

Doulas and Intimate Labour: Boundaries, Bodies, and Birth. *Angela N. Casteneda and Julie Johnson Searcy, eds.*, Bradford, Ontario: Demeter Press, 2015, 252 pp.

Hillary Melchior
University of Southern Indiana (adjunct instructor)

Doula care is a sexy topic. Not a week goes by that some sort of media outlet, from National Public Radio to the *New York Times*, isn't publishing something about doulas. Doulas have been around for centuries, but in the United States this descriptive word and accompanying profession was adopted in the 1980s.

While a growing body of scientific literature about doulas does exist, including within the social sciences, until now there hasn't been enough written about the embodied work of being a doula and the tensions and boundaries in the multiplicity of relationships that doulas must navigate. This volume fills that hole, with chapters written mostly by doulas (but researchers and midwives too) who have walked the liminal space between expecting and beginning in a whole host of different contexts including birth, death, and more. Utilizing the medical literature as a springboard, the chapters explore the role of the doula more in depth to discover

what it is like to be a doula and how doulas look at the world.

The chapters approach doulas from a reflexive view, with most of the authors trained as doulas, as well as through their experience-near ethnographic research. The overarching purpose of the book is to not only promote doula work in multiple different contexts and to prove its worth, but also to locate the doula's place within the larger framework of reproduction and birth. Doulas are trained professionals who are neither medical professional nor patient within these settings. Doulas walk the line between the medical and the midwifery care models and bring their own unique viewpoints to every situation that they enter and help their clients navigate.

Angela N. Casteneda and Julie Johnson Searcy are both trained doulas whose research interests include reproduction, birth, and culture. They have assembled a nicely laid-out body of work including well-known scholars such as Robbie Davis-Floyd and Christine Morton and newcomers to the field. This volume greatly expands the scholarly dialogue about doulas, most notably from the doula perspective that most of the authors bring to their work and it works through the many different issues that doulas encounter while doing it.
