

# BLIND SPOT AWARENESS

Heavy equipment operators inside a cab often have restricted visibility or blind spots. A blind spot means the operator cannot see by direct line of site or by using mirrors.

"Struck by" accidents cause many injuries and accidents every year. Each machine has unique blind spots. Any operator that cannot see a person, vehicle or another object, runs the risk of an accident. Workers on the ground are especially vulnerable to being hit. Follow these safety practices when operating.

Learn the machine's blind spots.

Know what is on the ground, below ground and overhead.

Designate a spotter to help when moving the machine. Make eye contact when possible. Watch for hand signals or use two-way radio communication.

Stop and walk around the machine before backing up.

Follow the work site's specific traffic pattern.

Back up the machine safely.

Wear high visibility safety vests and proper PPE (all worksite personnel).

Get proper training before operating heavy equipment.

Find out how Cat® Simulators can better train operators to increase safety awareness and reduce the chance of an accident.

A fascinating judicial study. The importance of the modern high court's docket is so thoroughly and expertly chronicled in this book: reapportionment, courtroom cameras, personal injury, family law, environmental law, capital punishment, criminal justice, and equal justice under law. Thomas E. Baker, coauthor of *Appellate Courts: Structures, Functions, Processes, and Personnel*. A highly readable portrait of a crucial time in the history of the state high court. It brings to life the jurists and lawyers who contributed so much to contemporary Florida law. Mary Ziegler, author of *After Roe: The Lost History of the Abortion Debate*. A richly sourced, thoroughly researched, and entertaining account of one of the most significant eras in the history of what is arguably the most important and least reported branch of Florida government. Tells not only how the court's decisions impact people's lives but also how the personalities and life experience of new justices lead to evolutions in the law. Martin A. Dyckman, author of *A Most Disorderly Court: Scandal and Reform in the Florida Judiciary*. Necessary reading for anyone interested in law and politics in Florida. Makes historical figures come alive. Jon L. Mills, author of *Privacy in the New Media Age*. This third volume in the history of the Florida Supreme Court describes the court during its most tumultuous years. Amid the upheaval of the civil rights movement, the Vietnam War, and Watergate, the story begins with reform in the Florida court system. It includes the court's first black justice, Joseph Hatchett, Governor Reubin Askew's new system for merit selection of justices, and revision of Article V, the section of the state constitution dealing with the judiciary. Neil Skene details landmark court decisions, the introduction of cameras in court, changes to media law, personal injury law, and family and divorce law, privacy rights, gay rights, death penalty cases, and the appointment of the first female justice, Rosemary Barkett. Shining a light on the often invisible work that informs the law, Skene recognizes lawyers and lower court judges whose arguments and opinions have shaped court rulings. He integrates firsthand stories from justices with documents, articles, and cases. The result is an absorbing portrayal of a judicial institution adapting to a turbulent time of deep political and social change.

**Modern Materials Handling**, 1962     *The Success Formula* Andrew Kakabadse, 2015-03-12

What do successful organizations and smart leaders have in common? They deliver outstanding value to their stakeholders. Interviews with over 80 leading organizations in private, public, and third sectors from all over the world have led Andrew Kakabadse to a fascinating insight: organizations where stakeholder engagement was highest were not those led by charismatic and visionary

leaders but by a culture of delivering outstanding value Through his research he found two different approaches at work In strategy led organizations senior management has a clear notion of how value can be created and enacts a strategy to achieve it with the support of key managers and board members Value delivery led organizations approach value creation differently In these organizations the leadership gathers evidence from internal and external stakeholders to determine the value the organization is delivering today and can deliver in the future A strategy is then put in place to support those findings and is deliberately exposed to challenges from stakeholders to create engagement The Success Formula demonstrates how value delivery led organizations are outperforming their strategy led counterparts and how the world s best organizations deliver value to their stakeholders with examples drawn from Anglo American Deutsche Bank Citibank Jaguar Landrover Microsoft BMW and Alfa Bank This authoritative guide shows leaders how to improve the way they gather meaningful evidence to create a value delivery culture that maximizes the benefits for their organizations and stakeholders
