Cognitive Neuroscience Of Emotion Series In Affective Science:

Cognitive Neuroscience of Emotion Richard D. Lane, Lynn Nadel, 2002-04-04 This book a member of the Series in Affective Science is a unique interdisciplinary sequence of articles on the cognitive neuroscience of emotion by some of the most well known researchers in the area It explores what is known about cognitive processes in emotion at the same time it reviews the processes and anatomical structures involved in emotion determining whether there is something about emotion and its neural substrates that requires they be studied as a separate domain Divided into four major focal points and presenting research that has been performed in the last decade this book covers the process of emotion generation the functions of amygdala the conscious experience of emotion and emotion regulation and dysregulation Collectively the chapters constitute a broad but selective survey of current knowledge about emotion and the brain and they all address the close association between cognitive and emotional processes By bringing together diverse strands of investigation with the aim of documenting current understanding of how emotion is instantiated in the brain this book will be of use to scientists researchers and advanced students of psychology and neuroscience

Handbook of Affective Sciences Richard J Davidson, Klaus R Sherer, H. Hill Goldsmith, 2009-05-21 One hundred stereotype maps glazed with the most exquisite human prejudice especially collected for you by Yanko Tsvetkov author of the viral Mapping Stereotypes project Satire and cartography rarely come in a single package but in the Atlas of Prejudice they successfully blend in a work of art that is both funny and thought provoking The book is based on Mapping Stereotypes Yanko Tsvetkov s critically acclaimed project that became a viral Internet sensation in 2009 A reliable weapon against bigots of all kinds it serves as an inexhaustible source of much needed argumentation and occasionally as a nice slab of paper that can be used to smack them across the face whenever reasoning becomes utterly impossible The Complete Collection version of the Atlas contains all maps from the previously published two volumes and adds twenty five new ones wrapping the best selling series in a single extended edition

Emotion Explained Edmund T. Rolls, 2005 What produces emotions Why do we have emotions How do we have emotions Why do emotional states feel like something This book seeks explanations of emotion by considering these questions Emotion continues to be a topic of enormous scientific interest This new book a successor to *The Brain and Emotion* OUP 1998 describes the nature functions and brain mechanisms that underlie both emotion and motivation *Emotion Explained* goes beyond examining brain mechanisms of emotion by proposing a theory of what emotions are and an evolutionary Darwinian theory of the adaptive value of emotion It also shows that there is a clear relationship between motivation and emotion The book also examines how cognitive states can modulate emotions and in turn how emotions can influence cognitive states It considers the role of sexual selection in the evolution of affective behaviour It also examines emotion and decision making with links to the burgeoning field of neuroeconomics The book is also unique in considering emotion at several levels the neurophysiological neuroimaging neuropsychological behavioural and computational neuroscience levels

The Nature of

Emotion Andrew S. Fox, Regina C. Lapate, Alexander J. Shackman, Richard J. Davidson, 2018-08-23 Building on the legacy of the groundbreaking first edition the Editors of this unique volume have selected more than 100 leading emotion researchers from around the world and asked them to address 14 fundamental questions about the nature and origins of emotion For example What is an emotion How are emotions organized in the brain How do emotion and cognition interact How are emotions embodied in the social world How and why are emotions communicated How are emotions physically embodied What develops in emotional development At the end of each chapter the Editors Andrew Fox Regina Lapate Alexander Shackman and Richard Davidson highlight key areas of agreement and disagreement In the final chapter The Nature of Emotion A Research Agenda for the 21st Century the Editors outline their own perspective on the most important challenges facing the field today and the most fruitful avenues for future research Not a textbook offering a single viewpoint The Nature of Emotion reveals the central issues in emotion research and theory in the words of many of the leading scientists working in the field today from senior researchers to rising stars providing a unique and highly accessible guide for students researchers and clinicians

Emotion and Cognition, 2019-06-05 Emotion and Cognition Volume 246 consists of 16 chapters on recent scientific advances in emotion and cognition research The chapters include theoretical review and empirical chapters presenting original data on interactions between emotion and cognition Chapters touch on a variety of topics including Common and different mechanisms underlying the processing of extrinsic and intrinsic emotion Looming fear stimuli broadens attention in a local global letter task Reading thoughts and feelings in other people how age shapes empathic accuracy How does aging influence emotion cognition links and The Motivational Dimensional Model of affect A review of the past 10 years and more Presents the latest research on the interaction between emotion and cognition Uniquely focuses on how these supposedly different aspects interact Contains contributions from world renowned experts on emotion and cognition research

Feelings and Emotions Antony S. R. Manstead, Nico Frijda, Agneta Fischer, 2004-04-05 Emotions are central to human behavior and experience Yet scientific theory and research ignored emotions during most of the twentieth century This situation changed dramatically during the last 30 years of that century which witnessed an upsurge of interest in emotions in a number of disciplines This book arises from the 24 keynote papers presented at a symposium held in June 2001 that had the same title as this volume The aim of that meeting was to review the state of research on emotions from a multidisciplinary perspective Each chapter is authored by an acknowledged authority in the field Together they provide an overview of what is being studied and thought about emotions in disciplines ranging from neurophysiology and experimental psychology to sociology and philosophy

innovations A Choice Outstanding Academic Title Pleasure James A. Russell, 2003 Like mind and consciousness pleasure was all but tabooed in psychology for much of the 20th Century Like those concepts too pleasure is difficult to define or to assess scientifically Still evidence has steadily accumulated that pleasure is involved in all aspects of psychology The simplest sensory experience is tinged with pleasure or displeasure Some although not all planning for the future involves maximizing pleasure Pleasantness is the first factor of mood which is known to influence various cognitive processes In some theories pleasure or displeasure lie at the heart of emotion Articles in this Special Issue take up such issues as these as well as the neurophysiological substrate of pleasure its role in planned behaviour nonconscious pleasure the lay concept of pleasure and whether smiles and laughter are signs of pleasure **Memory and Emotion** Daniel Reisberg, Paula Hertel, 2004 And lastly why is remembering a creative act that can and often does produce faulty memories of our experiences BOOK JACKET

