D. Th D.,2012-04 I accepted Jesus Christ as my personal Lord and Savior on January 13 1986 Since that

life changing day I have heard read about and observed many spiritual struggles in Christians lives including Christian leaders such as pastors evangelists missionaries deacons teachers elders administrators and bishops I feel strongly in my spirit that many are grieving the Holy Spirit in more ways than one and I am no exception The list of how we are grieving the Spirit is exhaustive however I will mention some key areas where we have been failing consistently 1 Not loving God as we ought 2 Not fearing God as we ought 3 Turning God into a God of Convenience 4 Not reading the Word Bible daily 5 Failing to pray for self and others 6 Breaking promises 7 Not tithing regularly 8 Being a false witness 9 Choosing to be selfish and self centered 10 Not being thankful and not showing appreciation 11 Taking God and others for granted 12 Presenting ourselves as holy and righteous 13 Judging others constantly 14 Entertaining and encouraging gossip 15 Not practicing humility The Holy Spirit inspired me to write this book first to myself as an eye opening experience Yet I realize I am not the only one dealing with the issues mentioned above Thousands of people possibly more may be experiencing the same things I have been facing Therefore let us learn to be patient kind tolerant and understanding of one another and instead of judging one another in an ungodly manner let us learn to appreciate respect and accept each other despite our disagreements and differences With that in mind consider the following Scripture Verse from the New Testament And do not grieve the Holy Spirit of God by whom you were sealed for the day of redemption Ephesians 4:30 Thank You and God Bless

**Informed Consent** S. Wear, 2012-12-06 Substantial efforts have recently been made to reform the physician patient relationship particularly toward replacing the silent world of doctor and patient with informed patient participation in medical decision making This new ethos of patient autonomy has especially insisted on the routine provision of informed consent for all medical interventions Strongly supported by most bioethicists and the law as well as more popular writings and expectations it still seems clear that informed consent has at best been received in a lukewarm fashion by most clinicians many simply rejecting what they commonly refer to as the myth of informed consent The purpose of this book is to defuse this seemingly intractable controversy by offering an efficient and effective operational model of informed consent This goal is pursued first by reviewing and evaluating in detail the agendas arguments and supporting materials of its proponents and detractors A comprehensive review of empirical studies of informed consent is provided as well as a detailed reflection on the common clinician experience with attempts at informed consent and the exercise of autonomy by patients In the end informed consent is recast as a management tool for pursuing clinically and ethically important goods and values that any clinician should see as meriting pursuit Concurrently the model incorporates a flexible anticipatory approach that recognizes that no static generic ritual can legitimately pursue the quite variable goods and values that may be at stake with different patients in different situations Finally efficiency of provision is addressed by not pursuing the unattainable and ancillary Throughout the traditional principle of beneficence is appealed to toward articulating an operational model of informed consent as an intervention that is likely to change outcomes at the bedside for the better *JAMES FENIMORE COOPER - Ultimate Collection: 30+ Adventure Novels, Western Classics & Sea Tales; Including Travel Sketches, Historical Writings and*
