The Emotional Lives of Animals Marc Bekoff, 2024-04-09 A seminal exploration of animal emotion sentience and cognition revised and expanded to incorporate a surge of new science When award winning scientist Marc Bekoff penned the first edition of this book in 2007 he predicted that over time our understanding of animal cognition and emotion would grow richer more accurate and possibly different Since then not only has the field seen an explosion of new and startling research but the popular interest in the subject has grown as well spawning countless podcasts articles and bestselling books Bekoff skillfully blends extraordinary stories of animal joy empathy grief embarrassment anger and love with the latest scientific research confirming the existence of emotions that common sense and experience have long implied Filled with light humor and compassion *The Emotional Lives of Animals* is a clarion call for reassessing both how we view and how we treat animals

The Case for the Legal Protection of Animals Kimberly C. Moore, 2023-12-22 This book presents the case for legal protection for animals based on humanity's shared interests and destinies with the animal kingdom To underscore the urgent need for legal reform the book documents how animals are in crisis with separate discussions on animals in entertainment research fashion the food industry and animals in our homes as well as issues that impact wildlife and aquatic animals In each of the foregoing areas there is a discussion of major developments for animals across the globe the objective being to demonstrate how the U S is out of step with other major countries in its legal treatment of animals The importance of media as a driver of change is also considered This background culminates to the heart of the book which discusses and analyzes the link between human rights and animal rights with nine areas explored e g loss of biodiversity environmental destruction zoonotic diseases world hunger violence Challenges to legal reforms are also explored including issues associated with weak laws the failure to enforce existing laws and governmental agencies that tend to overlook the actions of industries Finally the book explores the development of animal law and the trajectory of current laws with analysis of developing rights of nature laws and legal personhood status for animals

Animals and Agency Sarah McFarland, Ryan Hediger, 2009-06-02 While many scholars who write about animals deal with animal agency in some way this volume is the first to position the question of nonhuman agency as the primary focus of inquiry Section I presents studies of actual animals demonstrating agency Section II moves agency into new terrain while considering key representations of animal agency in literature Section III analyzes animals as mediators and as conveyances of human to human communication and Section IV investigates the agency of beings who defy conventional species categories The Envoi demonstrates how the microscopic polyp is interwoven into notions of agency and mythical superagency This volume's interdisciplinary explorations press hard on issues of agency to open up space for more questions about how we can understand relationships between the human and the nonhuman

TV Guide, 2002 Animals in Environmental Education Teresa Lloro-Bidart, Valerie S. Banschbach, 2019-01-04 This book explores interdisciplinary approaches to animal focused curriculum and pedagogy in environmental education with an

emphasis on integrating methods from the arts humanities and natural and social sciences Each chapter whether addressing curriculum pedagogy or both engages with the extant literature in environmental education and other relevant fields to consider how interdisciplinary curricular and pedagogical practices shed new light on our understandings of and ethical moral obligations to animals Embracing theories like intersectionality posthumanism Indigenous cosmologies and significant life experiences and considering topics such as equine training meat consumption and production urban human animal relationships and zoos and aquariums the chapters collectively contribute to the field by foregrounding the lives of animals The volume purposefully steps forward from the historical marginalization of animals in educational research and practice

Unexpected Consequences James William Martin, 2011-09-12 In this book interrelationships between more than 40 recent catastrophic events are explored discussing failures of structures and machines information technology regulatory agencies security designs and more The world is full of wonderful products and services that occasionally disappoint and even harm us *Unexpected Consequences* Why The Things We Trust Fail explores the reasons these failures occur examining them from technological human and organizational perspectives Using more than 40 recent catastrophic events to illustrate its points the book discusses structural and machine failure but also the often overlooked failure of people and of systems related to such things as information technology healthcare and security As the book demonstrates faulty technology played a surprisingly small part in many of the scrutinized disasters Author James William Martin finds cognitive factors and organizational dynamics including ethics are major contributors to most unexpected and catastrophic failures causing loss of life and extensive property damage With that fresh perspective in mind Martin is able to suggest remedies that address service failure and just may help prevent future disasters from taking place New York , 1989-11 **In Defense of the**

World's Most Despised Species Ernest Small, 2023-10-05 Some animals and plants injure or kill millions of people annually others cause trillions of dollars in property damage and loss Such harmful species are understandably hated However the vast majority of the planet's millions of species are disliked simply because of how they look and act This bias is endangering numerous species that play important roles in maintaining both the natural ecosystems and the human economies of the world *In Defense of the World's Most Despised Species* examines the psychological motivations that lead people to make judgments about the attractiveness of species noting the overwhelming importance of visual cues It describes in considerable detail the physical and behavioral traits of species that lead us to love or hate them Full color illustrations throughout present beautiful charming animals and plants species that seem loathsome behavior of people in relation to such divergent species and their characteristics and numerous explanatory diagrams of relevant biological and psychological phenomena The aim of this book is to give readers insights into how we humans arrive at biased judgments and to promote the welfare of valuable albeit sometimes unlovable animals and plants that consequently suffer from discrimination Many of the ugliest most disgusting and feared species such as vultures toads hyenas sharks spiders and even the vast majority of cockroaches in

