Bulletin, Chicago School of Sanitary Instruction ... Department of Health ,1922 **Bulletin** Chicago School of Sanitary Instruction,1916 **Is Your Doctor Killing You Slowly?** Dr. Mai Ha,2012-10-03 This book is dedicated to those who seek the truth about total wellbeing and believe they are being slowly killed by their primary care physicians who continue to prescribe copious amounts of drugs for each and every malady We are having a medical crisis Do not wait until the morgue can not process the bodies fast enough to have doubt in the medical system My goal is to inform the general public about the dangers of our fake health care system Most people do not know that the medications their trusted doctor is prescribing them are killing them slowly Our health care model is designed to confuse patients and minimize physician responsibility This book will help you understand how your body works and how YOU can manage your own complete health care not just specific medical conditions such as hypertension high cholesterol diabetes cancer heartburn depression insomnia allergies etc Instead of empowering patients to know more about their illnesses doctors have instilled fear in them and prescribed unnecessary drugs tests and surgeries to justify large medical bills and make the drug companies obscenely

wealthy Doctors get paid well at our expense body and wallet Most of my patients have benefited greatly from my extensive education deep rooted culture diverse background and utmost honesty in teaching them about medicine the way it should be taught basic and true and it was through their inspiration that I wrote this book In truth I feel I had no choice No doctor would dare expose the awful truth regarding our broken medical system for fear their financial status will be compromised My ultimate intention is to help every person maintain an independent mind and body until they breathe their last breath with dignity

on diseases because we are starting late and lagging far behind in this race ponders the cardiac surgeon Dr Chua in his book strongly suggests for parents and society as a whole to practice this novel pre-emptive and proactive health concept even before conception to achieve a healthier family a healthier citizenry and thus a healthier nation Since we have not really significantly succeeded in our war against many diseases over the past half a century the medical community and society as a whole need to seriously re-evaluate of our current conventional strategy in dealing with health and disease prevention if we are to contain if not eradicate the common diseases afflicting man around the world today including hypertension obesity diabetes heart disease stroke and even cancer admonishes the author This pre-emptive health strategy could forever change the role of parents and society in our quest for health well-being happiness and longevity This challenging and stimulating coffee-table book of wisdom is a must-read Every home deserves one
