Frankl and Modern American Design Christopher Long,2007-01-01 A comprehensive view of the life work and ideas of one of the creative giants of modern American design Arriving in the United States in 1914 Viennese born Paul T Frankl 1886 1958 brought with him an outsider s fresh perspective and an enthusiasm for forging a uniquely American design aesthetic In the years between the two world wars he more than any other designer helped shape the distinctive look of American modernism This authoritative book draws on an extensive collection of unpublished documents and family papers and photographs to provide the first full account of Frankl s life and ideas The book also explores the history of modern American design and the extent of Frankl s influence on its trajectory In the early 1920s

Frankl opened a New York City shop that became an epicenter of American modernism. Over the next decades his work encompassed everything from individual pieces of furniture and decorative accessories to entire interiors and his style continuously evolved from early Skyscraper furniture to relaxed and casual designs favored by the Hollywood elite in the 1930s to manufactured pieces for the mass market in the 1950s. The book charts the impact of Frankl's ideas on merchants and consumers, on his fellow designers, and on the changing look of American homes and workplaces. With close to 170 illustrations, Paul T. Frankl and *Modern American Design* is an essential reference on 20th-century design.

Partners in Design David A. Hanks, 2015-10-27. The 1920s and 1930s saw the birth of modernism in the United States, a new aesthetic based on the principles of the Bauhaus in Germany: its merging of architecture with fine and applied arts and rational functional design devoid of ornament and without reference to historical styles. Alfred H. Barr Jr., the then 27-year-old founding director of the Museum of Modern Art, and 23-year-old Philip Johnson, director of its architecture department, were the visionary young proponents of the modern approach. Shortly after meeting at Wellesley College, where Barr taught art history and as Johnson finished his studies in philosophy at Harvard, they set out on a path that would transform the museum world and change the course of design in America. The Museum of Modern Art opened just over a week after the stock market crash of 1929. In the depths of the Depression, using as their laboratories both MoMA and their own apartments in New York City, Barr and Johnson experimented with new ideas in museum ideology, extending the scope beyond painting and sculpture to include architecture, photography, graphic design, furniture, industrial design, and film, with exhibitions of ordinary machine-made objects including ball bearings and kitchenware elevated to art by their elegant design and with installations in dramatically lit galleries with smooth white walls.

Partners in Design, which accompanies an exhibition opening at the Montreal Museum of Fine Arts in April 2016, chronicles their collaboration, placing it in the larger context of the avant-garde in New York in the 1930s salons where they mingled with Julien Levy, the gallerist who brought Surrealism to the United States, and Lincoln Kirstein, co-founder of the New York City Ballet, their work to help Bauhaus artists like Josef and Anni Albers escape Nazi Germany and the dissemination of their ideas across the United States through MoMA's traveling exhibition program. Plentifully illustrated with icons of modernist design, MoMA installation views, and previously unpublished images of the Barr and Johnson apartments, domestic laboratories for modernism and in Johnson's case designed and furnished by Ludwig Mies van der Rohe, this fascinating study sheds new light on the introduction and success in North America of a new kind of modernism thanks to the combined efforts of two uniquely discerning and influential individuals.