Bridges to Consciousness Nancy M. Krieger, 2013-12-04 This book investigates consciousness as an emergent state arising from the global functioning of the brain and the body In this research Krieger applies these concepts to analytical psychology particularly to the constellation of the complex and of the archetype Global brain functioning is considered as a complex system whose macroscopic emergent patterns such as thoughts and behaviours are determined by physical parameters including emotion memory and perception The concept of the feeling toned complex was among the first of the theories to be developed by Jung and the theories of complexity and dynamical systems which subsequently developed in the physical sciences did not exist at the time This book takes a new look at the feeling toned complex as a basin of attraction which competes for consciousness against other complexes to determine behaviour By drawing parallels between current ideas in neuroscience and Jung's more traditional theories Krieger discusses the relevance for both psychotherapy and everyday life *Bridges to Consciousness* considers the importance of the link between emotion and the complex in both the establishment of consciousness and the determination of self esteem making the work relevant to therapists and analysts This book will also awaken interest in complexes in both the Jungian and wider neuroscientific research communities and will therefore interest researchers and academics in the field of psychology who want an insight into how the ideas of Jung can be applied beyond the traditional analytic field Affective Neuroscience Jaak Panksepp, 2004-09-30 Some investigators have argued that emotions especially animal emotions are illusory concepts outside the realm of scientific inquiry However with advances in neurobiology and neuroscience researchers are demonstrating that this position is wrong as they move closer to a lasting understanding of the biology and psychology of emotion In *Affective Neuroscience* Jaak Panksepp provides the most up to date information about the brain operating systems that organize the fundamental emotional tendencies of all mammals Presenting complex material in a readable manner the book offers a comprehensive summary of the fundamental neural sources of human and animal feelings as well as a conceptual framework for studying emotional systems of the brain Panksepp approaches emotions from the perspective of basic emotion theory but does not fail to address the complex issues

raised by constructionist approaches These issues include relations to human consciousness and the psychiatric implications of this knowledge The book includes chapters on sleep and arousal pleasure and fear systems the sources of rage and anger and the neural control of sexuality as well as the more subtle emotions related to maternal care social loss and playfulness Representing a synthetic integration of vast amounts of neurobehavioral knowledge including relevant neuroanatomy neurophysiology and neurochemistry this book will be one of the most important contributions to understanding the biology of emotions since Darwins The Expression of the Emotions in Man and Animals

D'Mello, 2011-07-15 This monograph integrates theoretical perspectives on affect and learning with recent research in affective computing with an emphasis on building new learning technologies The new perspectives come from the intersection of several research themes Basic research on emotion cognition and motivation applied to learning environments Pedagogical and motivational strategies that are sensitive to affective and cognitive processes Multimodal Human Computer Interfaces with a focus on affect recognition and synthesis Recent advances in affect sensitive Intelligent Tutoring Systems Novel methodologies to investigate affect and learning Neuroscience research on emotions and learning

Synaesthesia Michael Banissy, Roi Cohen Kadosh, Clare Jonas, 2015-10-07 Synaesthesia is a rare experience in which one property of a stimulus evokes a secondary experience that is not typically associated with the first e g hearing words can evoke tastes In recent years a number of studies have highlighted the authenticity of synaesthesia and attempted to use the experience to inform us about typical processes in perception and cognition This Research Topic brings together research on synaesthesia and typical cross modal interactions to discuss the mechanisms of synaesthesia and what it can tell us about typical perceptual processes Topics include but are not limited to the neurocognitive mechanisms that give rise to synaesthesia the extent to which synaesthesia does does not share commonalities with typical cross modal correspondences broader cognitive and perceptual consequences that are linked to synaesthesia and perspectives on the origins defining characteristics of synaesthesia

Affect and Artificial Intelligence Elizabeth A. Wilson, 2011-03-01 In 1950 Alan Turing the British mathematician cryptographer and computer pioneer looked to the future now that the conceptual and technical parameters for electronic brains had been established what kind of intelligence could be built Should machine intelligence mimic the abstract thinking of a chess player or should it be more like the developing mind of a child Should an intelligent agent only think or should it also learn feel and grow Affect and Artificial Intelligence is the first in depth analysis of affect and intersubjectivity in the computational sciences Elizabeth Wilson makes use of archival and unpublished material from the early years of AI 1945 70 until the present to show that early researchers were more engaged with questions of emotion than many commentators have assumed She documents how affectivity was managed in the canonical works of Walter Pitts in the 1940s and Turing in the 1950s in projects from the 1960s that injected artificial agents into psychotherapeutic encounters in chess playing machines from the 1940s to the

present and in the Kismet sociable robotics project at MIT in the 1990s
