Doorbraak In Het Oosterscheldebeleid:

Policy Analysis in the Netherlands Frans van Nispen, Peter Scholten, 2018-03-01 This comprehensive study part of the International Library of Policy Analysis edited by Iris Geva May and Michael Howlett brings together for the first time a systemic overview of policy analysis activities in the Netherlands The Netherlands is internationally regarded as one of the front runners of policy analysis and evaluation in Europe This book provides a much needed overview of developments in policy analysis in both academia and practice at various levels of governance It brings together contributions from key scholars as well as from professionals in the field The book captures the diversity of modes of policy analysis which have evolved since the 1970s Above all it provides an overview of the current state of affairs and is as such suitable for anyone who is interested in governance and performance Features of the ILPA series include a systematic study of policy analysis systems by government and non governmental actors a history of the country's policy analysis empirical case studies and a comparative overview a key reference collection for research and teaching in comparative policy analysis and policy studies

Rijkswaterstaat on the horns of a dilemma, 2009 On the one hand it needed its renowned expert status to fulfil its public responsibilities

Managing Environmental Disputes P. Glasbergen, 2012-12-06 The concept of sustainable development is a source of inspiration for many who see it as a call to cooperative action In practice however policies intended to further this goal often generate conflicts of interest The ensuing disputes occur among governmental organizations but disputes also arise between public authorities private interest groups and the environmental movement In the opinion of the authors the fact that environmental policy can provoke such conflict may be attributed largely to decision making procedures in our society Accordingly the authors are convinced that a new approach to managing environmental disputes is needed in order to deal effectively with environmental problems Indeed this book presents a viable alternative which is called network management

Rule and Order Dutch Planning Doctrine in the Twentieth Century A. Faludi, A.J. van der Valk, 1994-02-28 This book is about an art in which the Netherlands excels strategic planning Foreign observers will need little convincing of the merits of Dutch planning They will want to know whether routine explanations small country industrious disciplined people hardened by the perennial fight against the sea hold any water and they will want to know where to look for the bag of tricks of Dutch planners Dutch readers need to be convinced first that planning in the Netherlands is indeed effective before contemplating how this has come about Our message for both is that to the extent that Dutch planners do live in what others are inclined to see as a planners paradise it is a paradise carefully constructed and maintained by the planners themselves This smacks of Bernard Shaw describing a profession as a conspiracy against laity However all knowledge and all technologies are socially constructed meaning that they are the products of people or groups pursuing often conflicting aims and coming to arrangements about what is to pass as true and good So this takes away the odium of Dutch planners having their own agenda Positioning ourselves We are in the business of interpreting Dutch

planning and at the same time committed to improving it This makes us part of the situation which we describe This situation is characterized by the existence of two divergent traditions urban design and the social science discipline called planologie

Guardians of Public Value Arjen Boin, Lauren A. Fahy, Paul 't Hart, 2020-11-12 This open access book presents case studies of twelve organisations which the public have come to view as institutions From the BBC to Doctors Without Borders from the Amsterdam Concertgebouw Orchestra to CERN this volume examines how some organisations rise to prominence and remain in high public esteem through changing and challenging times It builds upon the scholarly tradition of institutional scholarship pioneered by Philip Selznick and highlights common themes in the stories of these highly diverse organizations demonstrating how leadership learning and luck all play a role in becoming and remaining an institution This case study format makes this volume ideal for classroom use and practitioners alike In an era where public institutions are increasingly under threat this volume offers concrete lessons for contemporary organisation leaders

Water Policy

Entrepreneurs Sander Meijerink, 2009 Unsurpassed in the scope of its coverage this book explores like no other the roles of policy entrepreneurs and the causes of policy change across diverse political systems ranging from the developing world to the largest western democracies The studies show how entrepreneurs work with outside donors take advantage of windows of political opportunity create those windows and push the policy process in the direction they hope They also show the limits to these strategies and strategies that tend to fail The book dramatically advances our understanding not only of change and stability in water policy but of the policy process more generally Frank R Baumgartner University of North Carolina US This book is a theoretically and empirically grounded analysis of one of the world's most pressing problems the management of water resources The editors have assembled a remarkable collection of authors with a truly global outlook and an excellent grasp of contemporary water issues as well as modern theories of public policy and decision making The volume also demonstrates excellent applications of policy theory to current and pressing matters It is a must read for students and practitioners in water resources and will be influential to water policy and in environmental resource management and policy for years to come Thomas A Birkland North Carolina State University US This volume is a major achievement It advances our knowledge of stability and change in water policy through case studies from around the world Its focus on transitions instances of really major shifts in policy is particularly welcome at a time when challenges such as climate change force water policy makers to reconsider the very foundations of their regulatory frameworks and infrastructural policies The volume goes beyond water policy however It makes a major contribution to the study of policy dynamics in general by offering an empirically grounded comparative analysis of policy entrepreneurs as change agents in policy networks There has been much loose talk about policy entrepreneurs in the fields of public administration and public policy but a dearth of empirical work underpinning the various claims made This volume goes a long way towards filling that gap Highly recommended for water experts and policy scientists alike Paul 't Hart Australian National University Australia and Utrecht

University the Netherlands This major volume focuses on the role of policy entrepreneurs in revolutionizing water management worldwide Adopting an international comparative perspective the authors explore the changes taking place in water policy across fifteen countries at both the global level and within the European Union Their analysis highlights the importance of groups and individuals in stimulating progress and reveals the crucial part played by policy entrepreneurs Successful entrepreneurs use various strategies to initiate and implement change including the framing and reframing of issues the assembly of coalitions venue shopping and the exploitation of windows of opportunity In showcasing the role of entrepreneurs in achieving transitions and explaining their approach this groundbreaking book presents an optimistic message for those who desire improvements in the way water is managed This book will not only make a unique contribution to the current literature on transition management but will also prove an invaluable tool for those keen to influence water policy management at the regional national and international level It will be of great interest to students and scholars of water resources and environmental management and governance as well as practitioners in the fields of water and climate policy

The Politics of Environmental Discourse Maarten A. Hajer, 1995-12-14 Dr Hajer's path breaking study opens the way for a better understanding of the environmental conflict showing how language can be seen to shape our view of what environmental politics is really about and how those perceptions can differ between countries The author identifies the emergence and increasing political importance of ecological modernization as a new concept in the language of environmental politics This concept which has come to replace the antagonistic debates of the 1970s stresses the opportunities of environmental policy for modernizing the economy and stimulating the technological innovation Combining abstract social theory with detailed empirical analysis Martin Hajer illustrates the social and political dynamics of ecological modernization in a detailed analysis of the acid rain controversies in Great Britain and the Netherlands He concludes by reflecting on the institutional challenge of the environmental politics in the years to come

The Politicisation of Migration Wouter van der Brug, Gianni D'Amato, Didier Ruedin, Joost Berkhout, 2015-03-27 Why are migration policies sometimes heavily contested and high on the political agenda And why do they at other moments and in other countries hardly lead to much public debate The entrance and settlement of migrants in Western Europe has prompted various political reactions In some countries anti immigration parties have gained substantial public support while in others migration policies have been hardly controversial The Politicisation of Migration examines the differences between seven Western European countries by developing a conceptual framework to empirically explain patterns of politicisation and de politicisation The analyses show that over the past decade immigration has been increasingly defined in socio cultural terms and that it has been receiving less political attention since the economic crisis

started in 2007 This book also looks at the role of mainstream parties and political actors in the process of politicisation and demonstrates how the role of challengers is more limited than often assumed Contributing to literatures on migration party politics and agenda setting the book will be of interest to students and scholars in the fields of politics and migration studies
