The Romantic Lives of Emerging Adults Varda Konstam, 2019-01-31 The romantic lives of emerging adults are often baffling and contradictory While they prize committed and authentic relationships they appear to be reluctant participants They prefer to foster ambiguity in their romantic relationships even as they value honesty and clarity There is at once a valuing of long term as well as a decentering of romantic relationships Although our current understanding is incomplete this text grapples with these perplexing questions In attempting to understand emerging adults and their

romantic lives researchers must consider the challenging economic conditions in which today's emerging adults find themselves. With an emphasis on commitment and sacrifice and their centrality to one's readiness for a long-term relationship, this book reviews the main milestones in transitioning from an I identity to a we identity and discusses the concepts of choice and risk. Further, the book examines structures such as asymmetrically committed relationships, cohabitation, and marriage through the lens of commitment, risk, and risk avoidance. Probing extensively into the romantic lives of emerging adults, their attitudes, values, and expectations, this text examines some of the developmental and contextual realities against which romantic attachment must be viewed. Critical topics such as casual and sexual experiences and relationships, integration of work and love, breakups, marriage, going solo, and social media and its influences are considered. The commonality and the individuality of the emerging adults presented throughout this text contribute to a rich understanding of emerging adults and how they live and love.

Understanding the Life Course Lorraine Green, 2016-12-20. *Understanding the Life Course* provides a uniquely comprehensive guide to the entire life course from an interdisciplinary perspective. Combining important insights from sociology and psychology, the book presents the concepts, theoretical underpinnings, in an accessible style supported by real-life examples. From birth and becoming a parent to death and grieving for the loss of others, Lorraine Green explores all stages of the life course through key research studies and theories in conjunction with issues of social inequality and critical examination of lay viewpoints. She highlights the many ways the life course can be interpreted, including themes of linearity and multidirectionality, continuity and discontinuity, and the interplay between nature and nurture. The second edition updates key data and includes additional material on topics such as new technologies, changing markers of transitions to adulthood, active ageing, resilience, and neuropsychology. This comprehensive approach will continue to be essential reading for students on vocational programmes such as social work and nursing and will provide thought-provoking insight into the wider contexts of the life course for students of psychology and sociology.
