Proceedings of the 7th World Congress of African Linguistics, Buea, 17-21 August 2012 G. Atindogbe, Fogwe Chibaka, 2016-12-19 This book is a composite of 40 purely scientific and peer reviewed papers presented during the Seventh World Congress of African Linguistics WOCAL7 at the University of Buea, Cameroon in 2012. The different chapters of the volume fall within the scope of African languages in relation to linguistics and other related disciplines where a varied range of theoretical examinations, investigations and/or discussions as well as pure description of aspects of language are offered. For the purpose of clarity and easy accessibility of the content, the chapters are further subcategorized into nine sections which include: Borrowing, Discourse Analysis, Historical Linguistics, Intercultural Communication, Language Documentation, Language in Education, Morpho syntax, Phonetics and Phonology and Sociolinguistics. Cognitive Linguistic Approaches to Teaching Vocabulary and Phraseology Frank Boers, Seth Lindstromberg, 2008 Review text This volume, one in a series of applications of cognitive linguistics, revolves around the importance of figurative thought and linguistic iconicity for vocabulary acquisition. Being mainly devoted to phraseology, it is an important contribution to an area in need of attention. For this reason alone, it is a useful resource for SLA researchers, in particular for those involved in the training of language teachers. Kirsten Haasstrup in *Studies in Second Language Acquisition* 4, 2009 **The Lexicon-Encyclopedia Interface** Bert Peeters, 2021-10-01 Questions about the exact nature of linguistic as opposed to non linguistic knowledge have been asked for as long as humans have studied language, be it as linguists, philosophers, psychologists, language teachers, semioticians or cognitive scientists. This distinction has been maintained and defended by some, attacked and abandoned by others. Through specially commissioned papers for this, the fifth volume in the *Current Research in Semantics Pragmatics Interface* series, contributors argue both for and against the distinction between

lexical knowledge and encyclopedic knowledge and debate how it should be drawn *Language and Mathematics* Marcel Danesi, 2016-06-06 This book explores the many disciplinary and theoretical links between language linguistics and mathematics It examines trends in linguistics such as structuralism conceptual metaphor theory and other relevant theories to show that language and mathematics have a similar structure but differential functions even though one without the other would not exist **Words and Other Wonders** Dirk Geeraerts, 2009-07-29 Cognitive Linguistics has given a major impetus to the study of semantics and the lexicon The present volume brings together seventeen previously published papers that testify to the fruitfulness of Cognitive Linguistics for the study of lexical and semantic topics Spanning the period from the late 1980s to recent years the collection features a number of papers that may be considered classics within the field of cognitive linguistic lexicology The papers are grouped in thematic sections The first section deals with prototypicality as a theoretical and practical model of semantic description The second section discusses polysemy and criteria for distinguishing between meanings The third section tackles questions of meaning description beyond the level of words on the level of idioms and constructions The following section casts the net even wider dealing with the cultural aspects of meaning Moving away from the theoretical and descriptive perspective towards applied concerns the fifth section looks at lexicography from the point of view of Cognitive Linguistics The final section has a metatheoretical orientation it discusses the history and methodology of lexical semantics Each paper is preceded by a newly written introduction that situates the text against the period in which it was first published but that also points to further developments in the author's own research or in Cognitive Linguistics at large The variety of topics dealt with make this book an excellent introduction to the broad field of lexicological and lexical semantic research Metonymy and Word-Formation Mario Brdar, 2018-01-23 This book deals with the interplay between word formation and metonymy It shows that like metaphor metonymy interacts in important ways with morphological structure but also warns us against a virtually unconstrained conception of metonymy The central claim here is that word formation and metonymy are distinct linguistic components that complement and mutually constrain each other Using linguistic data from a variety of languages the book provides ample empirical support for its thesis It is much more than a systematic study of two neglected linguistic phenomena for a long time thought to be unimportant by linguists Through exposing and explaining the intricate interaction between metonymy and word formation from a cognitive linguistic perspective the reader is presented with a sense of the amazing complexity of the development of linguistic systems This book will be essential reading for scholars and advanced students interested in the role of figuration in grammar English Produced by Japanese L2 Users Toshiko Yamaguchi, 2022-12-06 This book discusses ten grammatical items with main focus on prepositions and plural nouns to illustrate the structure of Japanese English or the English spoken by 32 Japanese nationals who are the L2 users of English Adopting an inductive theory neutral analysis of empirical data collected from recordings of presentational talks the author demonstrates how standard and nonstandard grammatical forms are distributed

and categorizes these based largely on functional factors The book describes grammatical forms as a fundamental aspect of linguistic study and adopts a corpus driven approach to qualify structural features characterizing usage data This formalization of language usage patterns also facilitates the development of locally relevant norms and thus presents alternatives to the normative varieties traditionally adopted It examines the effects of multicompetence and unpacks the grammar of Japanese English The book is of interest to researchers educators and students concerned with issues related to World Englishes English as a lingua franca English language teaching and multilingualism this text is vital to studies in global English language use **Linguistic analysis of literary data** Fareed Hameed Al-Hindawi,Musaab

