**Darwin the Writer** George Levine, 2011-06-30 Charles Darwin's *On the Origin of Species* arguably the most important book written in English in the nineteenth century transformed the way we looked at the world It is usually assumed that this is because the idea of evolution was so staggeringly powerful Prize winning author George Levine suggests that much of its influence was due in fact to its artistry to the way it was written Alive with metaphor vivid descriptions twists hesitations personal exclamations and humour the prose is imbued with the sorts of tensions ambivalences and feelings characteristic of great literature Although it is certainly a work of science the *Origin* is equally a work of literature at home in the company of celebrated Victorian novels such as *Middlemarch* and *Bleak House* books that give us a unique yet recognisable sense of what the world is really like while not being literally true Darwin's enormous cultural success Levine contends depended as much on the construction of his argument and the nature of his language as it did on the power of his ideas and his evidence By challenging the dominant reading of his work this impassioned and energetic book gives us a Darwin who is comic rather than tragic ebullient rather than austere and who takes delight in the wild and fluid entanglement of things

**Darwin's Sciences** Duncan Porter, Peter Graham, 2015-08-03 A complete scientific biography of Darwin that takes into account the latest research findings both published and unpublished on the life of this remarkable man Considered the first book to thoroughly emphasize Darwin's research in various fields of endeavor what he did why he did it and its implications for his time and ours Rather than following a strictly chronological approach a narrative choice that

characteristically offers an ascent to *On the Origin of Species* 1859 with a rapid decline in interest following its publication and reception this book stresses the diversity and full extent of Darwin's career by providing a series of chapters centering on various intellectual topics and scientific specializations that interested Darwin throughout his life. Authored by academics with years of teaching and discussing Darwin, *Darwin's Sciences* is suited to any biologist who is interested in the deeper implications of Darwin's research. *Darwin: A Companion - With Iconographies* By John Van Wyhe, Paul Van Helvert, John Van Wyhe, 2021-01-12. This is a book that required a great many research hours, the kind of volume you may be glad someone took the time to compile. *The Quarterly Review of Biology*. This is the ultimate guide to the life and work of Charles Darwin. The result of decades of research through a vast and daunting literature which is hard for beginners and experts alike to navigate, it brings together widely scattered facts including very many unknown to even the most ardent Darwin aficionados. It includes hundreds of new discoveries and corrections to the existing literature. It provides the most complete summaries of his publications, manuscripts, lifetime itinerary, finances, personal library, friends and colleagues, opponents, visitors to his home, anniversaries, hundreds of flora, fauna, monuments and places named after him, and a host of other topics. Also included are the most complete lists, iconographies ever created, of illustrations of the *Beagle*, over 1000 portraits of Darwin, his wife and home, as well as all known Darwin photographs, stamps and caricatures. The book is richly illustrated with 350 images, most previously unknown. *Darwin, Darwinism and Conservation in the Galapagos Islands* Diego Quiroga, Ana Sevilla, 2016-10-03. The book explores how Darwin's legendary and mythologized visit to the Galapagos affected the socioecosystems of the Islands as well as the cultural and intellectual traditions of Ecuador and Latin America. It highlights in what way the connection between Darwin and the Galapagos has had real, enduring and paradoxical effects in the Archipelago. This Twenty Century construct of the Galapagos as the cradle of Darwin's theory and insights triggered not only the definition of the Galapagos as a living natural laboratory but also the production of a series of conservation practices and the reshaping of the Galapagos as a tourism destination with an increasingly important flow of tourists that potentially threaten its fragile ecosystems. The book argues that the idea of a Darwinian living laboratory has been limited by the success of the very same constructs that promote its conservation. It suggests critical interpretations of this paradox by questioning many of the dichotomies that have been created to understand nature and its conservation. We also explore some possible ways in which Darwin's ideas can be used to better understand the social and natural threats facing the Islands and to develop sustainable and successful management practices. *Flight of the Diamond Smugglers: A Tale of Pigeons, Obsession, and Greed Along Coastal South Africa* Matthew Gavin Frank, 2021-02-23. Unforgettable. An outstanding adventure in its lyrical, utterly compelling and heartbreaking investigations of the world of diamond smuggling. Aimee Nezhukumatathil. For nearly eighty years, a huge portion of coastal South Africa was closed off to the public. With many of its pits now deemed overmined and abandoned, American journalist Matthew Gavin Frank sets out across the infamous Diamond Coast to investigate an illicit

