codependent behavior has changed and provides a new generation with a road map to wellness The question remains What is and what is not codependency Beattie here reminds us that much of codependency is normal behavior It s about crossing lines There are times we do too much care too much feel too little or overly engage Feeling resentment after giving is not the same as heartfelt generosity Narcissism and self love enabling and nurturing and controlling and setting boundaries are not interchangeable terms In The New Codependency Beattie explores these differences effectively invoking her own inspiring story and those of others to empower us to step out of the victim role forever Codependency she shows is not an illness but rather a series of behaviors that once broken down and analyzed can be successfully combated Each section offers an overview of and a series of activities pertaining to a particular behavior caretaking controlling manipulation denial repression etc enabling us to personalize our own step by step guide to wellness These sections in conjunction with a series of tests allowing us to assess the level of our codependent behavior demonstrate that while it may not seem possible now we have the power to take care of ourselves no matter what we are experiencing
