Perception R. Held, H.W. Leibowitz, H.L. Teubner, 2012-12-06 This volume was designed to focus on the problems of perception and originally was to have been solely edited by Professor Hans Lukas Teuber who was a member of the editorial board which initiated production of the Handbook Accordingly he issued invitations to a number of researchers asking them to contribute chapters written in a style described in his words I hope that no author will feel constrained to undertake a major search of the literature he could find instead on an area in which he has been quite active himself and where most of the issues are immediately obvious to him In this way the writing of the chapter should be enjoyable rather than a chore it should result in a personal account of the state of a given area rather than in an encyclopedic treatise the field deserves this sort of summary review particularly if it is pointed toward the future and speeds the convergence of developments in sensory physiology and psychological studies of perception With the growing burden of national and international commitments including departmental headship Professor Teuber felt that it would be wise to share the editorial responsibilities for this volume and accordingly asked Professors Richard Held and Herschel Leibowitz to co edit the volume with him in the same spirit as outlined in his invitation to authors They agreed to help in this task