trade that supplies a global market Immediately he became intrigued by the ingenious methods used in facilitating smuggling particularly the illegal act of sneaking carrier pigeons onto mine property affixing diamonds to their feet and sending them into the air Entering Die Sperrgebiet The Forbidden Zone is like entering an eerie ghost town but Frank is surprised by the number of people willing even eager to talk with him Soon he meets Msizi a young diamond digger and his pigeon Bartholomew who helps him steal diamonds It s a deadly game pigeons are shot on sight by mine security and Msizi knows of smugglers who have disappeared because of their crimes For this Msizi blames Mr Lester an evil tall tale figure of mythic proportions From the mining towns of Alexander Bay and Port Nolloth through the halfway desert to Kleinsee s shores littered with shipwrecks Frank investigates a long overlooked story Weaving interviews with local diamond miners who raise pigeons in secret with harrowing anecdotes from former heads of security environmental managers and vigilante pigeon hunters Frank reveals how these feathered bandits became outlaws in every mining town Interwoven throughout this obsessive quest are epic legends in which pigeons and diamonds intersect such as that of Krishna s famed diamond Koh i Noor the Mountain of Light and that of the Cherokee serpent Uktena In these strange connections where truth forever tangles with the lore of centuries past Frank is able to contextualize the personal grief that sent him with his wife Louisa in the passenger seat on this enlightening journey across parched lands Blending elements of reportage memoir and incantation *Flight of the Diamond Smugglers* is a rare and remarkable portrait of exploitation and greed in one of the most dangerous areas of coastal South Africa With his sovereign prose and insatiable curiosity Matthew Gavin Frank reminds us that the world is a place of wonder if only we look Toby Muse     [Antipodean America](#) Paul Giles,2013-12-11 Although North America and Australasia occupy opposite ends of the earth they have never been that far from each other conceptually The United States and Australia both began as British colonies and mutual entanglements continue today when contemporary cultures of globalization have brought them more closely into juxtaposition Taking this transpacific kinship as his focus Paul Giles presents a sweeping study that spans two continents and over three hundred years of literary history to consider the impact of Australia and New Zealand on the formation of U S literature Early American writers such as Benjamin Franklin Thomas Jefferson Joel Barlow and Charles Brockden Brown found the idea of antipodes to be a creative resource but also an alarming reminder of Great Britain s increasing sway in the Pacific The southern seas served as inspiration for narratives by Washington Irving Edgar Allan Poe and Herman Melville For African Americans such as Harriet Jacobs Australia represented a haven from slavery during the gold rush era while for E D E N Southworth its convict legacy offered an alternative perspective on the British class system In the 1890s Henry Adams and Mark Twain both came to Australasia to address questions of imperial rivalry and aesthetic topsy turvyness The second half of this study considers how Australia s political unification through Federation in 1901 significantly altered its relationship to the United States New modes of transport and communication drew American visitors including novelist Jack London At the same time Americans associated Australia and

New Zealand with various kinds of utopian social reform particularly in relation to gender politics a theme Giles explores in William Dean Howells Charlotte Perkins Gilman and Miles Franklin He also considers how American modernism in New York was inflected by the Australasian perspectives of Lola Ridge and Christina Stead and how Australian modernism was in turn shaped by American styles of iconoclasm After World War II Giles examines how the poetry of Karl Shapiro Louis Simpson Yusef Komunyakaa and others was influenced by their direct experience of Australia He then shifts to post 1945 fiction where the focus extends from Irish American cultural politics Raymond Chandler Thomas Keneally to the paradoxes of exile Shirley Hazzard Peter Carey and the structural inversions of postmodernism and posthumanism Salman Rushdie Donna Haraway Ranging from figures like John Ledyard to John Ashbery from Emily Dickinson to Patricia Piccinini and J M Coetzee *Antipodean America* is a truly epic work of transnational literary history Dinosaurs Without Bones Anthony J.
