

Coding for Pediatric Preventive Care

NOTE: This resource contains comprehensive listings of codes that may not be used by your practice on a regular basis. We recommend that you identify the codes most relevant to your practice and include those on your encounter form/billing sheet.

Following are the *Current Procedural Terminology (CPT®)*, Healthcare Common Procedure Coding System (HCPCS) Level II, and *International Classification of Diseases, Ninth Revision, Clinical Modification (ICD-9-CM)* codes most commonly reported by pediatricians in providing preventive care services. It is strongly recommended that the pediatrician, *not* the staff, select the appropriate code(s) to report.

[A] Preventive Medicine Service Codes

- To report the appropriate preventive medicine service code, first determine if the patient qualifies as new or established (defined in the next 2 sections), then select the appropriate code within the new or established code family based on patient age.
- Preventive medicine service codes are not time-based; therefore, time spent during the visit is not relevant in selecting the appropriate code.
- If an illness or abnormality is encountered or a preexisting problem is addressed in the process of performing the preventive medicine service, and if the illness, abnormality, or problem is significant enough to require additional work to perform the key components of a problem-oriented evaluation and management (E/M) service (history, physical examination, medical decision-making), the appropriate office or other outpatient service code (**99201–99215**) should be reported in addition to the preventive medicine service code. Modifier **25** should be appended to the office or other outpatient service code to indicate that a significant, separately identifiable E/M service was provided by the same physician on the same day as the preventive medicine service.
- An insignificant or trivial illness, abnormality, or problem encountered in the process of performing the preventive medicine service that does not require additional work and performance of the key components of a problem-oriented E/M service should *not* be reported.
- The comprehensive nature of the preventive medicine service codes reflects an age- and gender-appropriate history and physical examination and is *not* synonymous with the comprehensive examination required for some other E/M codes (eg, **99204**, **99205**, **99215**).
- Immunizations and ancillary studies involving laboratory, radiology, or other procedures, or screening tests (eg, vision and hearing screening) identified with a specific *CPT* code, are reported separately from the preventive medicine service code.

[B] Preventive Medicine Services: New Patients

Initial comprehensive preventive medicine E/M of an individual includes an age- and gender-appropriate history; physical examination; counseling, anticipatory guidance, or risk factor reduction interventions; and the ordering of laboratory or diagnostic procedures.
