International Accounting Timothy S. Douppnik, Mark T. Finn, Giorgio Gotti, 2024 International accounting can be viewed in terms of the accounting issues uniquely confronted by companies involved in international business. It also can be viewed more broadly as the study of how accounting is practiced in each and every country around the world, learning about and comparing the differences in financial reporting, taxation, and other accounting practices that exist across countries. More recently, international accounting has come to be viewed as the study of rules and regulations issued by international organizations, most notably International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB). This book is designed to be used in a course that attempts to provide an overview of the broadly defined area of international accounting. It focuses on the accounting issues related to international business activities and foreign operations and provides substantial coverage of the IASB and IFRS.
