Digest of Education Statistics 2012 Thomas D. Snyder, Sally A. Dillow, 2014-04

Digest of Education Statistics 2012 is the 48th in a series of publications initiated in 1962. Its primary purpose is to provide a compilation of statistical information covering the broad field of American education from pre-kindergarten through graduate school, drawn from government and private sources but especially from surveys and other activities led by NCES, National Center for Education Statistics, part of the Institute for Education Sciences (IES). The digest contains data on the number of schools, students, and teachers, as well as statistics on educational attainment, finances, libraries, technology, and international comparisons. Details on population trends, education attitudes, labor force characteristics, and federal aid supplies helpful background for evaluating the education data. This statistical reference could be helpful to parents choosing schools for their children, as well as for teachers, librarians, and public administrators, as it tracks enrollment, population trends, and key areas of studies with student progress. It also tracks the post-secondary college level, detailing undergraduate tuition and room/board, ESTIMATE costs at private nonprofit institutions, private for-profit institutions, and public institutions. It also tallies the number of postsecondary degrees and provides some gender demographics in this area. The Digest contains seven chapters: All Levels of Education, Elementary and Secondary Education, Postsecondary Education, Federal Programs for Education, and

Related Activities Outcomes of Education International Comparisons of Education and Libraries and Adult Education
