in the Early Modern Period** Karen Bennett,Angelo Cattaneo,2022-04-25 In the fifteenth and sixteenth centuries the  
linguistic situation in Europe was one of remarkable fluidity Latin the great scholarly lingua franca of the medieval period  
was beginning to crack as the tectonic plates shifted beneath it but the vernaculars had not yet crystallized into the national  
languages that they would later become and multilingualism was rife Meanwhile elsewhere in the world languages were  
coming into contact with an intensity that they had never had before influencing each other and throwing up all manner of  
hybrids and pidgins as peoples tried to communicate using the semiotic resources they had available Of interest to linguists  
literary scholars and historians amongst others this interdisciplinary volume explores the linguistic dynamics operating in  
Europe and beyond in the crucial centuries between 1400 and 1800 Assuming a state of individual societal and functional  
multilingualism when codeswitching was the norm and languages themselves were fluid unbounded and porous it explores  
the shifting relationships that existed between various tongues in different geographical contexts as well as some of the  
myths and theories that arose to make sense of them **Historical Abstracts** ,1984 Vols 17 18 cover 1775 1914
