Geography and the Human Experience ,2004   **Experiential Learning in Geography** Jonathan E. Wessell,2021-11-01 This book provides insight into the importance and impacts that experiential learning has in geographic education by examining the experience the methods of evaluation and the encounters that students have shared about their experiences It allows the reader to gain insight into what it really takes to prepare and lead students in such experiences both domestically and internationally The book can be used as a guide to planning but also demonstrates the use of experiential learning theory throughout these experiences and especially the importance of reflection by the students on what they are experiencing The book is beneficial to students and faculty alike that are studying geography education

Encountering Ideas of Place in Education Emma Rawlings Smith,Susan Pike,2023-12-01 This book draws together theories research and practice on knowledges and pedagogies of place across educational settings Using empirical research on learning across education systems each chapter highlights different concepts of place in various contexts such as environments understandings of place like those experienced by communities and opportunities for embedding place in learning Chapters are co constructed by authors working collaboratively across different contexts tackling key themes such as justice mobilities changes and sustainability through place The book indicates how educators can apply creative approaches to teaching within through and about place in education and will therefore be of relevance to a wider range of academics teachers and practitioners working in early years settings schools universities and other educational context

Cultural Encounters with the Environment Viola Haarmann,2000 In Cultural Encounters with the Environment a distinguished group of contributors offers a fresh and original view of contemporary geography The authors explore the role of four traditional themes in the Onew cultural geographyO the interplay between the evolution of particular biophysical niches and the activities of the culture groups that inhabit them the diffusion of cultural traits the establishment and definition of culture areas and the distinctive mix of geographical characteristics that gives places their special character in relation to one another By examining how cultural space is constructed how environment is remade understood and imaged as a consequence and how people lay claim to place this volume establishes a compelling case for the importance of these enduring concepts to present and future trajectories in cultural geography   **Geography** John Morgan,David Lambert,2005-06-21 When Geography specialists decide they want to teach it can be a daunting prospect to enter a real classroom no matter how much subject knowledge they already possess Geography Teaching School Subjects 11 19 puts the subject into perspective and shows new teachers and student teachers how to make Geography accessible and interesting for their pupils Divided into three sections the book examines the theory and practice of teaching geography section one explores how teachers can frame their own knowledge for classroom practice section two focuses on Geography in the classroom and curriculum development as well as aspects of pedagogy and lesson design evaluation and assessment section

three focuses on the teachers themselves and how they can view and work on professional development within their own subject area **The Routledge Handbook of Methodologies in Human Geography** Sarah A. Lovell,Stephanie E. Coen,Mark W. Rosenberg,2022-10-18 The Routledge Handbook of Methodologies in Human Geography is the defining reference for academics and postgraduate students seeking an advanced understanding of the debates methodological developments and methods transforming research in human geography Divided into three sections Part I reviews how the methods of contemporary human geography reflect the changing intellectual history of human geography and events both within human geography and society in general In Part II authors critically appraise key methodological and theoretical challenges and opportunities that are shaping contemporary research in various parts of human geography Contemporary directions within the discipline are elaborated on by established and emerging researchers who are leading ontological debates and the adoption of innovative methods in geographic research In Part III authors explore cross cutting methodological challenges and prompt questions about the values and goals underpinning geographical research work such as Who are we engaging in our research Who is our research for What are our relationships with communities Contributors emphasize examples from their research and the research of others to reflect the fluid emotional and pragmatic realities of research This handbook captures key methodological developments and disciplinary influences emerging from the various sub disciplines of human geography **Handbook on the Experience Economy** Jon Sundbo,Flemming SËrensen,2013-09-30 This illuminating Handbook presents the state of the art in the scientific field of experience economy studies It offers a rich and varied collection of contributions that discuss different issues of crucial importance for our understanding of the exp **Ethical Encounters** Janne Korkka,2013-09-01 The problems of knowing and representing the other are acute every time we encounter a text as writers or readers Ethical Encounters engages with the representation of encounters with alterity in the writings of the Canadian author Rudy Wiebe Drawing on Emmanuel Levinas s philosophy on the ethics of encountering the other the book argues that Wiebe s writings show that the self s knowledge offers an inadequate basis for ethically valid representations of those encounters In the search for ethical ways of engaging with alterity Wiebe s writings offer new ways of employing silence and the presence of the unknowable as means to explore encounters with alterity Ethical Encounters shows that dividing Wiebe s work into two sharply distinct categories of Mennonite and First Nations writings overlooks important connections between the author s central works and may seriously hinder the interrogation of narrative engagement with alterity While such human encounters resonate against ethical strategies of representation the greatest challenge for the ethics of encounter in Wiebe s texts arises in encounters with the alterity of space Ethical Encounters engages with both physical and narrative spaces which are not permanently fixed in landscape or geography or in human perceptions of place arguing that the most radical expressions of alterity in Wiebe s writings emerge in encounters with the spaces of the Canadian North The study raises questions about the relationship

between the self and the other as they concern knowing what does the self know when it claims to know another person or space How does the narrating self negotiate the seeming collapse of its own knowledge when it encounters others whose stories cannot be known Ethical Encounters casts new light not just on Wiebe s writings but also on how we as authors and readers engage with expressions of alterity which refuse to be transformed into familiar knowable forms Janne Korkka is post doctoral researcher and coordinator of the North American Studies programme in the Department of English University of Turku Finland His main research interests lie in the problems of representing space and encountering alterity in Canadian writing He is co editor of Seeking the Self Encountering the Other Diasporic Narrative and the Ethics of Representation 2008 He teaches Canadian and postcolonial literatures and North American Studies and publishes mainly on Canadian writing
