Ruth Crawford Henry Cowell and the young John Cage He analyses the music and ideas of this group explaining the compositional techniques invented and employed by them and the historical and cultural context in which they emerged *The Ecclesiologist*, 1859 *The Sackbut*, 1928 **The Ecclesiologist** Ecclesiological society, 1859 *The Musical Standard*, 1875 **The Military Band** United States. Department of the Army, 1969 This manual serves as a guide to commanders in the training and utilization of an Army band as a marching concert and dance stage unit in connection with military ceremonies formal concerts and recreational activities Users of this manual are encouraged to submit recommended changes and comments to improve the manual Comments should be keyed to the specific page paragraph and line of the text in which the change is recommended Reasons will be provided for each comment to insure understanding and complete evaluation This manual prescribes approved procedures for the overall functioning of an Army band Commanders will use this manual as a reference for the organization and training of an Army band *The Educator-journal*, 1913 The Music of Herbert Howells Phillip A. Cooke, David Nicholas Maw, 2013 Herbert

Howells 1892 1983 was a prodigiously gifted musician and the favourite student of the notoriously hard to please Sir Charles Villiers Stanford Throughout his long life he was one of the country's most prominent composers writing extensively in all genres except the symphony and opera Yet today he is known mostly for his church music and there is as yet relatively little serious study of his work This book is the first large scale study of Howells's music affording both detailed consideration of individual works and a broad survey of general characteristics and issues Its coverage is wide ranging addressing all aspects of the composer's prolific output and probing many of the issues that it raises The essays are gathered in five sections Howells the Stylist examines one of the most striking aspect of the composer's music its strongly characterised personal voice Howells the Vocal Composer addresses both his well known contribution to church music and his less familiar but also important contribution to the genre of solo song Howells the Instrumental Composer shows that he was no less accomplished for his work in genres without words for which in fact he first made his name Howells the Modern considers the composer's rather overlooked contribution to the development of a modern voice for British music and Howells in Mourning explores the important impact of his son's death on his life and work The composer that emerges from these studies is a complex figure technically fluent but prone to revision and self doubt innovative but also conservative a composer with an improvisational sense of flow who had a firm grasp of musical form an exponent of British musical style who owed as much to continental influence as to his national heritage This volume comprising a collection of outstanding essays by established writers and emergent scholars opens up the range of Howells's achievement to a wider audience both professional and amateur
