SAP is a great software One needs to fully understand its features in order to effectively exploit them for the benefit of customers Mr Agrawal's books on SAP HR have a unique approach A chapter usually focuses on a single business concept and discusses the user interface as well as its associated configuration This logical division makes it easier for readers to understand the functionality Another important feature of these books is

the level of detail Each screen and each field in a screen is explained Explanation includes meaning use case and in some cases guidelines Details are balanced by overviews explaining the concepts and their relationships While explaining functionality Mr Agrawal has taken efforts to highlight what can be done and how it is to be done This is particularly important for less experienced users and consultants Indicating chapter numbers against each menu and configuration item is a very useful innovation as it establishes direct link between the SAP system and the book Another useful feature is that these books can be read not only by consultants but also by users business process owners and even by senior managers The importance of each topic for each category of users is specified Mr Agrawal has taken considerable pain in writing these books and I congratulate Mr Agrawal on his achievement and thank him for his contribution to the SAP community K Sanjai Regional Head Asia Pacific Japan SAP Global Delivery

*Human Resources and Tourism* Darren Lee-Ross, Josephine Pryce, 2010-05-07 The tourism industry provides employment for literally millions of individuals Despite global recessions terrorist attacks and other catastrophes this is likely to remain unchanged in the long term Resilience of this nature helps tourism remain a major global employer in both developed and emerging economies The important role played by tourism workers cannot be overstated some argue that they actually define the product on offer Accordingly mediocre or poor performance gives rise to an unremarkable service experience or one to which customers would not return willingly The inextricable link between the calibre and performance of staff and service delivery is a key issue for human resources management This challenge is further complicated by a number of structural characteristics including dominance of unaffiliated small to medium sized organizations high levels of labour turnover and a heterogeneous workforce with individuals having a wide variety of cultural differences and employment aspirations This book accounts for the above factors using an approach which is part prescriptive and part enquiry or research oriented In doing so espoused HRM convention may be understood against HRM in practice Additionally by using this method we hope to instil a sense of enquiry in the reader This is a necessary intellectual asset for the future and will also allow the individual to make a positive contribution in the workplace

*Paths between Peace and Public Service* Jürgen René Blum, Marcos Ferreiro-Rodríguez, Vivek Srivastava, 2018-12-28  
Building a capable public service is fundamental to postconflict state building Yet in postconflict settings short term pressures often conflict with this longer term objective To ensure peace and stabilize fragile coalitions the imperative for political elites to hand out public jobs and better pay to constituents dominates merit Donor financed projects that rely on technical assistants and parallel structures rather than on government systems are often the primary vehicle for meeting pressing service delivery needs What then is a workable approach to rebuilding public services postconflict *Paths between Peace and Public Service* seeks to answer this question by comparing public service reform trajectories in five countries Afghanistan Liberia Sierra Leone South Sudan and Timor Leste in the aftermath of conflict The study seeks to explain these countries different trajectories through process tracing and structured focused methods of comparative analysis To reconstruct reform trajectories the report draws on more than 200 interviews conducted with government officials and other stakeholders as well as administrative data The study analyzes how reform trajectories are influenced by elite bargains and highlights their path dependency shaped by preconflict legacies and the specifics of the conflict period As the first systematic study on postconflict public service reforms it identifies lessons for the future engagement of development partners in building public services Rebuilding the bureaucracy is possibly the most underappreciated policy and research question in fragile states today This is one of the most politically astute and thoughtful books I ve read on postconflict policy making of any kind Christopher Blattman Ramalee E Pearson Professor of Global Conflict Studies Pearson Institute for the Study and Resolution of Global Conflicts Harris Public Policy University of Chicago Rebuilding states after conflict is the greatest challenge in development today And yet we know precious little about the actual experience of countries that have tried to rebuild their civil service and restore public services This is a monumental study based on extensive empirical data and field based research across multiple cases that actually opens up the black box of state building in conflict affected countries It should be required reading for anyone who takes on this extraordinary challenge Joel S Hellman Dean Edmund A Walsh School of Foreign Service Georgetown University There isn t a more pressing problem in international development than formulating practical strategies for building institutions in fragile states This book is a remarkable distillation of the frontline experiences of the World Bank in tackling this task Finally we have the basis for an empirically grounded assessment of what works and why Unputdownable James Robinson Reverend Dr Richard L Pearson Professor of Global Conflict and University Professor Institute Director Pearson Institute for the Study and Resolution of Global Conflicts Harris Public Policy University of Chicago *Embracing Machines and Humanity Through Cognitive Computing and IoT* Mohammed Usman, Xiao-Zhi Gao, 2023-03-01 This book sheds light on systems that learn extensively with purpose and naturally interact with humans
