Cultural Encounters in Translated Children s Literature offers a detailed and innovative model of analysis for examining the complexities of translating children s literature and sheds light on the interpretive choices at work in moving texts from one culture to another The core of the study addresses the issue of how images of a nation locale or country are constructed in translated children s literature with the translation of Australian children s fiction into French serving as a case study Issues examined include the selection of books for translation the relationship between children s books and the national and international publishing industry the packaging of translations and the importance of titles blurbs and covers the linguistic and stylistic features specific to translating for children intertextual references the function of the translation in the target culture didactic and pedagogical aims euphemistic language and explicitation and literariness in translated texts The findings of the case study suggest that the most common constructs of Australia in French translations reveal a preponderance of

traditional Eurocentric signifiers that identify Australia with the outback the antipodes the exotic the wild the unknown the void the end of the world the young and innocent nation and the Far West Contemporary signifiers that construct Australia as urban multicultural Aboriginal worldly and inharmonious are seriously under represented The study also shows that French translations are conventional conservative and didactic showing preference for an exotic rather than local specificity with systematic manipulation of Australian referents betraying a perception of Australia as antipodean rural exoticism The significance of the study lies in underscoring the manner in which a given culture is constructed in another cultural milieu especially through translated children s literature     *Narratives of Child Neglect in Romantic and Victorian Culture* G.

Benziman,2011-11-22 Contextualizing the topos of the neglected child within a variety of discourses this book challenges the assumption that the early nineteenth century witnessed a clear transition from a Puritan to a liberating approach to children and demonstrates that oppressive assumptions survive in major texts considered part of the Romantic cult of childhood     A

range of eighteenth century texts in which the exploration of lingua incognita figures as a prominent topos Drawing mostly on a corpus of French texts but also including a number of works in English Martin Calder attempts to realign well known texts with more canonically marginalized works The originality of the perspectives offered by this book lies in the comparative reading of works not previously conjoined Encounters with otherness are marked by a transgression of the limits of language occurring when language becomes alien or unfamiliar Alterity may take various forms a foreign language a familiar language marked by the traits of foreignness something unrecognizable as language or even one s own language breaking down as in madness Unfamiliar language may be produced by a foreigner by a child who cannot yet speak in extreme cases by something unrecognizably human in all cases by an agency somehow marked by difference Narratives of encounters with otherness have written into them narratives of the discovery of the self Implicitly informed by the reading techniques associated with literary theory Encounters with the Other offers an insightful commentary on issues surrounding colonialism cultural difference gender and the importance of language to identity Martin Calder s work challenges certain Eurocentric notions and exposes the problematic links between Enlightenment rationality and colonial expansion This book is of interest both to undergraduate students and to academic researchers and to a more general readership concerned with

understanding the relationship between Europe the West and a wider world     *Challenging the Phenomena of Technology*  
M. Hayler,2015-05-07 What is technology What does it help us to do What does it force us to consider about our experience of being in the world In Challenging the Phenomena of Technology technology is positioned as an experience with specific features rather than as a class of objects and this enables a reflection on the ways in which amateurs and experts interact with the artefacts that all humans rely upon Using e readers such as the Kindle and iPad as a case study Hayler argues that the use of technology is both more complicated and more human than public discussion often gives it credit for forcing us to consider its impacts on perception cognition and what it means to know anything at all     The Language Encounter in the Americas, 1492-1800 Edward G. Gray,Norman Fiering,2001-01-01 When Columbus arrived in the Americas there were it is believed as many as 2 000 distinct mutually unintelligible tongues spoken in the western hemisphere encompassing the entire area from the Arctic Circle to Tierra del Fuego This astonishing fact has generally escaped the attention of historians in part because many of these indigenous languages have since become extinct And yet the burden of overcoming America s language barriers was perhaps the one problem faced by all peoples of the New World in the early modern era African slaves and Native Americans in the Lower Mississippi Valley Jesuit missionaries and Huron speaking peoples in New France Spanish conquistadors and the Aztec rulers All of these groups confronted America s complex linguistic environment and all of them had to devise ways of transcending that environment a problem that arose often with life or death implications For the first time historians anthropologists literature specialists and linguists have come together to reflect in the fifteen original essays presented in this volume on the various modes of contact and communication that took place between the Europeans and the Natives A particularly important aspect of this fascinating collection is the way it demonstrates the interactive nature of the encounter and how Native peoples found ways to shape and adapt imported systems of spoken and written communication to their own spiritual and material needs     **Writing Metamorphosis in the English Renaissance**

*Psychoanalysis and the Human Sciences* Louis Althusser,2016-09-06 What can psychoanalysis a psychological approach developed more than a century ago offer us in an age of rapidly evolving hard to categorize ideas of sexuality and the self Should we abandon Freud s theories completely or adapt them to new findings and the new relationships taking shape in modern liberal societies In a remarkably prescient series of lectures delivered in the early 1960s the French philosopher Louis Althusser anticipated the challenges that psychoanalytic theory would face as politics moved away from structuralist frameworks and toward the elastic possibilities of anthropological and sociological thought Psychoanalysis and the Human Sciences translates Althusser s remarkable seminars into English for the first time making available to a wider audience the origins and potential future of radical political theory Althusser takes the important step in these lectures of distinguishing

psychoanalysis from psychology and especially psychiatry which long resisted Freud's analytical concepts of the unconscious and overdetermination. By freeing psychoanalysis from this bind, Althusser can then apply these analytical concepts to the social and the political, integrated with Marxist theory. The result is an enlivened methodology for comprehending social organization and change that had a profound influence on the Frankfurt School and scholars who continue to work at the forefront of radical thought today.
