Application(s) >

HONDA SHADOW RS 750 2010-2013

Instruction Manual >

92-1614

Page 1 of 3

Read all instructions carefully and completely before installing your new Fi2000 module.

It is recommended that a qualified mechanic or technician install this product.

Before installing the Fi2000 it is recommended that the gas tank be low on fuel.

1. Remove the M5 bolts securing the main seat and remove seat. Remove the left side cover to allow access for the Fi2000 harness routing.
2. Remove the bolt securing the rear of the tank and prop the tank up at the rear for extra access to fuel injectors.
3. Place the Fi2000 in the under seat area and route the harness forward under the front seat mount, see Figure 1. Route up the center frame tube toward injectors along the left side.
4. Disconnect air recirculation hose to gain access to stock fuel injectors, see Figure 2.
5. Note which stock injector connectors belong to front and rear injectors. Disconnect the stock injector connector from the front cylinder and connect the longer female Fi2000 connector to that injector – connect corresponding male Fi2000 connector to stock female connector (removed from front cylinder). See Figure 3. Note: (Angled needle nose pliers will aid in removing stock connectors.)
6. Disconnect the stock injector connector from the rear cylinder and connect the shorter female Fi2000 connector to that injector – connect corresponding male Fi2000 connector to stock female connector (removed from rear cylinder injector), see Figure 3. Make sure all connectors are fully engaged and sealed.
7. Reconnect air recirculation hose. Pull slack out of harness and pull excess slack to rear of harness.
8. Remove the Phillips screw attaching cover over battery. Lift cover rearward to access battery terminals. Attach the black ground cable to the **NEGATIVE** post of the battery. See Figure 1. Close battery box cover and install Phillips screw. Install supplied zip tie to harness in location shown.
9. Velcro the Fi2000 box on top of the frame rail behind the battery box cover and verify your connections. Remove the door from the Fi2000 box to expose the LED lights and pot settings. Verify the wire connections by (1) turning on the ignition while watching the 3 LEDs, confirm that all 3 LEDs light up and remain on. If you don't see lights, make sure the sidestand is up, bike is in neutral, clutch is in and handlebar engine switch is set to run. If you still have no lights, re-check that all connectors are fully engaged and the ground wire is connected correctly. (2) After achieving a steady light from all three LED's, start the motorcycle; the green light should now be the only LED on. If all three LED's are still on after start up, verify you have attached the injector connectors correctly. Reattach the access door when finished. **Note:** Make sure the ignition is turned off before changing any connection.

* Before recommending you always wear a helmet while riding. Please never operate your motorcycle while under the influence of alcohol and/or drugs. Enjoy the new look of your motorcycle and please ride safely.

Cobra Fi2000 Manual

Robert Jex, Peter T. Gill

Cobra Fi2000 Manual:

Decoding **Cobra Fi2000 Manual**: Revealing the Captivating Potential of Verbal Expression

In a period characterized by interconnectedness and an insatiable thirst for knowledge, the captivating potential of verbal expression has emerged as a formidable force. Its capability to evoke sentiments, stimulate introspection, and incite profound transformations is genuinely awe-inspiring. Within the pages of "**Cobra Fi2000 Manual**," a mesmerizing literary creation penned by way of a celebrated wordsmith, readers embark on an enlightening odyssey, unraveling the intricate significance of language and its enduring affect our lives. In this appraisal, we shall explore the book is central themes, evaluate its distinctive writing style, and gauge its pervasive influence on the hearts and minds of its readership.
