Portney, 2009 Some time ago I coined the term seminar speaking success as a simple yet broad way of talking about doing public speaking seminars workshops client appreciation events any kind of group event If there are people gathered and you or someone else is speaking to that group then that falls under the category of my term seminar speaking Why do I add the word success to the end of that phrase It's because the reality is that public speaking seminars and group events of all kinds are proving themselves to be one of the very few remaining viable and cost effective ways to promote your business product service cause or issue If you want to get your message in front of people inexpensively and effectively your choices are shrinking quickly and 129 More Seminar Speaking Success Tips will show you how to market yourself and your business easily and profitably

Best Practices for Teaching Beginnings and Endings in the Psychology Major Dana S. Dunn, Bernard B. Beins, Maureen A. McCarthy, G. William Hill, IV, 2010-01-12 Introductory and capstone experiences in the undergraduate psychology program are crucial ways to engage

students in their major and psychology department impart realistic expectations and prepare them for life beyond college. Providing the right orientation and capstone courses in psychology education is increasingly a concern of instructors, department chairs, program directors and deans, and both types of courses have become important sources for gathering pre and post coursework assessment data for degree learning outcomes. The strategies presented here have been designed to help educators examine issues around teaching the introductory or careers course and developing a psychology specific orientation program. The authors also provide concrete suggestions for building capstone experiences designed to fit the needs of a department, its pedagogical philosophy, or the educational agenda of the college or university. Undergraduate psychology curriculum designers and instructors can benefit from learning innovative and effective strategies for introducing the major to first year students and at graduation for bringing closure, reinforcing the overall departmental learning outcomes, and helping students apply their disciplinary knowledge in capstone experiences and post graduate life. In this collection of articles, psychology instructors involved in the improvement of teaching and learning review the research and share their own successes and challenges in the classroom. Discussions include effective practices for helping students become acclimated to and engaged in the psychology major, application of developmental knowledge and learning communities to course design, and use of quality benchmarks to improve introductory and capstone courses. Other chapters describe innovations in the design of stand alone courses and offer concrete advice on counseling psychology graduates about how to use what they have learned beyond their higher education experiences.

The Figure of Knowledge Sebastiaan Loosen, Rajesh Heynicks, Hilde Heynen, 2020-10-01. It is a major challenge to write the history of post WWII architectural theory without boiling it down to a few defining paradigms. An impressive anthologising effort during the 1990s charted architectural theory mostly via the various theoretical frameworks employed, such as critical theory, critical regionalism, deconstructivism, and pragmatism. Yet the intellectual contours of what constitutes architectural theory have been constantly in flux. It is therefore paramount to ask what kind of knowledge has become important in the recent history of architectural theory and how the resulting figure of knowledge sets the conditions for the actual arguments made. The contributions in this volume focus on institutional, geographical, rhetorical, and other conditioning factors. They thus screen the unspoken rules of engagement that postwar architectural theory ascribed to.
