research Denroche characterizes metonymy as key to understanding why language is so fit for purpose and how it achieves such great subtlety and flexibility This study develops the notion of metonymic competence and demonstrates that metonymic behavior is often pursued for its own sake in recreational activities such as quizzes puzzles and play and shows the possible impact of the application of metonymic processing theory to professional fields such as language teaching and translator training Furthermore it proposes a research approach with metonymy at its center metonymics which Denroche suggests could provide a powerful framework for addressing issues in numerous fields of practice in the arts and sciences

Cognitive and Intermedial Semiotics Marta Silvera-Roig, Asunción López-Varela Azcárate, 2020-06 Cognitive and Intermedial Semiotics offers a window into applied cognitive semiotics with different examples of meaning production studies Thus in its chapters we will find examples of different approaches methods and

theories that cognitive semiotics offers as an interdisciplinary field **Constructions in Cognitive Contexts** Franziska Günther, 2016-11-07 In what ways are language cognition and perception interrelated Do they influence each other This book casts a fresh light on these questions by putting individual speakers cognitive contexts i e their usage preferences and entrenched patterns of linguistic knowledge into the focus of investigation It presents findings from original experimental research on spatial language use which indicate that these individual specific factors indeed play a central role in determining whether or not differences in the current and or habitual linguistic behaviour of speakers of German and English are systematically correlated with differences in non linguistic behaviour visual attention allocation to and memory for spatial referent scenes These findings form the basis of a new speaker focused usage based model of linguistic relativity which defines language perception cognition effects as a phenomenon which primarily occurs within individual speakers rather than between speakers or speech communities **Postclassical Greek Prepositions and Conceptual Metaphor** William A. Ross, Steven Edward Runge, 2022-08-01 Traditional semantic description of Ancient Greek prepositions has struggled to synthesize the varied and seemingly arbitrary uses into something other than a disparate sometimes overlapping list of senses The Cognitive Linguistic approach of prototype theory holds that the meanings of a preposition are better explained as a semantic network of related senses that radially extend from a primary spatial sense These radial extensions arise from contextual factors that affect the metaphorical representation of the spatial scene that is profiled Building upon the Cognitive Linguistic descriptions of Bortone 2009 and Luraghi 2009 linguists biblical scholars and Greek lexicographers apply these developments to offer more in depth descriptions of select postclassical Greek prepositions and consider the exegetical and lexicographical implications of these findings This volume will be of interest to those studying or researching the Greek of the New Testament seeking more linguistically informed description of prepositional semantics particularly with a focus on the exegetical implications of choice among seemingly similar prepositions in Greek and the challenges of potentially mismatched translation into English
