Essays on Life, Art and Science by Samuel Butler,... Edited by R. A. Streatfeild Samuel Butler, 1908 **A History of English Literature: Modern times (1660-1911)** by Louis Cazamian, translated from the French by W. D. MacInnes ... and the author Emile Legouis, 1927 **Critic as Scientist** Ian F. A. Bell, 2023-08-11 First published in 1981 Critic as Scientist provides a detailed and scholarly account both of the scientific background and of contemporary artistic issues in its analysis of Ezra Pound's poetics During the crucial period of his years in London Ezra Pound was striving to formulate not only a new system of poetics but also a new language through which he could both define the critic's procedure and announce his modernity It was in science that Pound discovered the vocabulary that became his most characteristic gesture during the literary crises of the time The use of scientific terminology in his propaganda for a new renaissance belonged initially to specifically American modes of aesthetic tradition as typified by Whistler and aspects of New England transcendentalism A consideration of popular versions of physics and biology and of the scientific attitude displayed by such contemporaries as Fenollosa Hulme Ford and Eliot reveals that the major terms and practices of Pound's critical vocabulary were located in the issues of nineteenth and early twentieth century science The author has sought to demystify key words in the Poundian vocabulary and has suggested a wider literary and cultural context for the study of Pound's aesthetic theory This book will be of interest to students of literature *Essays on Life, Art, and Science* Samuel Butler, 1908 Recognized as a top notch scholar with widely ranging interests and an encyclopedic knowledge of an array of academic disciplines Samuel Butler contributed meaningfully to late nineteenth century research in a number of fields This volume collects some of his most important lectures and essays a number of which have since been enshrined as important early works in disciplines as diverse as microbiology and the philosophy of language **Understanding Gregory Bateson** Noel G. Charlton, 2010-03-25 Gregory Bateson 1904-1980 anthropologist psychologist systems thinker student of animal communication and insightful environmentalist was one of the most important holistic thinkers of the twentieth century Noel G Charlton offers this first truly accessible introduction to Bateson's work distilling and clarifying Bateson's understanding of the mind or mental systems as being present throughout the living Earth in systems and creatures of all kinds Part biography part overview of the evolution of his ideas Charlton's book situates Bateson's thought in relation to that of other ecological thinkers This long awaited volume opens up this challenging thinker's body of work and introduces it to a new generation of readers **The Cambridge History of English Literature: The nineteenth century. II** Sir Adolphus William Ward, Alfred Rayney Waller, 1922 *Select Conversations with an Uncle (Now Extinct) and Two Other Reminiscences* H. G. Wells, 2021-04-25 In *Select Conversations with an Uncle Now Extinct and Two Other Reminiscences* H G Wells employs a unique blend of satirical wit and philosophical inquiry This collection features dialogues that explore the nature of existence the passage of time and the intricacies of human relationships through the lens of conversations with an imagined uncle The literary style showcases

Wells's adeptness at blending fiction with social commentary positioning his work within the tradition of Edwardian literature while gesturing toward the modernist movement that would follow. The three pieces collected here not only reflect Wells's fascination with the speculative but also serve as a criticism of contemporary society encapsulating the spirit of an era caught between rapid industrial change and existential uncertainty. Wells, a figure synonymous with science fiction, was deeply influenced by his background in social reform and his experiences during the late Victorian era. His exposure to various intellectual movements along with his own quest for understanding the complexities of humanity informed these conversations. As a pioneering voice, Wells continually sought to engage his readers in reflective dialogue, offering insights into the human condition and the implications of progress. This book is a must-read for anyone intrigued by the intersection of science fiction and social critique. Wells's incisive humor and thought-provoking discourse challenge readers to reflect on their own lives and societal roles. Engaging with these dialogues not only enriches our understanding of Wells himself but also invites us to ponder profound questions about our existence and the legacy we leave behind. *The Outlook*, 1905. [Louis Cazamian, translated from the French by W.D. MacInnes ... and the author](#) Emile Legouis, 1927. **Major Cultural Essays** Bernard Shaw, 2021. George Bernard Shaw's public career began in arts journalism as an art critic, a music critic, and most famously a drama critic, and he continued writing on cultural and artistic matters throughout his life. His total output of essays and reviews numbers in the hundreds, dwarfing even his prolific playwriting career. This volume of Shaw's Major Cultural Essays introduces readers to the wealth and diversity of Shaw's cultural writings from across the breadth of his professional life, beginning around 1890 and ending in 1950. Topics covered include the theatre, of course, but also music, opera, poetry, the novel, the visual arts, philosophy, censorship, and education. Major figures discussed at length in these works include Ibsen, Wagner, Nietzsche, Shakespeare, Wilde, Mozart, Beethoven, Keats, Rodin, Zola, Ruskin, Dickens, Tolstoy, and Poe, among many others. Coursing with Shawian flair and vigor, these essays showcase the author's broad aesthetic sensibilities, trace the intersection of culture and politics in Shaw's worldview, and provide a fascinating window into the vibrant cultural moment of the late nineteenth and early twentieth centuries. *Essays on Two Moderns* William Henry Salter, 1911.

English Fiction and the Evolution of Language, 1850-1914 Will Abberley, 2015-05-27. Victorian science changed language from a tool into a natural phenomenon evolving independently of its speakers. Will Abberley explores how science and fiction interacted in imagining different stories of language evolution. Popular narratives of language progress clashed with others of decay and degeneration. Furthermore, the blurring of language evolution with biological evolution encouraged Victorians to re-imagine language as a mixture of social convention and primordial instinct. Abberley argues that fiction by

authors such as Charles Kingsley Thomas Hardy and H G Wells not only reflected these intellectual currents but also helped to shape them Genres from utopia to historical romance supplied narrative models for generating thought experiments in the possible pasts and futures of language Equally fiction that explored the instinctive roots of language intervened in debates about language standardisation and scientific objectivity These textual readings offer new perspectives on twenty first century discussions about language evolution and the language of science **The Cambridge History of English Literature**

Literature Sir Adolphus William Ward, Alfred Rayney Waller, 1917 **An Elusive Victorian** Martin Fichman, 2010-11-15
Codiscoverer of the theory of evolution by natural selection Alfred Russel Wallace should be recognized as one of the titans of Victorian science Instead he has long been relegated to a secondary place behind Darwin Worse many scholars have overlooked or even mocked his significant contributions to other aspects of Victorian culture With *An Elusive Victorian* Martin Fichman provides the first comprehensive analytical study of Wallace s life and controversial intellectual career Fichman examines not only Wallace s scientific work as an evolutionary theorist and field naturalist but also his philosophical concerns his involvement with theism and his commitment to land nationalization and other sociopolitical reforms such as women s rights As Fichman shows Wallace worked throughout his life to integrate these humanistic and scientific interests His goal the development of an evolutionary cosmology a unified vision of humanity s place in nature and society that he hoped would ensure the dignity of all individuals To reveal the many aspects of this compelling figure Fichman not only reexamines Wallace s published works but also probes the contents of his lesser known writings unpublished correspondence and copious annotations in books from his personal library Rather than consider Wallace s science as distinct from his sociopolitical commitments *An Elusive Victorian* assumes a mutually beneficial relationship between the two one which shaped Wallace into one of the most memorable characters of his time Fully situating Wallace s wide ranging work in its historical and cultural context Fichman s innovative and insightful account will interest historians of science religion and Victorian culture as well as biologists **The Publisher** ,1913 Essays on Life, Art and Science Samuel Butler, 1908
