Codebreakers Linguists Intelligence Officers 1910 1941:

U.S. Navy Codebreakers, Linguists, and Intelligence Officers against Japan, 1910-1941 Steven E. Maffeo, 2015-12-16 This unique reference presents 59 biographies of people who were key to the sea services being reasonably prepared to fight the Japanese Empire when the Second World War broke out and whose advanced work proved crucial. These intelligence pioneers invented techniques, procedures, and equipment from scratch, not only allowing the United States to hold its own in the Pacific despite the loss of most of its Fleet at Pearl Harbor, but also laying the foundation of today's intelligence methods and agencies. One hundred years ago, in what was clearly an unsophisticated pre-information era, naval intelligence and foreign intelligence in general existed in rudimentary forms almost incomprehensible to us today. Founded in 1882, the U.S. Office of Naval Intelligence (ONI), the modern world's oldest continuously operating intelligence agency, functioned for at least its first forty years with low manning, small budgets, low priority, and no prestige. The navy's early steps into communications intelligence (COMINT), which included activities such as radio interception, radio traffic analysis, and cryptology, came with the 1916 establishment of the Code and Signals Section within the navy's Division of Communications, and with the 1924 creation of the Research Desk as part of the Section. Like ONI, this COMINT organization suffered from low budgets, manning, priority, and prestige. The dictionary focuses on these pioneers, many of whom went on even after World War II to important positions in the Navy, the State Department, the Armed Forces Security Agency, the National Security Agency, and the Central Intelligence Agency. It reveals the work and innovations of well- and lesser-known individuals who created the foundations of today's intelligence apparatus and analysis.

Studies in Intelligence, 2016 *Women in Allied Naval Intelligence in the Second World War* Sarah-Louise Miller, 2024-10-17 Closely examining the work of women in the US and British naval services towards Allied naval intelligence during the Second World War this book focuses on their contributions during the Battle of the Atlantic and Pacific Naval War in order to shed new light on arenas of war from which women's narratives are almost always absent Including personal testimonies from those involved and surveying a wide cross section of different roles Sarah Louise Miller analyses the work of women at every level and rank in the US and British naval services and offers a much wider picture of how they assisted the Allied forces behind closed doors With exploration of the work of the WRNS and WAVES on developing naval intelligence this book argues that they played a crucial role in the British and American SIGINT systems and within programs such as those at Bletchley Park and OP 20 G therefore directly impacting the organisation and outcome of Anglo American naval efforts Including analysis of the development of the modern kill chain Miller also re evaluates the effect of the combat taboo to demonstrate that the WRNS and WAVES were in fact at the cutting edge of the emergence of modern warfare

America's First General Staff John Trost Kuehn, 2017-10-15 The General Board of the Navy in existence from 1900 to 1950 was a uniquely American and unparalleled strategic planning organization As John T Kuehn shows this was the United States first modern general staff in peacetime as well as the nexus for naval thought and strategic thinking The Board s creation reflected the reformist spirit of the era that also gave birth to the Army War College the Army General Staff and the Chief of Naval Operations As such the General Board and its mission also reflected an attempt to reconcile the primacy of civilian control of the military with an increasing need for more formal military and naval planning establishments processes and methods Thus the General Board s very name reflected the idea shared by both corporate America and naval tradition that challenges and problems could be met with special temporary organizational bodies By the 1920s the General Board had become a permanent feature of the Navy and was regarded as the premier strategic think tank for advice to the Secretary of the Navy Evolving over the course of its existence the Board developed into a bona fide institutional component atop the service s hierarchy Kuehn highlights how this small body wielding immense influence over the span of its organizational life was an innovative progressive and productive force for the security of the United States in peace and for naval success in war The service of the men comprising the Board is little known but their collaborative ethos should serve as a model for their modern counterparts Kuehn s organizational history of the General Board provides context on the complexities and turbulence involved in building
