*Bibliography of Natural History Travel Narratives* Anne S. Troelstra, 2017-06-01 Anne Troelstra's fine bibliography is an outstanding and ground breaking work He has provided the academic world with a long needed bibliographical record of human endeavour in the field of the natural sciences The travel narratives listed here encompass all aspects of the natural world in every part of the globe but are especially concerned with its fauna flora and fossil remains Such eyewitness accounts have always fascinated their readers but they were never written solely for entertainment fragmentary though they often are these narratives of travel and exploration are of immense importance for our scientific understanding of life on earth providing us with a window on an ever changing and often vanishing natural world Without such records of the past we could not track document or understand the significance of changes that are so important for the study of zoogeography With this book Troelstra gives us a superb overview of natural history travel narratives The well over four thousand detailed entries ranging over four centuries and all major western European languages are drawn from a wide range of sources and include

both printed books and periodical contributions While no subject bibliography by a single author can attain absolute completeness Troelstra s work is comprehensive to a truly remarkable degree The entries are arranged alphabetically by author and chronologically by the year of first publication under the author s name A brief biography with the scope and range of their work is given for each author every title is set in context the contents including illustrations are described and all known editions and translations are cited In addition there is a geographical index that cross refers between authors and the regions visited and a full list of the bibliographical and biographical sources used in compiling the bibliography

Speciocide Robert-Jan Trügg,2023-12-16 In ons dagelijks leven lopen velen van ons eraan voorbij We lezen vaak dat verschillende dier en plantsoorten verdwijnen er wordt over gepraat maar we zien het niet We staan er dan ook nauwelijks bij stil bij het uitsterven van dier en plantsoorten Zonder overdrijving is er op dit moment sprake van de zesde grote uitstervingsgolf We denken dat we een verdwenen dier plant of insect niet direct missen maar door het verdwijnen van n soort ook al lijkt het maar een weinig spectaculair plantje kan een heel ecosysteem in onbalans raken De oorzaak van de eerdere uitstervingsgolven waren bijvoorbeeld uitgebarsten vulkanen gevallen asteroïdes of bulderende tsunami s Deze zesde uitstervingsgolf wordt veroorzaakt door de mens Wij zorgen ervoor dat soorten bijna uitsterven wij plegen speciocide En gek genoeg lijken we niet te beseffen dat wij zelf door het plegen van die speciocide k kunnen verdwijnen Het uitsterven van soorten moet stoppen Van elke soort want voor we het weten begaan we grootste idiotie die de mens maar k n begaan speciocide op onszelf In twintig lotgevallen vertelt Robert Jan Trügg hoe verschillende dier en plantsoorten door toedoen van de mens bijna het loodje legden en nooit volledig zullen terugkomen Onder meer de speciocides op de atlasleeuw de blauwgrijze ara de gouden pad en de Chinese vlagdolfijn krijgen in dit boek een podium

**Living with Wildlife** Margje Marieke Voeten, 1999 This thesis also shows that the animals move to their wet season range because only there they can satisfy all their nutritional needs which are high at this time of the year since the females are lactating Their movement back to the dry season range however is related to water requirements Furthermore a clipping experiment was performed to investigate if the dry season range of migratory wildebeest and zebra could sustain current populations year round when access to the wet season range would be restricted The results indicate that clipping had a positive effect on forage quality but that the mineral concentrations were still not sufficient to meet herbivore nutrient requirements while clipping also reduced the annual forage production to insufficient levels The results of this study can be put to use in present land use issues related to the integration of wildlife conservation and development of pastoral areas