Al-Khazaali,2017-03-15 Literary data is supposed to reflect real life situations and is at the same time written in a style of writing that is considered as highly elevated Such reasons have prompted the contributors to this book to deal with this type of data Such attempts range from semantics to stylistics and pragmatics This book introduces linguistic analyses of literary data from different points of view This involves dealing with various linguistic topics and different types of literary data Hence many models are presented to analyze the linguistic aspects of those topics in the light of the genre in which those topics are undertaken Accordingly different results are yielded from those analyses and this makes each type of analysis distinct from the other ones It is hoped that this work will be a useful source to all those whether theoretically practically or both interested in linguistics pragmatics of literature applied linguistics and literary stylistics **Metaphor and Metonymy**

in Comparison and Contrast René Dirven,Ralf Pörings,2009-09-24 The book elaborates one of Roman Jakobson s many brilliant ideas i e his insight that the two cognitive strategies of the metaphoric and the metonymic are the end points on a continuum of conceptualization processes This elaboration is achieved on the background of Lakoff and Johnson s twodomain approach i e the mapping of a source onto a target domain of conceptualization Further approaches dwell on different stretches of this metaphor metonymy continuum Still other papers probe into the specialized conceptual division of labor associated with both modes of thought Two new breakthroughs in the cognitive linguistics approach to metaphor and metonymy have recently been developed one is the three domain approach which concentrates on the new blends that become possible after the integration or the blending of source and target domain elements the other is the approach in terms of primary scenes and subscenes which often determine the way source and target domains interact **Metaphor**

and Metonymy revisited beyond the Contemporary Theory of Metaphor Francisco González-García,María Sandra Peña Cervel,Lorena Pérez Hernández,2013-10-30 The contributions in this volume go beyond the Contemporary Theory of Metaphor complementing it in a number of relevant ways Some of the papers argue for a more dynamic interdisciplinary approach to metaphor looking into it from semiotic psychological and socio cultural perspectives Other contributions focus on the crucial role played by metaphor and metonymy in meaning construction at a discourse textual level Finally the volume also includes proposals which revolve around the alleged universal nature of metaphorical mappings and their suitability to

account for grammatical phenomena The contributions in this volume display an ample gamut of theoretical approaches pointing to the viability of taking a functional cognitive stance on the analysis of metaphor and metonymy in contrast to a purely cognitive one This book is structured into three major sections i the Contemporary Theory of Metaphor revisions and recent developments ii metaphor and or metonymy across different discourse genre types and iii the Contemporary Theory of Metaphor current applications Originally published in Review of Cognitive Linguistics 9 1 2011 Multiple Preverbs in Ancient Indo-European Languages Chiara Zanchi, 2019-08-26 The book investigates multiple preverbs PVs in some ancient IE languages Vedic Homeric Greek Old Church Slavic and Old Irish After an introduction it opens with the theoretical framework and a typologically oriented overview of PVs It then gives quantitative data about multiple PV composites and carries out philological formal semantic and syntactic analyses on them The comparison among these languages suggests that a process of accumulation lies behind multiple PV composites Also PV ordering is explained by different factors semantic solidarity between PVs and verbs PVs tendency to be specified by event participants PVs etymologies influence from other languages The book also contributes to casting light on the reasons for PVs grammaticalization and lexicalization These are two distinct reanalyses triggered by the same factor i e the mentioned semantic solidarity which makes PVs be felt as redundant They are thus reassigned salient pieces of information as actional markers grammaticalization or reinterpreted as part of the verb lexicalization *A COURSE IN LINGUISTICS, THIRD EDITION* PRASAD, TARNI, 2019-07-01 This compact and student friendly text now in its Third Edition continues to cover in a single volume the diverse aspects of Linguistics such as phonetics phonology morphology syntax semantics historical linguistics and language families It also deals in detail with Applied Linguistics Sociolinguistics Psycholinguistics and Stylistics Written in a clear and easy to understand style this book is thoroughly practical and should be of great help to students in understanding the basic concepts with ease The third edition incorporates a new chapter on Cognitive Linguistics an interdisciplinary branch which explains the mental processes involving language acquisition storage comprehension of speech production of speech and writing The book is intended as a text for senior undergraduate and postgraduate students BA Hons and MA of English and undergraduate and postgraduate students BA Hons and MA of Linguistics In addition this book would be of great help to all those who wish to have a general knowledge of English linguistics KEY FEATURES All the concepts of linguistics are discussed in a single book Linguistic concepts are explained in detail with examples diagrams and tables for better comprehension of the subject TARGET AUDIENCE BA Hons English MA English BA Hons Linguistics MA Linguistics