Slither Stephen S. Hall, 2025-04-22 In this important and pioneering The New York Times Book Review book a science writer reintroduces readers to The Snake encouraging our initial reaction to the slithery creature to be one of awe rather than disgust For millennia depictions of snakes as alternatively beautiful and menacing creatures have appeared in religious texts mythology poetry and beyond From the foundational deities of ancient Egypt to the reactions of squeamish children today it is a historically commonplace belief that snakes are devious dangerous and even evil But where there is hatred and fear there is also fascination and reverence How is it that creatures so despised and sinister so foreign of movement and ostensibly devoid of sociality and emotion have fired the imaginations of poets prophets and painters across time and cultures In Slither Stephen S Hall presents a naturalistic cultural ecological and scientific meditation on these loathed yet

magnetic creatures In each chapter he explores a biological aspect of The Snake such as their cold blooded metabolism and venomous nature alongside their mythology artistic depictions and cultural veneration In doing so he explores not only what neurologically triggers our wary fascination with these limbless creatures but also how the current generation of snake scientists is using cutting edge technologies to discover new truths about these evolutionarily ancient creatures truths that may ultimately affect and enhance human health

The Age of Empathy Frans de Waal, 2010-09-07 In this thought provoking book the acclaimed author of *Our Inner Ape* examines how empathy comes naturally to a great variety of animals including humans Are we our brothers keepers Do we have an instinct for compassion Or are we as is often assumed only on earth to serve our own survival and interests By studying social behaviors in animals such as bonding the herd instinct the forming of trusting alliances expressions of consolation and conflict resolution Frans de Waal demonstrates that animals and humans are preprogrammed to reach out He has found that chimpanzees care for mates that are wounded by leopards elephants offer reassuring rumbles to youngsters in distress and dolphins support sick companions near the water's surface to prevent them from drowning From day one humans have innate sensitivities to faces bodies and voices we've been designed to feel for one another De Waal's theory runs counter to the assumption that humans are inherently selfish which can be seen in the fields of politics law and finance But he cites the public's outrage at the U.S. government's lack of empathy in the wake of Hurricane Katrina as a significant shift in perspective one that helped Barack Obama become elected and ushered in what perhaps could become an Age of Empathy Through a better understanding of empathy's survival value in evolution de Waal suggests we can work together toward a more just society based on a more generous and accurate view of human nature Written in layman's prose with a wealth of anecdotes wry humor and incisive intelligence *The Age of Empathy* is essential reading for our embattled times An important and timely message about the biological roots of human kindness

Radio 2.0 Matthew Lasar, 2016-03-14 Welcome to the uncertain world of Radio 2.0 where podcasts mobile streaming and huge music databases are the new reality as are tweeting deejays and Apple's Siri serving as music announcer and understand the exciting status this medium has and will continue to have in our digitally inclined society How did popular radio in past decades from President Franklin D. Roosevelt's Fireside Chats in the 1930s through Top 40 music and Rush Limbaugh's talk radio empire shape American society How did devices and systems like the iPhone Pandora and YouTube turn the radio industry upside down Does radio still have a future and if so what will we want it to look like *Radio 2.0* Uploading the First Broadcast Medium covers the history and evolution of Internet radio explaining what came before where Internet radio came from and where it is likely headed It also gives readers a frame of reference by describing radio from its introduction to American audiences in the 1920s a medium that brought people together through a common experience of the same broadcast and shows how technologies like digital music and streaming music services put into question the very definition of radio By examining new radio and media technologies the book explores an important

societal trend the shift of media toward individualized or personalized forms of consumption *The Experiment at Philadelphia*: Kurt B. Bakley, 2015-04-21 The Philadelphia Experiment was Einsteins experiment in which he had not only discovered in 1943 the way to make things invisible and transport them at great speeds but also positively proven scientifically physically and spiritually that God Almighty exists He had literally discovered God That question Is there a God thats been going through peoples minds for so long discussed on the street corner talked about on the porch on a hot summers night is now a proven fact **Animal Bodies, Human Minds: Ape, Dolphin, and Parrot Language Skills** W.A. Hillix, Duane Rumbaugh, 2004 Several books chronicle attempts most of them during the last 40 years to teach animals to communicate with people in a human designed language These books have typically treated only one or two species or even one or a few research projects We have provided a more encompassing view of this field We also want to reinforce what other authors for example Jane Goodall Sue Savage Rumbaugh Penny Patterson Birute Galdikas and Roger and Deborah Fouts so passionately convey about our responsibility for our closest animal kin This book surveys what was known or believed about animal language throughout history and prehistory and summarizes current knowledge and the controversy around it The authors identify and attempt to settle most of the problems in interpreting the animal behaviours that have been observed in studies of animal language ability
