Volume 1, Theory and Method, presents a rich mix of classic and contemporary theoretical perspectives, but the dominant views throughout are marked by an emphasis on the dynamic interplay of all facets of the developmental system across the life span, incorporating the range of biological, cognitive, emotional, social, cultural, and ecological levels of analysis. Examples of the theoretical approaches discussed in the volume include those pertinent to human evolution, self-regulation, the development of dynamic skills, and positive youth development. The research, methodological, and applied implications of the theoretical models discussed in the volume are presented. Understand the contributions of biology, person, and context to development within the embodied ecological system. Discover the relations among individual, the social world, culture, and history that constitute human development. Examine the methods of dynamic developmental research. Learn person-oriented methodological approaches to assessing developmental change. There is a paradigm shift that involves increasingly greater understanding of how to describe, explain, and optimize the course of human life for diverse individuals living within diverse contexts. At the end of the last century, social emotional learning (SEL) emerged as a relevant theme in education all over the world. What is SEL? SEL may be defined as a multidimensional construct orchestrating individuals' ability to identify and manage emotions, feelings, and concern for others as well as to organize and manage behaviors toward goals, solve problems, and develop positive relationships. SEL has been gaining growing popularity among researchers and practitioners. Still, there is a reasonable degree of ambiguity regarding the concept. In fact, the term is often used as an umbrella for many types of programs and interventions from distinct areas such as school, public health, mental health, or character education addressing the vulnerability of children and youth to various social and psychological problems. What are the topics covered under the SEL umbrella? They are diverse as follows: emotions, cognition, including multiple intelligences, motivation, socialization in schools and families, and self-regulation and its effects.
