Redefining Codification Dirk Heirbaut, 2024-12-10 More than half of the world's population lives under law codes Yet defining the concept of codification remains elusive Rather than delving into abstract theories this book provides a rich and contextual comparative legal history of codes in France Germany the Netherlands and Belgium from the late eighteenth century to the present The author starts by examining the evolution of French German Dutch and Belgian codes in their political and comparative context thus challenging deeply rooted national narratives He

covers the well studied civil codes and the often overlooked commercial and procedural codes and drafts that failed to become law Against this backdrop the book embarks on a comprehensive analysis of the factors contributing to the success or failure of codification efforts Employing an innovative method of comparative legal history Redefining Codification explores the key players and objectives behind codification revealing that traditional notions of codification are far removed from reality Following the deconstruction of some universal truths about codifications this volume offers fresh insights into the behind the scenes of the lawmaking machinery and an empirically based definition of codification

Commentaries on European Contract Laws Nils Jansen,Reinhard Zimmermann,2018-07-13 The book provides rule by rule commentaries on European contract law general contract law consumer contract law the law of sale and related services dealing with its modern manifestations as well as its historical and comparative foundations After the collapse of the

European Commission's plans to codify European contract law it is timely to reflect on what has been achieved over the past three to four decades and for an assessment of the current situation. In particular the production of a bewildering number of reference texts has contributed to a complex picture of European contract laws rather than a European contract law. The present book adopts a broad perspective and an integrative approach. All relevant reference texts from the CISG to the Draft Common European Sales Law are critically examined and compared with each other. As far as the *acquis communie* ie the traditional private law as laid down in the national codifications is concerned the Principles of European Contract Law have been chosen as a point of departure. The rules contained in that document have however been complemented with some chapters sections and individual provisions drawn from other sources primarily in order to account for the quickly growing *acquis communautaire* in the field of consumer contract law. In addition the book ties the discussion concerning the reference texts back to the pertinent historical and comparative background and it thus investigates whether and to what extent these texts can be taken to be genuinely European in nature ie to constitute a manifestation of a common core of European contract law. Where this is not the case the question is asked whether and for what reasons they should be seen as points of departure for the further development of European contract law.
