

DFTouch2: touch screen video terminal

DFTouch2 video terminal is a color graphical with touch screen that can be freely customized; it is suitable for the management of any domotic installation realized with **Domino** bus. The main characteristics of DFTouch2 video terminal are the following:

- Direct connection to **Domino** bus
- 4.3", 16M colors display, 480x272 pixels
- Variable LED back lighting with screen saver timer
- Adjustable contrast
- Internal timekeeper with backup battery
- Up to 80 user pages
- Each page can be customized with a background image and dynamic icons to show the status of the system and to send commands to outputs
- Page change through freely customizable buttons on the screen
- Page change at the occurrence of a status change on an input module on the field; this feature is useful to realize alarm pages
- Built-in beeper with programmable features
- Displaying of temperature values measured by field modules (e.g. DFTA and DFTE), both in numerical and graphical format (bargraph)
- Displaying and editing of date and time on the bus (if DFCK3 or DFCKP modules have been installed)
- Displaying of electrical parameters of the plant measured by DFCC modules
- Sceneries management: DFTouch2 allows to create, edit and save one or more sceneries, thus this operation can be done by the final user without the intervention of the installer. The sceneries can be recalled by buttons on DFTouch2 pages or by buttons on the field. Each scenery can control lights, shutters, awnings, changing the brightness level of dimmer modules, changing the current temperature setpoint of the climatic system and much more
- Screen saver feature after a configurable timeout in the range 10 to 60 seconds
- Alarm clock feature
- Free of charge BDGraph program for a "user friendly" development of the graphical pages
- USB interface for easy and fast uploading of the application and much more

Each page can have a background in bitmap format, therefore easily customizable; moreover, BDGraph development program provides a wide library of symbols.

It is possible to install more than one DFTouch2 video terminal in the same plant.

DFTouch2 housing is suitable for mounting into standard wall box mod. 503. For details about the programming of DFTouch2, refer to the on line help of BDGraph program.

Supplying DFTouch2

DFTouch2 video terminal is supplied by the **Domino** bus.

A single DFPW2 power supply, in a **Domino** system, can supply up to about 50 "generic" modules (in other words the classic input and output modules of **Domino** family). DFTouch2 video terminal has a "weight", in terms of current consumption, equal to 18 generic modules; therefore, take in account this data when designing the plant, in order to install the correct number of DFPW2 modules.

Connections of DFTouch2

A 2-way terminal block on the rear side of DFTouch2 video terminal (+ and -) allows the connection to **Domino** bus.

As said before, DFTouch2 is supplied by the **Domino** bus itself, thus simplifying the installation because only 2 wires are required.
